System i Access Sessions

Windows:

- **System i Access for Windows: What's New?**

Web:

- **Get to the Web Fast with System i Access for Web V6R1 (Overview)**
- **Run 5250 Through a Browser with System i Access for Web**
- **Database Access with System i Access for Web**
- **System i Access for Web: Setup and Configuration**
- **System I Access for Web: What an Administrator Needs to Know**

Functional enhancements can be submitted via the FITS system. The url is:
<http://www.ibm.com/systems/i/software/access/>

And click on link "Request for Design Change"

Try out System i Access for Web for yourself!

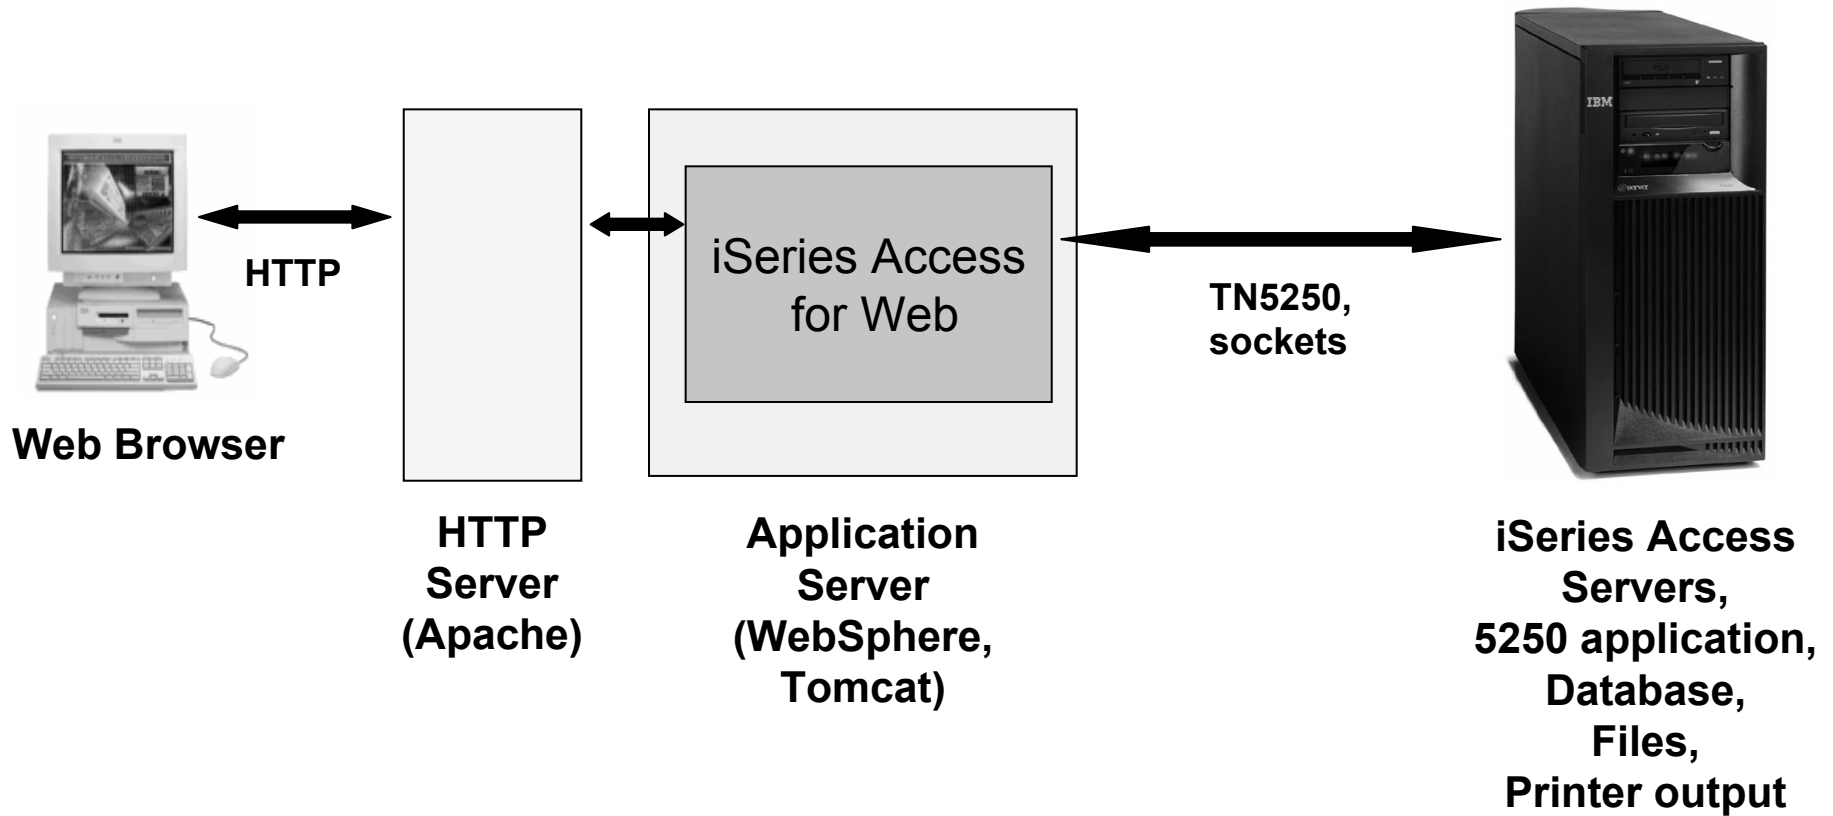

Start your browser and connect to the following web site:

<http://iseriesd.dfw.ibm.com/webaccess/iWAHome> (case sensitive)

<p>User ID = WACUST</p> <p>Password = demo2pwd</p>	<p>This shows the basic look of System i Access for Web as we ship it. You can try various functions -- including working with printer output, creating database requests, etc. Click on the 5250 tab, sign onto the iSeries, then start an RPG application called BOATS and run it.</p>
<p>User ID = BOATADMIN</p> <p>Password = demo2pwd</p>	<p>This is an example of how a customer might design a web page for their use. You will see that an end user could start the same BOATS application by clicking on the 5250 session, or they could have used HATS to run the application. You will also see other links that would let a user work with spoolfile information, work with IFS, run database requests, etc..</p>

Send email to: LLHIRSCH@us.ibm.com to reset the user profiles on iseriesd.dfw.ibm.com if either one gets disabled.

