IBM Network Color Printer Supplies

Network
PrintingSolutions

IBM® Network Color Printer supplies are engineered specifically to complement IBM's Network Color Printer, combining superior performance with uncompromised color quality.

Protect Your Investment

IBM Network Color Printer supplies and the IBM Network Color Printer work together to produce exceptional image quality and reliable performance at a competitive price. We design and manufacture a full line of printing supplies to meet high-quality standards, thereby optimizing the performance of your printers and delivering exceptional print quality. To achieve the best performance from your IBM Network Color Printer, use genuine IBM toner cartridges, fuser and photoconductor supplies.

Superior Products

IBM Network Color Printer supplies are manufactured within stringent quality control standards. As a result, they provide consistent, superior print quality and are easy to use.

IBM color printer supplies, combined with IBM Network Color Printer hardware, deliver richer looking documents with remarkable images. Whether your documents contain

photographs, graphics, simple spot color or just plain black-and-white text, the IBM Network Color Printer handles them with unmatched color quality at an affordable price.

Environmental Programs

IBM is committed to supporting environmentally-conscious programs, such as recycling or remanufacturing of network printer supplies. We have established a supplies return program as part of our initiative to help the environment. Customer participation in this program assists IBM in optimizing the resources of our planet by allowing us to recycle used IBM supply items. We have established a collection mechanism for used network printer cartridges to promote refurbishing, re-use or recycling. IBM supply item packaging includes environmental program instructions.

Yields

Average yields are established based on a print coverage of 5% per color. These yields are not a warranty or guarantee of minimum life, but are provided to assist in supplies management. Many factors, such

as print coverage per page, paper type and size, printer settings and other environmental conditions, can affect supply life. Printing large quantities of transparencies decreases the fuser's yield life.

Commitment to Quality

When you purchase IBM branded printer supplies, you purchase IBM's commitment to excellence. Our supplies are under warranty for defects in materials and workmanship at the time of shipment and installation. Supplies that do not meet warranty terms can be returned to the purchase location for replacement.

Product Distribution

Order your IBM Network Color Printer supplies through local dealers.

Call the toll free number, 1-888-IBM-PRINT, for local dealer referrals.

IBM Network Color Printer Supplies at a glance
