DB2 Feature licensing

IBM

Version 9.7

Quick Start Guide

This guide gets you started with a typical installation for IBM DB2 Version 9.7 features.

National Language Version: To obtain the Quick Start Guide in other languages, see the PDF and HTML versions on the Quick Start and Activation CD.

Product Overview

This guide applies to the following IBM DB2 features:
- DB2 Advanced Access Control Feature
- DB2 Geodetic Data Management Feature
- DB2 High Availability for Express Edition
- IBM Homogeneous Replication Feature for DB2 Enterprise Server Edition
- DB2 Performance Optimization Feature for Enterprise Server Edition
- DB2 Storage Optimization Feature

1 Step 1: Access your software

To access the product images, see the download document: http://www.ibm.com/support/docview.wss?&uid=swg21378087

2 Step 2: Access your documentation

Information for the DB2 features is available from the DB2 Information Center: http://publib.boulder.ibm.com/infocenter/db2luw/v9r7/index.jsp.

3 Step 3: Install DB2 features

All DB2 features, except *IBM DB2 Performance Optimization Feature for Enterprise Server Edition*, are installed with certain DB2 database products, and only require license activation. Following are the installation steps for *IBM DB2 Performance Optimization Feature for Enterprise Server Edition*:
  1. Ensure that the target computers meet the prerequisites for DB2 database products described here: http://publib.boulder.ibm.com/infocenter/db2luw/v9r7/topic/com.ibm.db2.luw.qb.server.doc/doc/r0025127.html.
  2. Launch the install wizard using the instructions provided in the DB2 installation documentation. For instructions on installing DB2 Performance Expert, follow the instructions in the Quick Start Guide for that product.

4 Step 4: Read the license terms

Make sure that you understand and agree to the license conditions on the Quick Start and Activation CD before you register the license key. The license terms are located on the Quick Start and Activation CDs in the /db2/license/Windows directory on Windows operating systems or the /db2/license/UNIX directory on the Linux and UNIX operating systems.

5 | Step 5: Register the license key

You can register the license key by using the **db2licm** command or from the License Center (on Windows and Linux operating systems only).

- To register the license key using the **db2licm** command from the command line:
  - On Windows operating systems, enter the **db2licm** command:

    ```
    db2licm -a x:\db2\license\<license_filename.lic>
    ```

    where x: represents the CD drive that contains the DB2 database product Quick Start and Activation CD and `<license_filename.lic>` represents the name of the license key file.
  - On Linux or UNIX operating systems, enter the **db2licm** command:

    ```
    db2licm -a  /cdrom/db2/license/<license_filename.lic>
    ```

    where `<license_filename.lic>` represents the name of the license key file for the product.
- To register the license key from the License Center:
  1. Start the DB2 Control Center, and select **License Center** from the **Tools** menu
  2. Select the system and installed product for which you are registering a license
  3. Select **Add** from the **License** menu
  4. In the Add License window, select the directory containing the license file
  5. Select the license file, and click **OK**

6 | Step 6: Install the documentation

You can install the DB2 solution documentation on any Windows or Linux computer in your environment.

To keep your locally installed information center up to date, apply the information center updates: http://publib.boulder.ibm.com/infocenter/db2luw/v9r7/index.jsp?topic=/com.ibm.db2.luw.common.doc/doc/t0008271.html