System i Access for Web Overview

System i Access for Web 5250 Interface

Runs as an interactive job

- Only function in System i Access for Web that is interactive

TN5250 port

- Only function in System i Access for Web that uses TN5250 port

Things to know

Because 5250 session is implemented using HTML, considerations to be aware of:

- **Not intended to replace full function emulators like PC5250, Host On Demand, etc. for purposes of "heads-down" data entry type of operations**
 - **Does not include graphics, EHLAPPI, DDE functionality**
 - **Does not provide keyboard mapping**
 - **Does not support certain keys the way PC5250 does (ie, Field Exit)**

- **Does not include Printer Emulation (push to printer)**
 - **i5/OS strategy is Internet Printing Protocol (IPP) printing**
 - **System i Access for Web provides capability to convert spooled files to PDF**

- **No direct interaction with server, so unsolicited server messages can't be received.**
 - **Need to request refresh to see break messages**

- **Does not include file transfer from session**

Preconfigured Sessions

***This is the only 5250 function you
will likely extend to your users***

Run Pre-Configured 5250 Sessions

You can limit users to connecting to only specific systems or running only specific applications.

http://<systemi>:<port>/webaccess/iWAMain

- **Create preconfigured 5250 sessions**
- **Then set policies to restrict users to only preconfigured sessions**
- **User selects 'Configured Sessions'**
 - Only link provided
 - User has only one action → to start a session

The screenshot shows the 'iSeries Access for Web' interface. The user is logged in as 'adams' on the 'System' at 'RCHLAND.IBM.COM'. The main content area is titled 'Configured Sessions' and contains a table with the following data:

Session	Action	Shortcut	Created By	Access
Shortcut to demo		Yes	smshao	*PUBLIC
Shortcut to Payroll		Yes	cminer	*PUBLIC

Below the table, there are several related links and their descriptions:

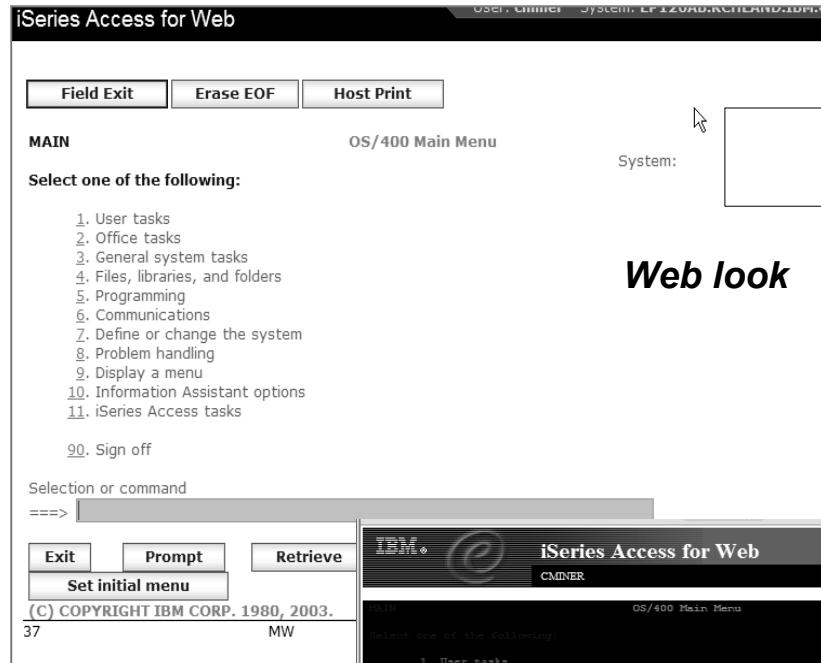

- [Shortcuts to sessions you configured](#): Display a list of shortcuts to sessions you configured. Shortcuts can be deleted from this list.
- [Active sessions](#): Work with your active sessions.
- [My macros](#): Work with your macros.
- [My keypads](#): Work with your keypads.
- [5250 user interface help](#): View help for working with configured sessions.

Run Pre-Configured 5250 Sessions

If you do not want users using anything in System i Access for Web except 5250, you could:

- Simply give them the 5250 url address (ie, <http://systemi/webaccess/iWA5250>)
- Set policies so users end up where you want them to be
 - Could include a macro so user bypasses i5/OS sign-on screen
- Predefine what screens will look like:
 - Colors
 - No Navigation pane

<http://<systemi>:<port>/webaccess/iWA5250>

Web look

**Traditional
'green screen'
look**

Policies

Policies are used by administrators to control the System i Access for Web functions and behavior

Policies

Only i5/OS user profiles with *SECADM authority can access
 “Customize → Policies”

iSeries Access for Web

Policies

Profile: **CMINER**

Action	Category	Description	Access
	5250	5250 user interface custom settings.	Allowed
	Command	Run batch command custom settings.	Allowed
	Customize	Preferences and policy administration custom settings.	Allowed
	Database	Database tables, requests, and run SQL custom settings.	Allowed
	Database connections	Create and edit database connection definitions.	Allowed
	Download	Download packages custom settings.	Allowed
	Files	Integrated file system and file share custom settings.	Allowed
	General	Page layout, language and character set custom settings.	Allowed

Setting Policies for 5250

When any user attempts to start a 5250 session to i5/OS using System i Access for Web, a check is made to see what policies have been set for this i5/OS user profile prior to displaying any information.

