

IBM Middleware Available on Linux

IBM Middleware Available on Linux

The IBM Middleware Available on Linux matrix provides information regarding IBM Middleware availability on Linux. You can find information such as:

- Product name and version
- Links to product pages
- Linux distribution and kernel support
- Related sources of additional information: announcement letters, product matrix, download Web sites, FAQs, release notes

Document Options

→ [Where's my product?](#)

Last Update

July 30, 2007

New hardware category: POWER

The IBM Middleware Available on Linux matrix now includes a new inclusive hardware category known as POWER. Linux on POWER includes support for Linux on System i, Linux on System p, Linux on OpenPOWER (System p), and Linux on JS20 blades. Can't find the product that you are looking for under System p or System i? Check under the POWER hardware category. Many products have been reassigned to POWER.

Use the drop-down list below to search the matrix by IBM System and by IBM Brand. You can also view the entire matrix.

IBM System x

Information Management software	Version - Release	Hardware	Kernel/Distribution	Sources
DB2 Administration Client	8.2	System x	Validated Linux Distributions Available for IA32, IA64, AMD64	Available September 17, 2004 Software Announcement 204-185 August 17, 2004 EMEA Software Announcement ZP040370 August 17, 2004 AP Software Announcement AP04-1203 August 17, 2004

Using the IBM Middleware Available on Linux Matrix

The Basics

Use this matrix to find IBM Middleware Available on Linux by IBM Hardware and then by IBM Brand.

Product Name

Where available, the product name is a link to the product's external IBM Web site.

Release or Version

Sometimes several *releases* are available for a product. The most recent *version* is listed first followed by later versions.

IBM Hardware

Important! Check the availability by IBM Hardware.

OpenPower (System p)

Software supported for Red Hat Enterprise Linux 3 Update 3 and later, SUSE Linux Enterprise Server 9 or later on System p, are supported on OpenPower (System p).

Kernel and Distribution

This information is obtained from the software announcements or release information. In the **Data Management** column, if only the kernel levels are given, a distribution that supports that kernel level should supply support. The **Kernel and Distribution** column is good starting place for operating system requirements; an IT specialist can help determine the software and hardware requirements for each IBM Middleware product.

Information Source

A link to the software announcement or release information and a sample one-year license and software maintenance Passport Advantage product number is provided to assist with ordering. IBM offers a variety of licensing methods, contact your IBM sales representative for the appropriate product number for your needs.

Symbols**NEW!**

Represents new information

UPDATED!

Represents updated information such as new distribution support

Distribution Support Terminology**Red Hat Advanced Server 2.1**

Supports Red Hat Enterprise Linux 2.1 Advanced Server (AS), WS, and Enterprise Server (ES)

Red Hat Enterprise Linux

Supports Red Hat Enterprise Linux Advanced Server (AS), WS, and Enterprise Server (ES)

UnitedLinux 1.0

Supports the following distributions (and similarly, a support statement utilizing one of the following listed distributions supports other distributions within the same following list):
Conectiva Linux Enterprise Edition 8, SuSE Linux Enterprise Server 8, TurboLinux Enterprise Server 8

Where's my product?

Where's my product?

If you do not find a particular product in the IBM Middleware Available on Linux matrix, contact your IBM Sales Representative to find out if there is roadmap information pertinent to that product.
