i want stress-free IT.
i want control.
i want an i.

IBM

Abstract

If you are looking for a extremely simple and highly functional way to work with System i resources, then System i Access for Web is the best option!

Users simply start up their favorite browser and point-and-click their way through easy-to-use GUIs and wizards. This session shows how users can run host applications, work with the database, printers, and the IFS. Network administration is a breeze as nothing is installed or configured on the PC, and control is at the server. You will see how to:

- **Run host applications (5250 emulation), upload and download database information, and use the iSeries as a file and print server**
- **Convert spooled printer output to PDF and either print it or email it**
- **Work with printers, jobs, run commands, send messages -- all through easy-to-use GUIs designed around the browser interface**
- **How an administrator can set up different views ('window') of the iSeries for different groups of users.**
- **Learn about the new features in the V5R4 version of System i Access for Web.**

iSeries Access Family Packaging

V5R4 5722-XW1 iSeries Access Family	V5R3 5722-XW1 iSeries Access Family
• iSeries Access for Windows, 5722-XE1, V5R4	• iSeries Access for Windows, 5722-XE1, V5R3
• iSeries Access for Web, 5722-XH2, V5R4	• iSeries Access for Web, 5722-XH2, V5R3
• iSeries Access for Linux, 5722-XL1	• iSeries Access for Linux, 5722-XL1, V1.10
• iSeries Access for Wireless, 5722-XP1, V5R4	• iSeries Access for Wireless, 5722-XP1, V5R3
	• HATS Limited Edition V5.0, 5724-F97-01
	V5R3 customers not wanting to upgrade to i5/OS V5R4 but want the new V5R4 iSeries Access Family clients can order no-charge Feature No. 2648 of Product No. 5722-XW1

V5R2 End of Support (EOS) was 4/30/2007

i want an i.

---

iSeries Access and System i Express

• **Each i5/OS user on System i is entitled to use any client in the iSeries Access Family at no additional charge**

• **With iSeries Access, users can:**
– Access traditional i5/OS applications using the 5250 emulation function
– Query and retrieve DB2 information through easy-to-use GUIs
– Upload spreadsheet information into DB2
– Use i5/OS as a file server
– Access i5/OS printer output, convert it to .PDF, and print it on PC printers

• **iSeries Access Family (5722-XW1) unlimited user feature included with 515 and 525 systems**

See Announcement Letter No's 107-181 and 107-182 dated 4/10/07 for more details

- **Getting Started**

n

- **Ways to roll out to end users**

- **Control Access to functions**

i want an i.

What is System i Access for Web?

End users can leverage business information, applications, and resources across an enterprise by extending the iSeries resources to the client desktop through a web browser

**OS/400
V5R2
V5R3
V5R4**

Provides access to System i through a browser

- **5250 access**
- **Access to database, integrated file system, printers, output queues, jobs**
- **Can run batch commands and send/receive messages**

- **Windows**
- **Linux**
- **Macintosh**
- **Unix**

It has the following advantages:

- **Is server based**
- **Requires only a browser on the client, no configuration required at desktop, no applets installed on desktop**
- **Uses industry standard protocols - HTTP, HTTPS and HTML**

Netscape

Opera

Internet Explorer

Firefox

Opera

Mozilla

4

Fully Integrated with your Browser

- **Use any code page available in your browser**
  - **System i Access for Web, V5R4, translated into 38 NLVs (including DBCS**
    - **New Japanese Feature 2930 in V5R4**
  - **See screens in preferred language**
- **Use any keyboard setting available in Windows**
- **Font Size**
- **Set up your SSL through your browser**

Supported Web Application Servers

**iSeries Access for Web servlet code can
be used with any of the following web
application servers:**

- **Integrated web application server –
  announced October 10, 2006**
- **WebSphere® Application Server V6.1
  and V6.0 – Express for i5/OS**
- **WebSphere Application Server V6.1
  and 6.0 Base and Network Deployment**
- **WebSphere Application Server V5.1 -
  Express for iSeries**
- **WebSphere Application Server V5.0 -
  Express**
- **WebSphere Application Server V5.1
  and 5.0 Base and Network Deployment
  Editions**
- **ASF Tomcat**