The following sequence of checks are made to authenticate user access:

- User profile
- Group profile
- *PUBLIC profile
 (*every System i Access for Web user is a member of *PUBLIC user group)

Policy settings to use only Preconfigured sessions

Set all the policies listed below to “deny” in order to limit users to using only preconfigured 5250 sessions.

- Start non-configured sessions
- Create configured session
- Copy configured session
- Delete configured session
- Rename configured session
- Edit configured session
- Create configured session shortcut
- Copy configured session shortcut
- Delete configured session shortcut
- Rename configured session shortcut

http://<systemi>:<port>/webaccess/iWAMain

The screenshot shows the 'iSeries Access for Web' interface. The top navigation bar includes 'User: adams', 'System', and 'RCHLA'. The main content area is titled 'Configured Sessions' and contains a table with the following data:

Session	Action	Shortcut	Created By	Access
Shortcut to demo		Yes	smshao	*PUBLIC
Shortcut to Payroll		Yes	cminer	*PUBLIC

Below the table, there are several related links and their descriptions:

- [Shortcuts to sessions you configured](#): Display a list of shortcuts to sessions you configured. Shortcuts can be deleted from this list.
- [Active sessions](#): Work with your active sessions.
- [My macros](#): Work with your macros.
- [My keypads](#): Work with your keypads.
- [5250 user interface help](#): View help for working with configured sessions.

In this example, other policies were also set to remove other functions from the Navigation pane

Policy settings to use only 5250 (no navigation pane)

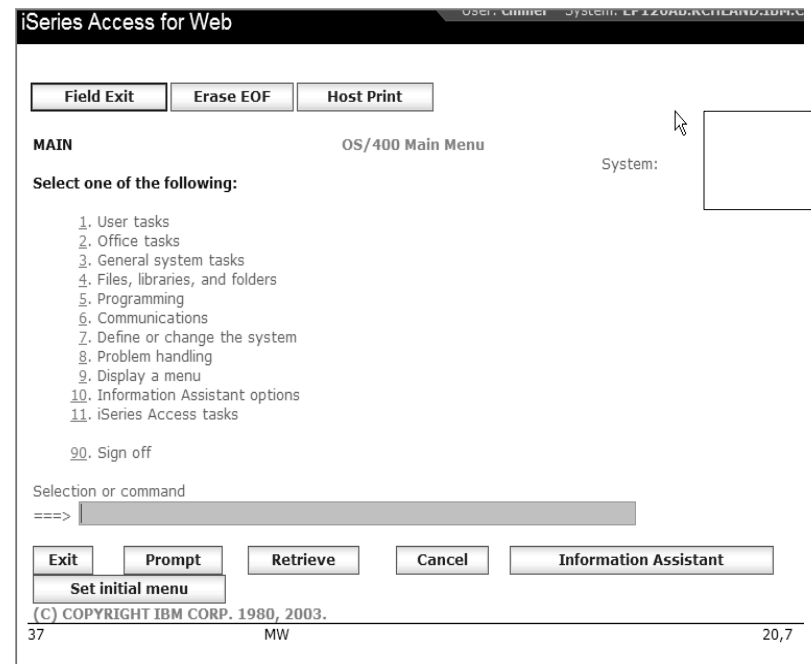

Here are some policies you could set to enable a user to go directly to a 5250 session and not see anything else in System i Access for Web

`http://<systemi>:<port>/webaccess/iWA5250`

- Leave "Start non-configured sessions" on Allow
- Set "Prompt when starting non-configured sessions" to No
- In "Configured session to use for defaults", add a previously created Configured session that you have given this user/group profile a shortcut to

To entirely remove the Navigation pane, go to category "General"

- Navigation = Deny

Setting Default Session

Select the shortcut to the session to use as the default and apply the policy

Starting a 5250 session

How to Start a 5250 Session

Two options:

1. Select 'Start Session'

- Fill in information on Start Session and connect
- To save the session, select 'Active Session Settings' link at bottom of screen, modify any information you wish, then click on 'Save'

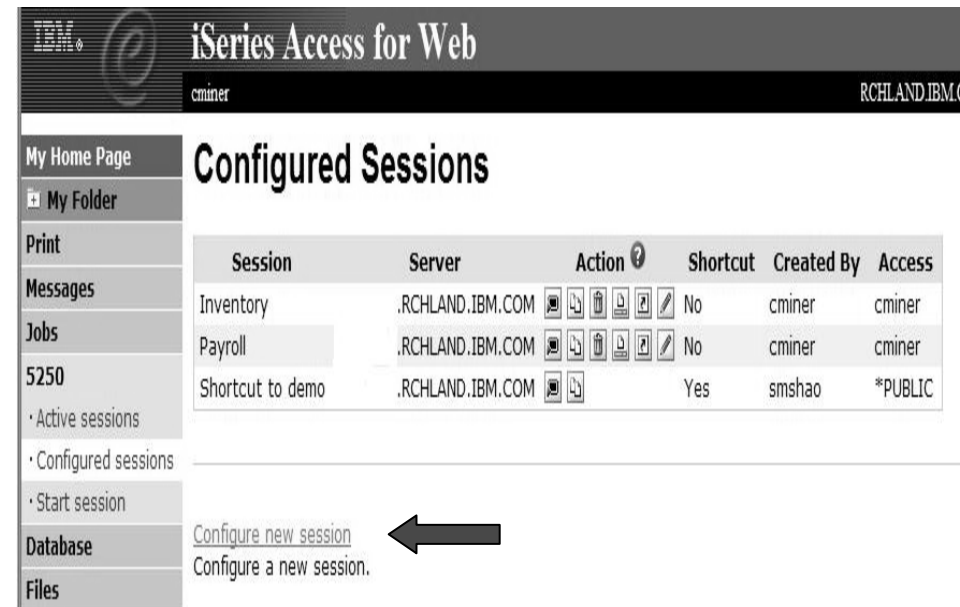

1

2. Select 'Configured Sessions'

- Select 'Configure New Session' link on lower screen
- Set up as you wish, then click on 'Save'

