

*Print
Quickly,
Without
an Expensive
Computer*

**SLASH YOUR PRINTER
CONNECTION COSTS IN HALF**

Now slash your costs and time for printing letters, reports and documents from your OMNINET local area network. With the Corvus Printer Server, you can print without dedicating an expensive computer or waiting in line.

The Printer Server lets you stretch the OMNINET local area network and its cost and time savings. The Printer Server frees more expensive computers from printing tasks—and frees you from waiting for a computer to send information to a printer.

One Printer Server lets 62 computers on an OMNINET network share three printers—two serial or one parallel. Or two printer servers attached to OMNINET let up to 61 computers share six printers. Massive sharing means slashed printer connection costs.

Printing is easy with the Printer Server. It plugs directly into OMNINET to let you do even more with your local area

network, for less. Once you've plugged up to three printers into the Printer Server, the server handles all your printing needs. And because it's important to you to keep accurate records and identify revisions, the Printer Server stamps each document with the time and date.

The Printer Server's suggested retail price is \$990, including software and the Utility Server hardware.

The Printer Server. More, for less.

HARDWARE SPECIFICATIONS

Processor	Z80
Memory	64 K
Network	OMNINET (built-in)
Ports	two RS232C serial, one parallel

POWER REQUIREMENTS

Voltage	100v, 120v, 220v or 240 v 50- or 60-Hz versions available
Consumption	10 watts

PHYSICAL DIMENSIONS (IN./CM)

Height	3.25/8.3
Width	7.75/19.7
Depth	13.75/34.7

ENVIRONMENT

Temperature	(F/C)
Operating	50° to 120°/10° to 50°
Non-operating	40°-140°/5° to 60°
Relative humidity	(non-condensing)
Operating	10% to 80%
Non-operating	10% to 90%
Operating altitude	-1,000 to 10,000/
Feet/meters	-305 to 3,050

COMPATIBLE MACHINES

Corvus Concept	
IBM PC/XT	
Apple II, IIe	(under Apple Pascal, CP/M)