**iSeries Access for Web portlet
code can be used with any of
the following portal servers.**

- **IBM Workplace Services
  Express V2.6 (V5R4 iSeries
  Access for Web)**
- **IBM Workplace Services
  Express V2.5**
- **WebSphere Portal for
  Multiplatforms V6.0**

October 10 Announcement:
"System i Web Enablement Made Easy"

Two pieces relate to iSeries Access for Web:

- **System i Access for Web supports the use of a Web application server integrated with i5/OS.**

  – **Configure System i Access for Web without having to install or configure a Web Application server**

  – **Install**   n
      – **V5R4 SF99114 for i5/OS and supporting software**
      – **V5R3 SF99099 for i5/OS and supporting software**
      – <u>**V5R4**</u> **System i Access for Web PTF SI25551 (or later)**

  – **Configure System i Access for Web**
      – **QSH**
      – **cd /QIBM/ProdData/Access/Web2/install**
      – **cfgaccweb2 –appsvrtype *INTAPPSVR**

Refer to: **http://www.ibm.com/eserver/iseries/access/web/servicepacks.html**

October 10 Announcement:
"System i Web Enablement Made Easy" (continued)   **V5R4**

Two pieces relate to System i Access for Web:

– **Web Enablement for i5/OS: Express Runtime Environment**
   • **Auto configure of Web servers, components, applications using WAS – Express V6.0**
      – **System i Access for Web is part of the environment**
      n

– **Ordering Information**
   • **5722-WE2 Express Runtime Web Environments ships with all V5R4 i5/OS orders**
      – **DVD**
   • **Can also be ordered separately. No-charge feature of 5722-WE2 Web Enablement for i5/OS**
      – **Order feature 5905 for CDs**
      – **Order feature 5906 for a DVD**

9

4 CL Commands in Access for Web

Example of the CL commands

- **Configure Command example when using WebSphere Application Server V5.1 - Express for iSeries**
  - CFGACCWEB2 -appsvrtype *WAS51EXP -wasinst iwa51exp -appsvr iwa51exp
- **Start Command example when using WebSphere Application Server V5.1 - Express for iSeries**
  - STRACCWEB2 APPSVRTYPE(*WAS51EXP) WASINST(MYINST) APPSVR(*DEFAULT)
- **End Command example when using WebSphere Application Server V5.1 for iSeries**
  - ENDACCWEB2 APPSVRTYPE(*WAS51) WASINST(DEPTXYZ) APPSVR(*DEFAULT)
  - Sometimes you may need to end Access for Web so you can make changes, then start it again.
- **Remove Command**
  - The Remove iSeries Access for Web (RMVACCWEB2) command is used to remove the iSeries Access for Web configuration from a web application servers

10
Different Ways to Roll Out Access for Web
- **Create your own 'window' to your system through Access for Web**
  - Add company banners to screens, set up 'click and link' tasks that users can perform, set up macros to simplify user access.
- **Use 'out of the box', but set up predefined functions**
  - You can set up preconfigured 5250 sessions that users (or groups of users) can run, can create predefined database requests for users to run, set up commands users can run, etc.
- **Use Access for Web with the IBM WebSphere Portal solution**
  - A single unified workspace in which your employees, trading partners, and customers can easily find and use the applications and information that they need
- **Use 'out of the box'**
  - Set some policies to limit what functions are accessible to your users, and give them the url address to System i Access for Web.

i want an i.

Different Ways to Roll Out System i Access for Web

20

User can run 5250 application

User is placed in this application

- **The session could be configured to include a macro to put the user directly into a specific application on System i**
    - **Or on a menu screen**

- **Use CHGUSRPRF, LMTCPB=Yes to remove command line from user's screen**

i want an i.

Change look of 5250 session

1. **Default 'web' look**

2. **Changed colors, added keypad at side, changed buttons at bottom to words**

3. **Removed navigation bar, put keypad on top**

4. **Selected 'traditional' view, removed navigation bar**

i want an i.