2

Use “Start Session” Dynamically

- Specify the system to connect
- Select the session attributes
 - Port, code page, workstation ID, etc.
- Start session

Start a Configured Session

- Configured sessions list shows the list of sessions for the logged in user
- Select the “Start” icon for the session to start

Setting up a 5250 Session

Select Session Name

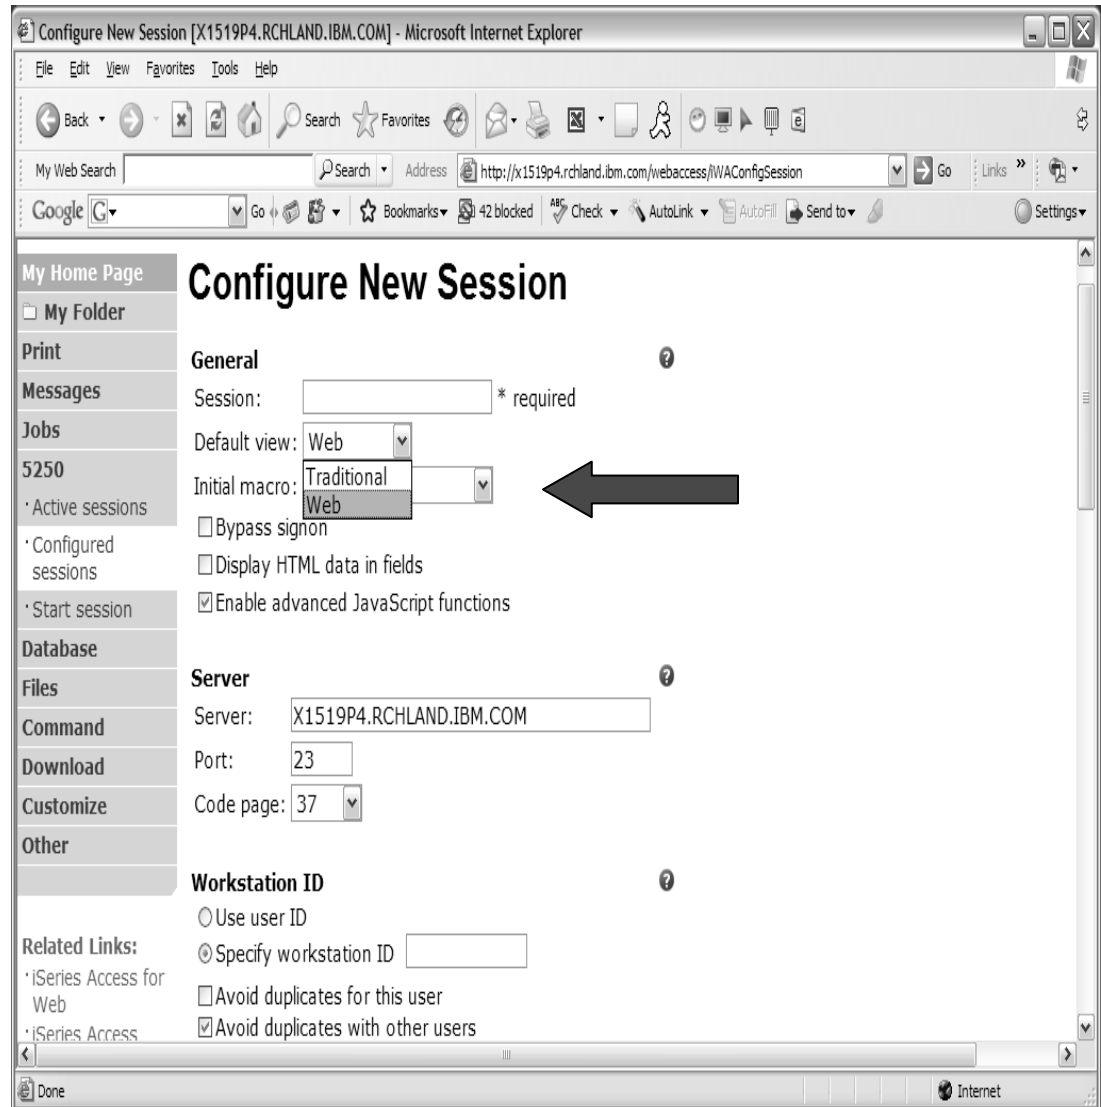

- Name of this ‘Configured’ session

Determine screen look

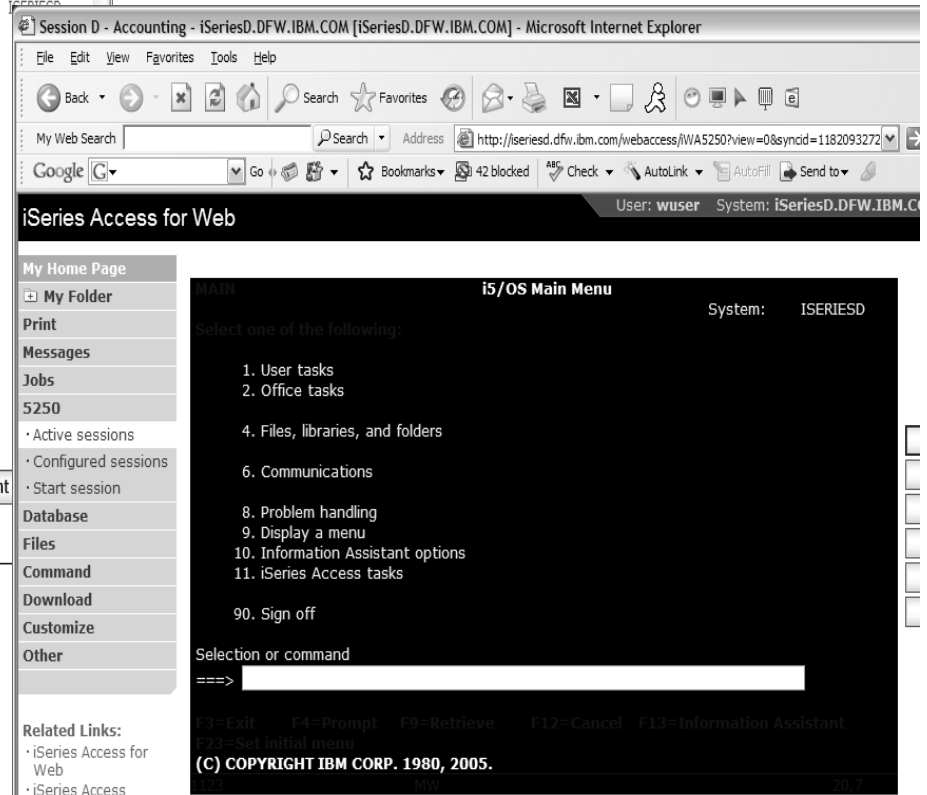

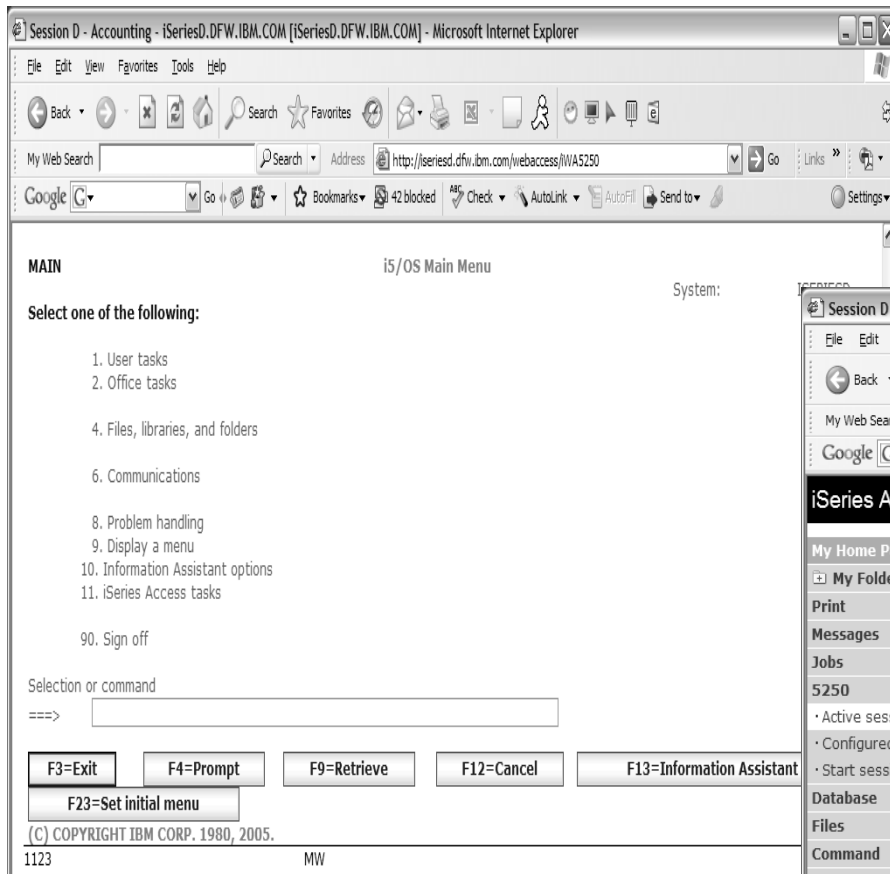

- Web View is default
- Traditional View can be selected

Select System i to connect to

- Enter System Name or TCP/IP address
- Port Address

Web View Vs Traditional View

Bypass Signon – V5R4 and later

- Uses the credential the user used to login to System i Access for Web
- Option available for configured and dynamically started session

 - Uses the credential the user used to log in to System i Access for Web
 - **CFGACCWEB2 AUTHTYPE(*APPSVR) AUTHMETHOD(*KERBEROS) ... - new in V6R1!**

Configuring a New Session – Workstation ID

Workstation ID

Use user ID
 Specify workstation ID
 Avoid duplicates for this user
 Avoid duplicates with other users

Use user ID	System i Access for Web authenticated user ID is used for the workstation ID, up to ten characters.
Specify workstation ID	Enter a workstation ID of your choice, up to ten characters. If you select the radio button and leave the text field blank, a value is generated by i5/OS. The default device name starts with <i>QPADEV</i> .
<i>Avoid duplicates for this user:</i>	When this option is enabled, a wild card character is added to the device name to make it unique for the current user.
<i>Avoid duplicates with other users:</i>	When this option is enabled, the server adds a wild card character to the device name to make it unique for all users on the server.

Workstation ID

You can enter keyword and special characters, like you do for PC5250. Here is how they are handled.

Computer name or User name (&COMPN, &USERN): These keywords are accepted.

