My 'printer output'

Actions include:

- Work with
- View
- View As
- View PDF

“View PDF” converts AFP and SCS spooled files to PDF. InfoPrint Server is not required for this function. However, if InfoPrint Server is on the system, we use it for the conversion. If it is not, Access for Web uses its own internal conversion.

- **The InfoPrinter server result has better quality**

Note: IBM Infoprint Server (5722-IP1) required to use “PDF Printer Output” and “PDF Printers”

Advantage of this over “View PDF”: conversion occurs at spooled file instead of on-demand when the user clicks “View PDF”