21

Work with Files in the IFS

- **Navigate and browse the directories located on your System i server integrated file system**
    - **Don't need to map drives**
    - **Don't need to know directory structures**
- **View, upload, and download files**
- **Copy and mail files**
- **Rename and delete files and directories**
- **Zip and unzip files and directories**
- **Edit authorities and change ownership of objects in the integrated file system**

Browse Files - 'Filtered View'

When I click on 'Browse Files', I see only a directory called 'cminer1' and its content

- •**Because the administrator set a 'Default Directory' policy for me**

Actions I can perform:

- •**Subdirectories: Create new ones, Rename, Work with**
- •**Files: Copy, Rename, Delete, Mail, Work with (ie, Zip, Unzip, etc)**

22

Different Ways to Roll Out System i Access for Web

- **Create your own 'window' to your system through System i Access for Web**

- **Use 'out of the box', but set up predefined functions**

- **Use the WebSphere Portal solution**

- **Use 'out of the box'**

i want an i. © 2007 IBM Corporation

Portal Solutions – the next wave in technology

For most organizations, the decision to invest in an enterprise portal is not a question of "if," but "when"?
(Craig Roth, VP META Group, 6/3/03)

WebSphere Portal Offerings for System i

i5 Models 550, 570 and 595

- **Workplace Services Express V2.5 included**
- **WSE has wizards to simplify deployment on IBM i5/OS V5R3 and V5R4**
- **WSE has improved performance and reduces system requirements**
- **WSE enables you to deploy solutions for document management, instant messaging, and portal all on one server**
i5 Model 520

- **Workplace Services Express V2.5 ships with Enterprise Edition**

Note: Depending on the System i, you may also be entitled to services and education vouchers.

  configuration
Other

1. **How do I keep my users from using all these functions?**

2. **How do I set up the environment for my users?**

3. **Should I let my users set have some individual screen settings for some functions?**

You need *SECADM authority to customize profiles

Access for Web uses OS/400 User Profiles

When a System i Access for Web user attempts to access any function on a System i, the following sequence of checks are made to authenticate user access:

- **User profile**
- **Group profile(s)**
- ***PUBLIC**

Note: ***PUBLIC profile is the set of default policy settings shipped with Access for Web**
- **The defaults allow most functions to be available to all users**

The settings in these policies indicate what functions within System i Access for Web, a user can attempt to use.
- **For Example: Let's say you give users full access to the 'Database' tab.**
- **You have Object Level authority set up on your data**
- **When a user attempts to use one of the System i Access for Web Database GUIs to get at the database information, the user will get an i5/OS message indicating they are not authorized to access data**

Customize → Policies

Policies are used to control access to System i Access for Web functions

For example:

- **A Files access policy can be set to Deny or restrict a user or group from accessing the file function.**

- **Policies are saved and associated with the appropriate i5/OS user or group profile.**

- **Each 'Category' expands for granular control**

i want an i. © 2007 IBM Corporation

Policies - customize for all users at once

One alternative…

Use the *PUBLIC group profile and set policies for all users

- **'Deny' functions for all users in a single step**
- **Then 'Allow' specific users access to functions via their User or Group profiles**

Problem:

You're locked out too, until you go in and "Allow" functions to yourself

i want an i. © 2007 IBM Corporation

29

Policies - customize a group of users at once

Another Alternative…

Set up a group profile and add users to that group. Then set policies for that group

- **'Deny' functions for all users in the group in a single step**

Problem:

If you create too many groups, you need to keep track of what policies were set for who.

i want an i.

Set Policy to Default to Specific Directory in IFS

Set a 'Default Directory' for:

- ***PUBLIC**

- **Groups of users**

- **Specific user**

In this example, I went into CMINER1 profile, and set policy to show only the 'CMINER1' directory to this user...

i want an i.

Preferences

Preferences are used to control how functions operate

- **For example, a user can select which columns to display when viewing a the My Folder list**

- **By default, all users can configure their own preferences**

- **Preferences are saved and associated with the user's i5/OS user profile**

i want an i.

How to Start a 5250 Session and save it

Select to 'Start Sesson'

1

- **Provide name of System i you wish to connect to → can be any system in the network**
- **Provide how you want Workstation ID handled**
- **Can check to Bypass additional i5/OS sign-on screen**

n

2

Once you are connected, click on the 'Active' session link to save this session

i want an i.