- However, they will not resolve to the PC name and the Windows login user ID like they do in PC5250
- Computer name: resolved to the System i name
- User name: resolved to the user profile name of the web application server job.
- Also note that using the &COMPN and &USERN keywords could result in workstation IDs that are longer than ten characters which would then be truncated.

Session Type ID (%):

- This will add an “S” to workstation ID, indicating that this is a display session.
- With PC5250, a “P” would replace the “%” if a printer session was started. However, System i Access for Web only has display sessions.

Workstation ID (continued)

Keyword and special characters, continued...

Short session ID (*): Adding this character will make the ID unique for this user.

- The System i Access for Web option **Avoid duplicates for this user** causes the “*” character to be added at the end of the ID.
- Therefore, if you use both the “*” and Avoid duplicates for this user, then two special characters will be added to the workstation ID.

Collision Avoidance ID (=): Adding this character will make the session ID unique.

- The System i Access for Web option **Avoid duplicates with other users** causes the “=” character to be added at the end of the string.
- Therefore, if you use both the “=” and Avoid duplicates with other users, then two “=” will be added to the string..

Configuring a New Session (continued)

Web View and Traditional View settings

- Many keyboard and screen settings can be set to improve end user productivity and satisfaction
- Can also set up different text colors

Create a consistent 'look' for all your users...

Background colors
The browser background color is used.

Example: 5250 - Proportional Width vs. Fixed Width

Default for 'Web View' is to display output using Proportional width fonts

To change to Fixed width fonts, check the box that says:

- Display text using fixed width fonts

Users can also do this on-the-fly by clicking on the "Active session settings" link and change the setting for this connection, or by switching to Traditional view.

Fonts

System i Access for Web 5250 is rendered with HTML

- Fonts are controlled by the browser**
- Use browser options to change the font style and font size**

Enable Active Function Keys As Buttons

Defaults:

- Display Active Function Keys as Buttons
- Show More... as a button

Can uncheck these boxes to deliver a more traditional view

The screenshot shows the 'iSeries Access for Web' interface. At the top, it displays 'User: cminer1 System: RCHLAND.IBM.COM'. The main content area is titled 'MAIN i5/OS Main Menu' and contains a list of options under 'Select one of the following:'. Below this is a 'Selection or command' field and several buttons: 'Exit', 'Prompt', 'Retrieve', 'Cancel', 'Information As', and 'Set initial menu'. A message at the bottom reads 'Command MAJOR in library *LIBL not found.' and '37'.

On the right side, there is a table of active jobs with the following columns: Opt, Subsystem/Job, User, Type, CPU %, Function, and Status. The table lists several jobs, including QBATCH, QCMN, QCTL, QSYSSCD, QHTTSPVR, and several ADMIN jobs. A 'More...' link is visible at the bottom right of the table.

At the bottom of the screenshot, there is a section for 'Parameters or command' with a field containing '===>'. Below this, a list of function keys is shown: F3=Exit, F5=Refresh, F7=Find, F10=Restart statistics, F11=Display elapsed data, F12=Cancel, F23=More options, and F24=More keys.

Setting User Defaults

“Save As Default” saves this session configuration as the default for the current user.

Can be performed from active session settings or configured session settings.

Creating Macros

Shortcuts to Macros

**Adding Macros to
Preconfigured Sessions**

Macros

Behave differently than PC5250

- **Keys processed on a screen by screen basis**
 - **PC5250 – every key is recorded and played back**
 - **System i Access for Web – cursor positioned in field and keys entered into field**
- **On a given screen, keys may not be processed in the same order as they are entered**
- **Functionally equivalent, but behaves differently**

[Start session](#)
Start a new session.

