

# Graph'n'Calc™

**DESKTOP  
COMPUTER  
SOFTWARE  
INC.**

Graph'n'Calc is a decision support graphics system that bridges the 'function gap' between electronic spreadsheets and graphics packages. With Graph'n'Calc, you can develop forecast models and analyze statistical and financial data, then visualize your projections with a variety of charts and graphs. Graph'n'Calc will produce presentation quality graphs on paper or transparencies with a touch of a key, at an unbelievably low price.

One of the first things you'll notice about Graph'n'Calc is how easy it is to use. Within minutes you can master its single key commands. The system contains an instruction tutorial and the statistics book, Fundamentals of Forecasting, to help you understand the full potential of Graph'n'Calc. Graph'n'Calc will turn your computer into a sophisticated decision-making tool.

With Graph'n'Calc you have the option to produce both on-screen and hard-copy graphs including multiple line, multiple bar, stacked bar, combo line-bar, or pie charts. Use Graph'n'Calc's Slideshow format to display each graph in a slideshow presentation on the screen.

Graph'n'Calc interfaces with VisiCalc®, Desktop Plan®, and other programs using DIF or ASCII text files. The system is fully compatible with a hard disk.

## Hardware Requirements

Below is a recommended system configuration. Consult the software supplier about other configurations.

### Apple /// System

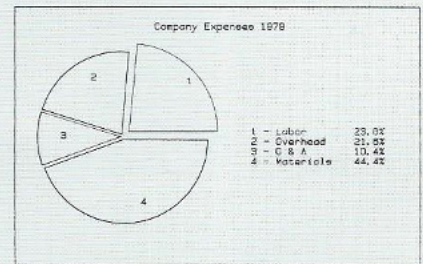

Apple /// with 128K memory  
Apple Monitor ///  
One Apple Disk /// Drive as drive 2  
Apple /// Modem Eliminator Cable  
Male-to-Male RS-232-C Cable  
HP 7470 Plotter, Option 001

## Ordering Information

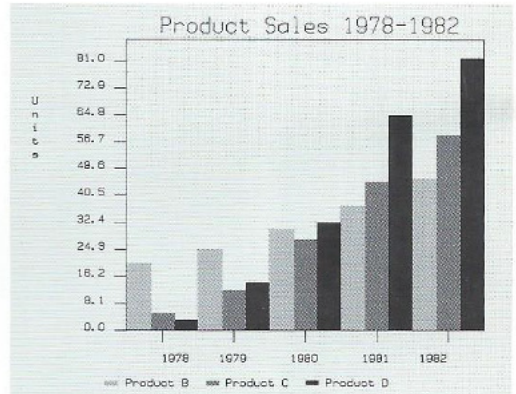

Graph'n'Calc	
Suggested retail	\$199.00
Plotter Addition	
Suggested retail	\$35.00

## Software Supplier