How to Configure and Save a 5250 Session (continued)

Click on Active Session link

3

- **Click on 'Edit' icon in Actions column**
- **Can set colors, define keypads, etc.**

n

You then save your 'Active' session and give it a name

4

- **Next time you want to start that session, you simply click on 'Configured Sessions'**

How to Give Shortcuts to your Configured Sessions (continued)

Click on Configured Sessions

5

- **On 'Inventory System' select the Action Icon to 'Create Shortcut'**

n

Give access to your Configured Session via Shortcuts

6

- **Add the users, groups of users, or all users (*Profile) whom you want to be able to use this session connection**

User now has access to Configured Session (continued)

User CMINER1

- **Does not have a 'Start Session' link**
- **Has only has 'Configured Sessions' link**
- **Has a Shortcut to a Configured Session created by CMINER**

Policies have been set on CMINER1

- **So that the only Action user can take is to start this session. User cannot:**
  - **Copy, Delete, Rename, Create Another Shortcut, Edit**

iSeries Access for Web

Creating a Macro to use with 5250

1. **Record the Macro**
   - **Start Session and get to the i5/OS sign-on screen**
   - **Go to bottom of screen and start macro record**
   - **Continue recording macro until you have reached spot you want users to come into (ie, i5/OS Main Menu, your own menu, a particular application...)**
   - **Go down to bottom of screen and stop macro recording**
   - **When you get to the save macro screen, select a macro name**

2. **Edit the Macro to bypass sign-on screen**
   - **Go to 'Start Session' and go to bottom of page and select 'My Macros' to work with macro you just created**
   - **Remove your password that was recorded and put in [password], then remove your workstation id and put in [user] in the macro.**
     - **This is documented in 5250 User Interface Help at bottom of 'Configure New Session' page**

i want an i.

Record and Save Your Macro
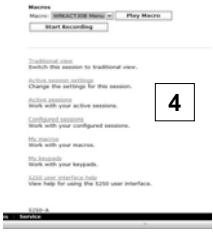

Press Stop Recording when you've reached point you want users to come in at

1

2

Start at i5/OS sign-on screen and click on Start Recording to create your macro

Save Macro

3

Macro: WRKACTJOB Menu

☑ Replace if already exists

Save Macro   Cancel

Then give the Macro a name

Go to bottom of 5250 screen and select to Edit the macro you just created

4
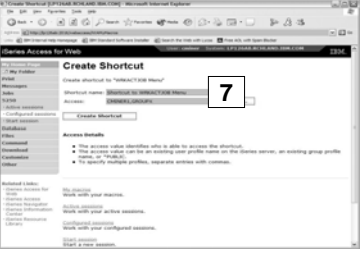

i want an i. © 2007 IBM Corporation

Edit Your Macro and Create A Shortcut for it

My Macros

5

Select Action to Edit your macro

- **Replace your password with [password] and your user id with [user]**
  Then when this runs, the signed on user id and password will be plugged in

Edit Macro

6

Save   Cancel

Create Shortcut

7

- **Go back to My Macro page and section Action to Create Shortcut to your Macros**
- **Add whomever can use this Macro**

i want an i. © 2007 IBM Corporation

35

Add Macro Name to a 5250 Session

8

- **Create a new session via the Start Session link**
- **Under the Macro parameter, the pulldown will have your Macro listed**

OR

- **Select one of your Configured Sessions and add the Macro shortcut**

i want an i.

- **My Folder**
- **Print**
- **Messages**
- **Jobs**
- **5250**
- **Database**
- **Files**
- **Commands**
- **Customize**
- **Downloads**

iSeries Access for Web – Database Functions

Access database tables on your iSeries server with iSeries Access for Web.

Tables
- View a list of database tables on your iSeries server.
- Perform actions on these tables without having knowledge of SQL and its syntax.
- View the contents of a table in a paged list, using the Quick view action.
- Add and update records in a table using the Insert and Update actions.
- Create your own customized SQL request for a table using the Run SQL action.
- Create your own customized copy data request for a table using the Copy data to table action.

