

Apple LaserWriter Select 300

Features

Print quality

- 300 dpi with FinePrint for high-quality text
- Grayscale printing for sharp graphics
- 39 scalable TrueType fonts for printing a wide range of styles and sizes
- PhotoGrade capable

Expandability

- Adobe PostScript option
- PhotoGrade Upgrade Kit for printing high-quality scanned images, illustrations, and graphics
- User-installable paper handling options

Versatility

- 250-sheet automatic tray and manual feed tray included
- Optional paper-handling capabilities for up to 800 sheets of paper (includes different media)
- Compact design fits any desktop
- Printer sharing with GrayShare

The Apple LaserWriter Select 300 provides laser printing with high-quality results, an expansion path to PostScript, printer sharing from multiple Macintosh computers, and extensive paper-handling capabilities.

Designed for individual use, the LaserWriter Select 300 printer is ideal if you want a convenient, reliable way to produce professional quality letters, reports, memos, and charts. You'll also enjoy the flexibility of printing high-quality text in a wide range of styles in any size you like, from tiny footnotes to attention-getting headlines. Choose from 39 scalable TrueType fonts, including such popular font families as Times, Helvetica, and Palatino.

The LaserWriter Select 300 also comes with Apple's FinePrint technology to smooth out lines and curves that normally appear jagged in your text.

When your needs grow, the LaserWriter Select 300 can grow

with you. You can add Adobe PostScript compatibility or Apple's PhotoGrade technology to print documents containing graphics or images with over 90 levels of gray—that's equivalent to 1,000 dpi.

To make the output process as easy as possible, the LaserWriter Select 300 features a standard cassette tray that holds 250 sheets of paper for automatic printing of large jobs, and a manual paper feed for small jobs requiring personal attention. For added convenience, an optional 250- or 500-sheet paper tray can be added to your

LaserWriter Select 300. And to enhance your productivity, you can continue to use your Macintosh computer while your document quietly prints in the background.

And for added versatility, Apple's GrayShare software also lets you share your printer with others on a network and achieve maximum Macintosh compatibility.