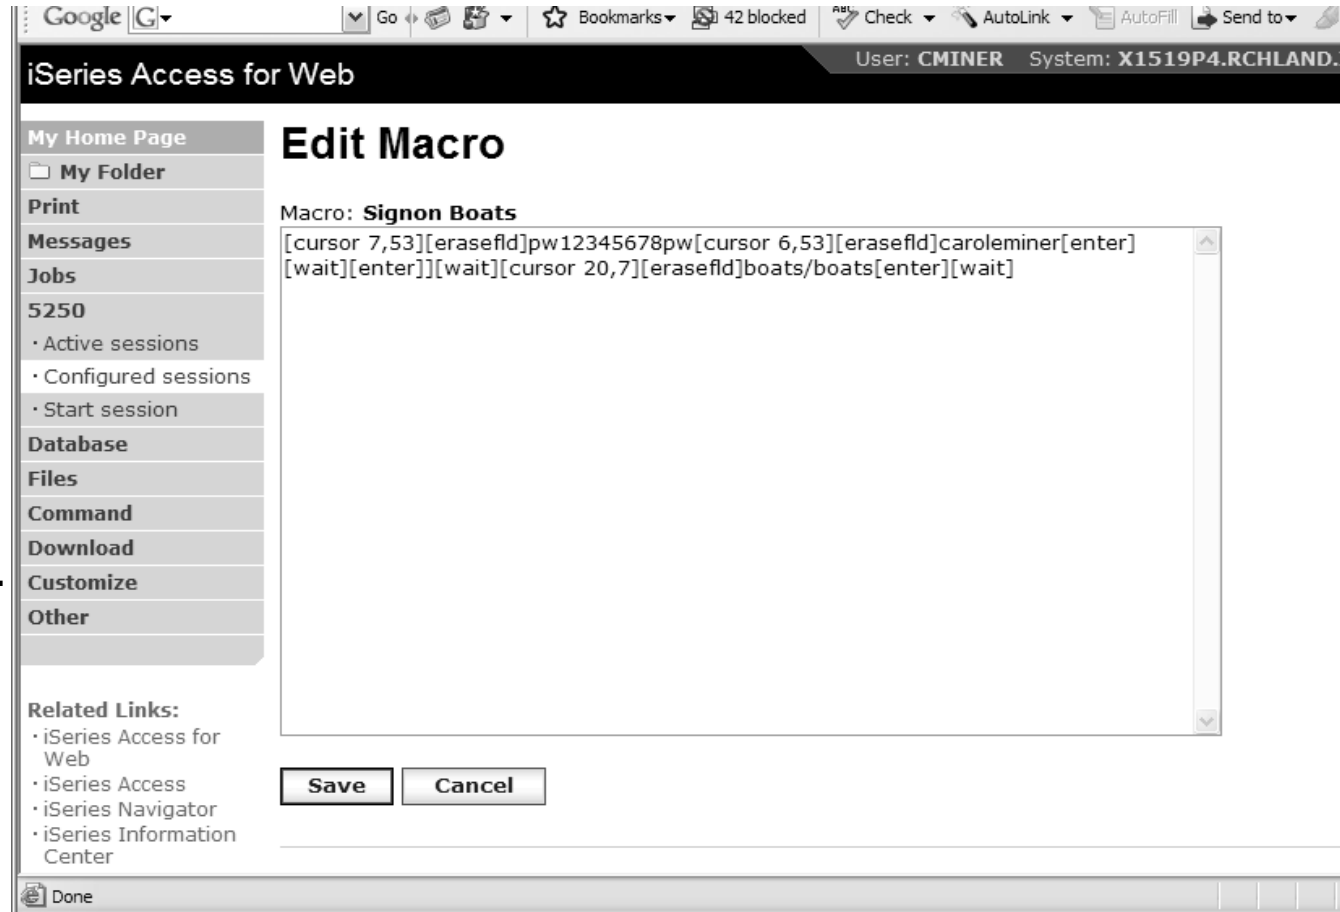

Single Sign On with Macro

- **Create a macro to login to 5250**
 - Using your own user ID and password
- **Edit the macro and replace your user ID and password with directives to use the user's login**
- **Share the macro (create shortcut) with the user or group**
- **Associate the macro with a session so the macro is executed when the session starts**
- **Share the session (create shortcut) with the user or group**

Editing a Macro

This macro was created to bypass the i5/OS sign-on screen and to put the user directly into an RPG application called BOATS.

- Note that the user-ID and password are listed in clear text.

Edit Macro

Replace the recorded user ID with [user]
Replace the recorded password with [password]

Edit Macro

Macro: **macro example**

```
[cursor 6,53][erasefld][user][cursor  
7,53][erasefld][password][enter][wait][enter][wait][cursor  
20,7][erasefld]wrkactjob[enter][wait]
```

Save **Cancel**

Supported Commands for Macros

The supported cursor positioning commands are:

General macro commands

[attn] - Attention
 [altview] - Alternate View
 [backspace] - Backspace
 [backtab] - Backtab
 [bof] - Beginning of field
 [clear] - Clear
 [down] - Cursor down
 [left] - Cursor left
 [right] - Cursor right
 [cursel] - Cursor select
 [up] - Cursor up
 [delete] - Delete character
 [dspsosi] - Display SO/SI
 [dup] - DUP field
 [enter] - Enter
 [eof] - End of field
 [eraseeof] - Erase EOF
 [erasefld] - Erase field
 [erinp] - Erase input
 [fldext] - Field exit
 [fieldmark] - Field mark
 [field-] - Field minus
 [field+] - Field plus

General macro commands...

[pf1] - F1
 [pf2] - F2

 [pf19] - F19
 [pf20] - F20
 [pf21] - F21
 [pf22] - F22
 [pf23] - F23
 [pf24] - F24
 [help] - Help
 [home] - Home
 insert] - Insert
 [newline] - New line
 [pa1] - PA1
 [pa2] - PA2
 [pa3] - PA3
 [pageup] - Page up
 [pagedn] - Page down
 [reset] - Reset
 [sysreq] - System request
 [tab] - Tab field

Bi-directional text support commands

[base] - Base
 [close] - Close
 [fldrev] - Field reverse
 [latinlayer] - Latin layer
 [screenrev] - Screen reverse

Other macro commands

[cursor row,column] - Locate cursor at specified row and column. Row and column must be numbers.
 [password] - authenticated password
 [pause] - Pause 1 second
 [pause n] - Pause n seconds
 [user] - authenticated user-ID
 [wait] - Wait for input

Taking advantage of active session behavior

- **Leave the session and browse on the web, or**
- **Leave your workstation and go to another workstation and**
- **Reconnect to your session**

Ending a Session

Closing the browser or turning off the workstation does not end the session

- **Two ways to end a session**
 - From an active session
 - From active session list
- **Properly cleaning up TN5250 connection**
 - Frees up resources in application server (Access for Web)
 - Frees up resources on target server (TN5250)

Switch to web view by selecting the “Web view” link

Web View vs. Traditional View

Web View

- Proportional font
- Menu displayed as links
- Active function keys displayed as buttons
- Allows cursor positioning at non-input fields
- Display “More...” as button
- Message line (25th line) treated as help

Traditional View

- Fixed width font
- Function key bar (F1-F24)
- Background color configurable (default is black)

- All the view settings are configurable.
- Configure web and traditional view settings for your environment.