My requests
- View a list of previously saved requests.
- Run or Edit requests from this list.
- Manage lists using the Copy, Delete, and Rename actions
- Create and manage shortcuts to requests

Run SQL
- Run SQL statements dynamically.
- View output as a paged list or in a popular file format, like Microsoft Excel or Lotus 1-2-3. (Output format depends on how you have your browser configured and whether the browser can locate a plug-in for the output type you choose.)
- Customize how data is returned by setting options specific to the output type.
- Build SELECT statements using an SQL Wizard.
- Save requests for repeated use.

Copy data to table
- Copy existing data files from your PC to a database table on your iSeries server.
- These data files can be in many popular file formats, including Microsoft Excel and Lotus 1-2-3.
- Replace the contents of a table or add data to an existing table.
- Create a new database table based on the contents of a workstation file.
- Save requests for repeated use.

Import request
- Import Client Access Data Transfer upload and download requests into iSeries Access for Web copy data and SQL requests.
- Imported requests are automatically converted to iSeries Access for Web format.
- Run and edit converted requests on your iSeries server just like other copy data and SQL requests.

Import query
- Import queries generated by Query for iSeries and DB2 UDB for iSeries Query Manager.
- Imported queries can be saved into iSeries Access for Web database requests.
- Run and edit converted queries on your iSeries server just like iSeries Access for Web SQL requests.

Extract server data
- Extract server object information into a database table.

i want an i.

Upload PC Data to DB2 for i5/OS database

- **Upload data from a variety of file types**
  - **Excel, XML, Lotus, etc**
  - **OpenOffice new V5R4**

- **Put into i5/OS database**
  - **'Replace' contents of table**
  - **'Append' to existing data**

- **If no table exists on System i, you will get a wizard to help you create a new table**

- Send a break message to iSeries work stations.

Operator messages
- Display, answer and manage messages in the system operator message queue.

Message queues
- List message queues on the iSeries server.
- Select, display and manage messages in message queues.

- **Display Messages**
- **Send Message**
- **Send Break Message**
- **Operator Messages**
- **Message Queues**

Message Queues

i want an i. © 2007 IBM Corporation

Send Message / Send Break Message

Send Messages
- **Goes to user's 'Display Messages' queue**

Send Break Message
- **Generates an instant message to Sametime users**
- **Sends a Break Message to workstation users** (not iSeries Access for Web 5250 users → goes into QSYS/CMINER message queue)

Add Button
- **Retrieves list of workstation and Sametime users on the server**

Downloads – for file/program distribution

http://<myiseries>/webaccess/iWAPackages

- **Mechanism to distribute files / programs to users**

- **Administrator can create downloads**

- **Management functions included for updating downloads and for controlling access to them**

i want an i.

Example of how you might use this function

Scenario

– **I have some users who need the ODBC driver from System i Access for Windows.**
– **What would be an easy way to make this available?**

n

Solution

– **Use System i Access for Windows to build an install image that contains only the ODBC drive**
– **Use System i Access for Web to enable users to install it on their PCs**

i want an i.

Create Tailored Install Image of ODBC driver

Use System i Access for Windows Tailored Install wizard to capture only the Windows ODBC driver

– **Run CWBINIMG.BAT**
  • **This program is in :\\<mysystemi>\qibm\ProdData \CA400\Express\Install\Image**
– **Then zip up the directory that gets created**

i want an i.

Use the 'Create Download' feature

• **Use Create Download to make a file available for distribution**

• **The file is copied to the server on which System i Access for Web is running**

• **After the download is created, it is added to the Downloads list.**

iSeries Access for Web — User: tlmiller System: LP1Z6AB.RCHLAND.IBM.COM

Name: ODBC Driver V5R4
Description: ODBC Driver
File: Y:\ODBC V5R3.zip   Browse...

Create Download

Create Download Details

• Use Create Download to make a file available for distribution. The file is copied to the server on which iSeries Access for Web is running. After the download is created, it is added to the Downloads list.
• When a download is created, it can only be accessed by the user who created it and by users with *SECADM authority. Use the Work with action from the Downloads list and select the Manage Access link to make the download available to other users.

