IBM Infoprint Manager SAP Clients

Before attempting to install from this CD-ROM, IBM recommends that you access the *Infoprint Manager: SAP R/3 Configuration and Printing Tasks* manual, which is available from the Infoprint Manager Product Library Web site with specific instructions for installing SAP clients.

You can install the Infoprint Manager SAP clients to enable SAP users to send PCL, PostScript, OTF, and ABAP data to either an Infoprint AIX server or an Infoprint Windows server for printing. The SAP clients provide support for your SAP R/3 applications whether they runs on AIX, Windows, HP-UX, or SUN systems.

For current information and release notes, use your Internet browser to view the Infoprint Manager Product Library Web site.

If you are not currently connected to the Internet, you can access the site in the future by visiting **http://www.ibm.com/printers**. From the IBM Printing Systems homepage, follow these steps:

1. Under **Resources**, click **Infoprint Manager**.
2. Under **Products**, click **Infoprint Manager for AIX**.
3. Under **Product Resources**, click **Product Library**.
