**Workshops in organic, no-till, permanent-bed
gardening, mini-farming, mini-ranching
worldwide in English & Spanish**

**Heard of the Meatrix yet? Watch this great flash movie on factory farming at:
<http://www.themeatrix.com>**

Food irradiation is a key part of factory farming. By sterilizing meat at the end of the process, food irradiation perpetuates and even worsens the unsustainable, unsanitary and inhumane conditions found on most factory farms.

The Meatrix is a two-minute flash animation that spoofs the popular Matrix movies. But instead of Keanu Reeves, the Meatrix stars a young pig, Leo, who lives on a pleasant family farm ... he thinks. Leo is approached by a wise and mysterious cow, Moopheus,

who shows Leo the truth about modern farming -- the truth about the Meatrix!

The film describes the problems with factory farming and offers viewers a solution - the final page of the flash directs viewers to the Eat Well Guide, a national online directory of sustainably-raised meat, which is available at www.eatwellguide.org.

If you want to take action against food irradiation, visit www.foodirradiation.org

If you like the Meatrix and/or the Eat Well Guide, we only ask for one thing in return - that you send them on to all your friends!

Enjoy the show!

The Meatrix