Keypads

My Keypads

Configuring a Keypad is a very effective way to simplify many end user tasks

- For example, a button to do a 'Host Print' of a screen

The screenshot shows the 'iSeries Access for Web' interface. At the top, it displays 'User: cminer System: RCHLAND.IBM.COM'. On the left is a navigation menu with items like 'My Home Page', 'My Folder', 'Print', 'Messages', 'Jobs', '5250', 'Database', 'Files', 'Command', 'Download', 'Customize', and 'Other'. The main content area shows a 'Host Print' button configuration window with a grid of buttons: Host Print, Field Exit, Field Minus, Field Plus, Erase EOF, Erase Field, Erase Input, and Refresh Screen. Below this, the 'MAIN' section is titled 'i5/OS Main Menu' and 'System: LP016AB'. It asks to 'Select one of the following:' and lists 11 numbered options. A large number '3' is overlaid on the right side of the list. At the bottom, there are 'Related Links' and a footer with copyright information: '(C) COPYRIGHT IBM CORP. 1980, 2005.'

The screenshot shows the 'My Keypads' configuration window. It has a sidebar with the same navigation menu as the previous screenshot. The main area is titled 'My Keypads' and contains three sections: 'Top Keypad', 'Side Keypad', and 'Bottom Keypad'. Each section has dropdown menus for 'Rows' and 'Columns', a 'Show keypad' checkbox, and a 'Configure' button. The 'Top Keypad' is set to 1 row and 5 columns. The 'Side Keypad' is set to 12 rows and 2 columns. The 'Bottom Keypad' is set to 2 rows and 5 columns. At the bottom of the window are 'Save' and 'Cancel' buttons. A large number '1' is overlaid on the right side of the window.

The screenshot shows the 'Configure Top Keypad' dialog box. It has a sidebar with the same navigation menu. The main area is titled 'Configure Top Keypad' and shows a grid of buttons: Host Print, Field Exit, Field Minus, Field Plus, Erase EOF, Erase Field, Erase Input, and Refresh Screen. Each button is in a dropdown menu. At the bottom are 'OK' and 'Cancel' buttons. A large number '2' is overlaid on the right side of the dialog.

Keypads

Three sets of keypads

- Top, right, and bottom
- Each set can be customized
- Each set can be turned on or off

Macros can be assigned to keypad

Configuration is per user

- One keypad configuration per user
- Global across all session configurations
- Not tied to session configuration

The screenshot displays a web-based sign-on interface for an IBM iSeries system. On the left is a navigation menu with items like 'My Home Page', 'My Folder', 'Print', 'Messages', 'Jobs', '5250', 'Active sessions', 'Configured sessions', 'Start session', 'Database', 'Files', 'Command', 'Download', 'Customize', and 'Other'. The main area contains a 'Sign On' form with fields for 'User', 'Password', 'Program/procedure', 'Menu', and 'Current library'. System information on the right includes 'System: LP016AB', 'Subsystem: QINTER', and 'Display: QPADEV000G'. A keypad of function keys (F1-F24) is visible on the right side. At the bottom, there are two rows of buttons: 'Attention', 'Refresh Screen', 'Field Exit', 'Page Up', 'Enter' and 'System Request', 'Stop Session', 'Reset', 'Page Down'. Copyright information '(C) COPYRIGHT IBM CORP. 1980, 2005.' and page numbers '37' and '6,53' are also present.

Welcome

Welcome to the System i Access portlets - specifically developed for System i Access customers. These portlets allow you to access your i5/OS resources and information through a Web browser.

System i Access portlets include the following:

- 5250 portlet
 - Run commands and access full-screen 5250 character-based applications.
- IFrame portlet
 - Access any of the System i Access for Web servlets using the IFrame portlet.
- Integrated file system browsing portlets
 - Browse the integrated file system.
 - View, edit, upload and download files.
 - Create zip files. Add files to a zip file. View, extract, and delete files from a zip file.
- Printers, printer output, and output queues portlets
 - View printer status, start and stop the writer job associated with a printer.
 - Hold, release, print, delete and view printer output files.
 - Move printer output files to another output queue or printer.
 - Hold and release output queues.
- Database tables and SQL portlets
 - View database tables, add and update records.
 - View query results, customize format of results.
 - Run SQL statements dynamically.
 - Store, run, and manage frequently used SQL statements
- Commands portlets
 - Run CL commands.

The System i Access portlets are included with System i Access for Web. The System i Access for Web product is part of the System i Access Family (5761-XW1). For more information regarding System i Access, System i Access for Web, and the System i Access portlets, refer to the following web sites:

- [System i Access](#)
- [System i Access for Web](#)
- [System i Access Portlets](#)

Find more great portlets from the [IBM WebSphere portlet catalog](#) and at the [IBM WebSphere Portal Zone](#).

References in this document to IBM products or services do not imply that IBM intends to make them available in every country.

The following terms are trademarks of International Business Machines Corporation in the United States, other countries, or both:

AS/400	e-business on demand	i5/OS
AS/400e	IBM	OS/400
eServer	IBM (logo)	System i
@server	iSeries	

Rational is a trademark of International Business Machines Corporation and Rational Software Corporation in the United States, other countries, or both.

Intel, Intel Logo, Intel Inside, Intel Inside logo, Intel Centrino, Intel Centrino logo, Celeron, Intel Xeon, Intel SpeedStep, Itanium, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.

Linux is a trademark of Linus Torvalds in the United States, other countries, or both.

Microsoft, Windows, Windows NT, and the Windows logo are trademarks of Microsoft Corporation in the United States, other countries, or both.

UNIX is a registered trademark of The Open Group in the United States and other countries.

Java and all Java-based trademarks are trademarks of Sun Microsystems, Inc. in the United States, other countries, or both.

Other company, product or service names may be trademarks or service marks of others.

Information is provided "AS IS" without warranty of any kind.

All customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics may vary by customer.

Information concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information, including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only. Contact your local IBM office or IBM authorized reseller for the full text of the specific Statement of Direction.

Some information addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance, function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements equivalent to the ratios stated here.

Photographs shown are of engineering prototypes. Changes may be incorporated in production models.
