

# IBM Middleware Available on Linux

## IBM Middleware Available on Linux

The IBM Middleware Available on Linux matrix provides information regarding IBM Middleware availability on Linux. You can find information such as:

- Product name and version
- Links to product pages
- Linux distribution and kernel support
- Related sources of additional information: announcement letters, product matrix, download Web sites, FAQs, release notes

## Using the IBM Middleware Available on Linux Matrix

### The Basics

Use this matrix to find IBM Middleware Available on Linux by IBM Hardware and then by IBM Brand.

#### Product Name

Where available, the product name is a link to the product's external IBM Web site.

#### Release or Version

Sometimes several *releases* are available for a product. The most recent *version* is listed first followed by later versions.

#### IBM Hardware

**Important!** Check the availability by IBM Hardware.

#### OpenPower

Software supported for Red Hat Enterprise Linux 3 Update 3 and later, SUSE Linux Enterprise Server 9 or later on pSeries, are supported on OpenPower.

#### Kernel and Distribution

This information is obtained from the software announcements or release information. In the **Data Management** column, if only the kernel levels are given, a distribution that supports that kernel level should supply support. The **Kernel and Distribution** column is good starting place for operating system requirements; an IT specialist can help determine the software and hardware requirements for each IBM Middleware product.

#### Information Source

A link to the software announcement or release information and a sample one-year license and software maintenance Passport Advantage product number is provided to assist with ordering. IBM offers a variety of licensing methods, contact your IBM sales representative for the appropriate product number for your needs.

### Symbols

**NEW!**

Represents new information

**UPDATED!**

Represents updated information such as new distribution support

### Distribution Support Terminology

**Red Hat Advanced Server 2.1**

Supports Red Hat Enterprise Linux 2.1 Advanced Server (AS), WS, and Enterprise Server (ES)

**Red Hat Enterprise Linux**

Supports Red Hat Enterprise Linux Advanced Server (AS), WS, and Enterprise Server (ES)

**UnitedLinux 1.0**

Supports the following distributions (and similarly, a support statement utilizing one of the following listed distributions supports other distributions within the same following list): Conectiva Linux Enterprise Edition 8, SuSE Linux Enterprise Server 8, TurboLinux Enterprise Server 8

## Where's my product?

### Where's my product?

If you do not find a particular product in the IBM Middleware Available on Linux matrix, contact your IBM Sales Representative to find out if there is roadmap information pertinent to that product.

Linux is a registered trademark of Linus Torvalds
