# IBM Global Entrepreneur:

*Teaming with entrepreneurs to build a smarter planet*

## Global market forces are impacting us all

- **Access to capital and credit crunch**
- **Economic downturn and future uncertainty**
- **Globalization and emerging economies**
- **New customer demands and business models**

# The world continues to get a whole lot smarter

## **INSTRUMENTED**

**We can measure, sense and see the exact condition of everything.**

**There are 1 billion transistors for each person on the planet.**

## **INTERCONNECTED**

**People, systems, and objects can communicate and interact with each other in new ways.**

**Almost one third of the world's population will be on the Web by 2011.**

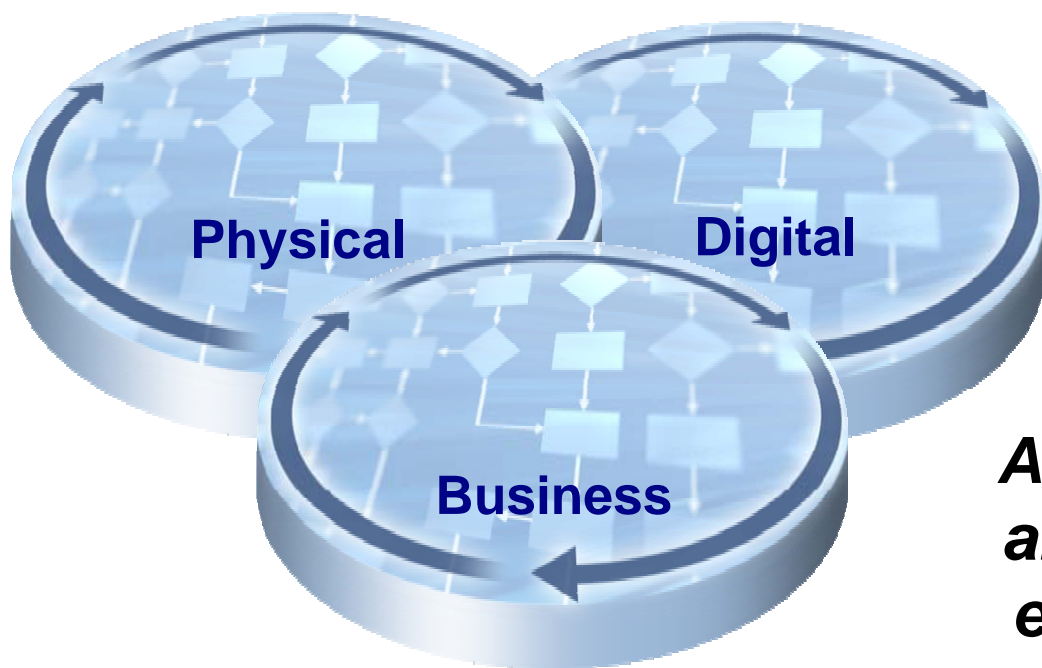

## **INTELLIGENT**

**We can respond to changes quickly and accurately, and get better results by predicting and optimizing for future events.**

**Every day, 15 petabytes of new information is generated – 8x more than in all US libraries**

# A smarter planet holds enormous promise for progress

***An opportunity to think and act in new ways — economically, socially and technically.***

## Entrepreneur's Perspective

## Winner of the Dublin SmartCamp

### What we do?

- Treemetrics has developed a radical new way to measure, monitor and manage forest resources. We are the first to use 3D imagery to measure the quality of the standing forest resource before harvest.

### The problem we solve

- At present, the typical grower or purchaser does not accurately know the quantity or quality of a timber sale until after the trees are harvested. It is estimated that on average worldwide, 20% of the potential value of a forest is lost in this way.

### Since winning SmartCamp:

- State Forestry Company in Ireland became customer, and new projects in Oregon, USA and Australia
- Credibility with customers and the market “If IBM gave you the award, you must be good”
- Interest from VC because ‘part of technical due diligence has been done’
- Attracted \$250k private investment
