

Notion

THE NEWTON LIST MANAGER

Notion comes complete with more than 100 easy-to-use, adaptable list templates. Record expenses, business contacts, project milestones. Manage guest lists, gift lists, stock trades. Organize CD collections. Plan vacations and shopping trips. Keep track of frequent flyer numbers, credit cards, retirement accounts, and more.

Newton intelligence keeps running totals. Search by key word. Sort by any field. Add a business lunch to your expenses and watch Notion total up, list accounts and payees on command, track billable hours, even assemble a calendar of client meetings. Notion manages essential information for professionals on the move.

STARCORE

The high-performance information manager for professionals on the move.

Notion: The Newton List Manager takes full advantage of Newton Intelligence to record and manage business and personal information.

From negotiating points to shopping lists.

Organized, productive people know it's all in the details. To make managing information easy, Notion offers over 100 adaptable list templates. Each template includes up to fifteen different data fields—for dates, places, expenses, names, numbers, whatever you need. Simply copy a template you like and use it to plan your life more easily and effectively.

Now you can leave the details to Newton.

Notion lists are specially designed for Newton users. Any list or selected items can be communicated directly or exported to the Notepad for faxing or e-mail. Add free-form "sticky notes" for a personal touch. Newton Assist will dial listed numbers. Pop-up "Active List" keeps the 25 most

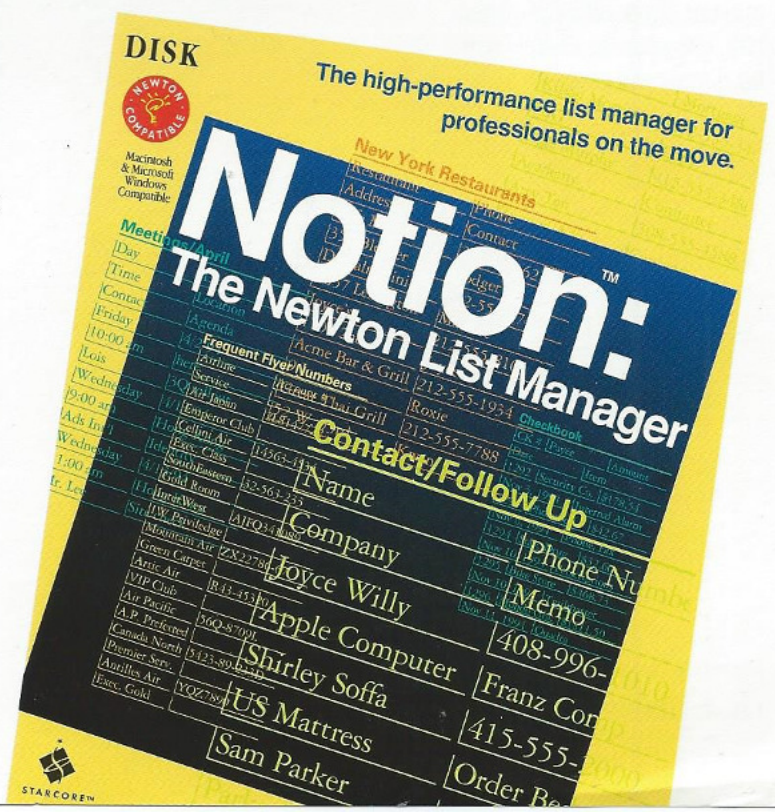

frequently used lists at the ready. Built-in To Do lists allow you to prioritize projects. Sort by any field in all or selected lists, and search by key word. Use intelligent checkboxes to hide, select or delete items.

The high-performance life manager.

If you can name it, Notion can organize it. Agenda items, trip plans, ATM withdrawals—Notion formats your handwritten entries into clear, readable print ready for reference and communicating. It's like having your own personal manager taking care of business. Notion makes planning your life as simple as writing a list. And with Newton, the only limit is your imagination.

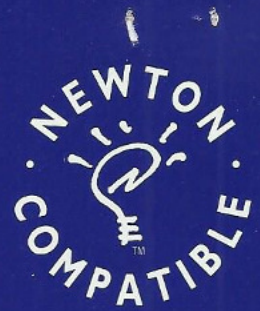

Highlights

- Over 100 list templates are ready to use and easy to edit for any purpose.
- Up to 15 data fields per list.

Notion: The Newton List Manager

Questions & Answers

Here are answers to some of the questions most commonly asked about Notion: The Newton List Manager.

Can Notion be run from internal memory?

Notion requires about 190K of memory, not including built-in lists. That means it easily fits inside the internal RAM of a Newton MessagePad. It will also run faster this way.

If I'm consulting and amending lists all the time, how do I maximize Notion's performance?

Simply leave Notion running in the background while you use other Newton applications. This lets you look up a name or number, check off a completed task, even start an entirely new list quickly and easily.

Can I use my desktop computer to edit, import, and export Notion lists?

Yes. Just use the Notion NCK Manager, available at no charge via on-line services or for a nominal shipping and handling charge directly from Eidetic, Inc. Call 1-800-708-STAR.

Does reference material, such as toll-free numbers, come in Notion form?

Notion already offers you a handful of reference lists—including travel 800 numbers—right in the package. Other Notion reference libraries are now being compiled by third parties.

System requirements:

Newton-compatible hardware with PCMCIA card slot (PCMCIA storage card recommended) and the following system:

- A Macintosh computer with a 68030 or better processor and at least 4 MB of RAM, Macintosh System 7 (version 7.0 or later), an Apple SuperDrive floppy disk drive, a hard disk drive, and Newton Connection Kit for Macintosh
- An 80386DX or better compatible PC (80486 or better recommended) with at least 4 MB of RAM and 3 MB available hard disk space, Microsoft Windows 3.1 (Enhanced mode), a VGA display, a serial port, and Newton Connection Kit for Windows
