[Step by Step Guide](#)

Standalone vs. Barcode Mode

SaberNet DCS has two basic modes of operation as far as the end user is concerned.

- Barcode Mode: In this mode of operation most of the user interaction is done through barcode scans.
- Standalone Mode: In this mode of operation most of the user interaction is done with the mouse and keyboard

It should be noted that barcode and standalone modes are not mutually exclusive. The features of both can be used at the same time. It all depends on how it is configured. Please see the [Administrator's Guide](#) for documentation on how to configure SaberNet DCS.

Step by Step Guide

For a detailed step by step guide to using the SaberNet DCS GTK client please see the [GTK Client User Manual](#)