ODBC now added to Download List

• **When a download is created, it can only be accessed by the user who created it and by users with *SECADM authority**

• **Use the Work with action from the Downloads list and select the Manage Access link to make the download available to other users**

Work With Download options

- **Edit Name and Description**
- **Update File**
  - **The new file will replace the current file that is available for downloading.**
  - **The current file will no longer be available to download.**
- **Delete**
- **Manage Access**
  - **This action enables you to either give or deny access to users.**

Manage Access to New Download File

Set up who can access new download file

- **Deny Access defaults to only the creator of the download can access and manage this download**

- **Now select the users you wish to access it**
  - **Can be All Users (*PUBLIC), groups of users, specific users**
- **Set who else can manage this download**

51

Download and Install ODBC on Desktop

- **If you had originally zipped up the Tailored Install directory using some product like Install Shield's Package For the Web, then it would initiate the install for the end user.**

- **Here it is just a ZIP file, so user would have to unzip and go into directory and start the install by pressing on SETUP.EXE**

V5R4 System i Access for Web Enhancements

Both Servlets and Portlets	Servlets	Portlets
Authentication	**Database**	**Database**
• **Support Single sign-on (SSO) using WAS security model (EIM, LDAP)**	• **Import/run DB2 Query Manager and IBM Query for iSeries queries**	• **iSeries SQL Requests added**
• **5250 Bypass i5/OS sign-on screen**	• **A new output destination of IFS for SQL requests**	• **iSeries SQL Results Viewer added**
Database	• **New option of 'Find' on Tables link**	**Files**
• **Support for OpenOffice Spreadsheet format (.ods)**	**Administration**	• **Zip function added**
5250	• **Can transfer configuration items between i5/OS user profiles**	**iSeries Credentials**
• **Support DDS HTML keywords**	• **Can use WebSphere data source names for database connections**	• **Can change i5/OS password via Access for Web**
• **Display HTTP/HTTPS URL strings as links**	**Files**	
	• **Browse File Share link added**	

i want an i.

Who will benefit from System i Access for Web

• **Any System i customer -- with any hardware model - can quickly get started working in a Web environment with nothing additional to buy**
  – **Use Integrated Web Application Server, use WAS Enablement Feature (V5R4), use WAS Express, or ASF Tomcat**

• **Any System i customer -- with little Web experience - can easily get started working in a Web environment**
  – **Easy to install and configure, no programming skills required**

• **Any System i customer – easy to manage/maintain, no end user training, can extend the power of System i resources to your users**
  – **All built around i5/OS user profiles**
  – **Easy to use GUIs for desktop users**
  – **Uses standard HTML, uses existing HTTP/HTTPS ports**

A great reason to get your System i into the web world

Information is provided "AS IS" without warranty of any kind.

The customer examples described are presented as illustrations of how those customers have used IBM products and the results they may have achieved. Actual
environmental costs and performance characteristics may vary by customer.

Information concerning non-IBM products was obtained from a supplier of these products, published announcement material, or other publicly available sources and does
not constitute an endorsement of such products by IBM. Sources for non-IBM list prices and performance numbers are taken from publicly available information,
including vendor announcements and vendor worldwide homepages. IBM has not tested these products and cannot confirm the accuracy of performance, capability, or
any other claims related to non-IBM products. Questions on the capability of non-IBM products should be addressed to the supplier of those products.

All statements regarding IBM future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Some information addresses anticipated future capabilities. Such information is not intended as a definitive statement of a commitment to specific levels of performance,
function or delivery schedules with respect to any future products. Such commitments are only made in IBM product announcements. The information is presented here
to communicate IBM's current investment and development activities as a good faith effort to help with our customers' future planning.

Performance is based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput or performance that any
user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage
configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput or performance improvements
equivalent to the ratios stated here.

Prices are suggested U.S. list prices and are subject to change without notice. Starting price may not include a hard drive, operating system or other features. Contact
your IBM representative or Business Partner for the most current pricing in your geography.

Photographs shown may be engineering prototypes. Changes may be incorporated in production models.
