To use the search feature, you just need to be able to describe what you are looking for with a word or a phrase, and then click the "Search" button. After this INPhO will find results that match the word or the phrase.

INPhO investigates whether the word or the phrase can be found in the ingredients section of a recipe.

The above generated example, the search for 'dried cowpeas' will produce references to recipes that contain the phrase in the ingredients section. Please click the Search button to perform this search.

The INPhO Cookbook only supports simple searching. It does not support boolean search operators (e.g. 'and', 'or').

Weights, measures and oven temperatures

The recipes in this database are from and for rural, village households, where it is acknowledged that equipment such as weighing scales may not be available. The use of kitchenware items such as teaspoons, dessertspoons and coffee mugs for measuring is common practice. If the user intends to use the recipes as a basic formulae for producing the products at the small scale, industrial level then the use of weighing scales and graduated (volume) measuring jugs are strongly recommended.

Similarly, it is appreciated that most rural, village households do not have access to modern gas cookers with pre - calibrated temperature dials. Cooking temperatures stated in some of the following recipes are general indicators of the oven temperature required to cook the product. Where INPhO users have access to more modern cookers or small scale industrial

ovens, then pre calibrated temperature settings should be used. The use of an accurate probe type thermometer is recommended for checking cooking temperatures at the small scale industrial level [see section on quality control for more information].

Please select one of the calculation tools from the following list or from the list box on top of this window.

Main units of measure and equivalences

1 cuillère à café	= 1 tsp	= 5 g	or 5 ml	= 60 gouttes
1 cuillère à soupe	= 1 tbsp	= 15 g	ou 15 ml	
3 cuillères à café	= 1 cuillère à soupe			
6 2/3 cuillère à soupe		= 100 g		
2 cuillères à soupe	= 1 once	= 1 oz	= 30 g	
4 cuillères à soupe	= de tasse	= 2 onces (2 oz)		
1 tasse	= 1 cup	= 225 g	= 1	= 8 onces

1 tasse	= 1 cup	= 225 g	= 1	(8oz)
tasse	= 8 cuillères à soupe			= 4 onces
2 tasses	= 1 pinte	= 450 g	= 1 litre	= 16 onces (oz)
4 tasses	= 4 cups	= 1 quart	= 900 g	
4 1/3 tasses	= 4 1/3 cups	= 1 litre	ou 1 kg	
1 tasse + 1 cuillère à soupe	= 250 ml			
1 once	= 1 oz	= 30	g = 30 ml	= 2 cuillères à soupe
1 pincée	= 1 pinch			= 1/8 cuillère à café

1 boîte	= 1 can			= 16 onces (16 oz)
1 l	= 2,1 pinte			
1 l	= 1,06 quart			
1 l	= 0,26 gallons			
1 dl	= 2/5 tasse			= 6 à 7 cuillères à soupe
1 pinte	= 0,45 l			= 40 onces (40 oz)
1 livre	= 1 pound	= 450 g		= 16 onces (16 oz)
1 kg	= 2,2 livre (1b)			

1 quart	= 0,95 l			
1 gallon	= 3,8 l	= 4 quarts
