

The Lotus logo is displayed in white serif font on a black rectangular background. The background of the entire advertisement features a stylized, abstract landscape with a blue river or path winding through green hills, all contained within a large, semi-transparent blue and red circular shape that resembles a globe or a lens. The overall color palette is dominated by yellow, blue, green, and red.

Mobile Notes Powered by Domino Everyplace

KEY FEATURES AND BENEFITS

- **Conduct business wherever business takes you.** Mobile Notes™ with Domino Everyplace provides access to your e-mail, calendar, directories and Domino-based applications from your favorite handheld devices such as PDAs and WAP phones.
- **Familiar Notes functionality.** Leverage the familiar environment and functionality of Mobile Notes to mobile workers and increase productivity on the road while reducing training costs.
- **Increased efficiency and improved productivity.** Users can collaborate anywhere to keep workflow moving, exploit idle time while traveling and reduce the time needed to resolve customer problems.
- **Mobile Notes applications.** Quickly extend Domino e-business applications to handheld devices via easy-to-use development tools and the power of Domino Designer. Maximize your investment in Lotus® Domino technology and applications by rolling out your Mobile Notes applications to everyone, near and far.

Extend the Functionality of Notes® and Domino™ to Industry-leading Mobile and Wireless Devices.

As the wireless world expands, making time-sensitive information available to mobile workers via handheld devices is becoming a competitive necessity. Mobile Notes extends the value of Lotus Notes and Domino to provide anytime, anywhere access to critical business information from industry-leading wireless devices such as PDAs and WAP phones.

Mobile Notes means anytime, anywhere access to Notes and Domino through various means. You simply decide what you need, choose the appropriate Domino Everyplace product, and experience Mobile Notes on the device of your choice.

Mobile Notes Everyplace You Go

Mobile Notes in its various forms is delivered by the appropriate Domino Everyplace product:

- For devices equipped with WAP micro-browsers, use the Domino Everyplace Access product.

- For handheld computing devices, use the Domino Everyplace Enterprise product.

Whichever type of device you choose, Domino Everyplace and Mobile Notes makes it possible to respond to customers, process sales orders, enter expense reports or collaborate with partners any time, any place, on any device. No matter which Domino Everyplace server you choose, Mobile Notes provides seamless access to Domino-based information from handheld devices.

Mobile Notes lets you reduce the need to carry a laptop and remain productive while away from the office. By using your mobile device you can gain access to key enterprise data via Mobile Notes and the power of Domino collaboration. This lets you stay connected to customers, business partners and colleagues wherever you happen to be.

FEATURES OVERVIEW

Mobile Notes and Domino Everyplace Access.

Domino Everyplace Access extends the value of Domino e-collaborative services to WAP devices. It provides secure, interactive, anytime/anywhere access to critical business information including Domino-based e-mail, calendar, directory and Domino applications.

The Mobile Notes user interface — delivered to WAP devices by Domino Everyplace Access — lets you move beyond wireless e-mail into full service PIM (personal information management) capabilities and access to business applications. Mobile Notes lets you use applications such as sales force automation, field service, and customer relationship management anytime, anywhere.

The Mobile Notes user interface and Domino Everyplace Access work together to offer convenient Notes-like functionality and unified access to the Notes inbox from multiple clients. A mobile portal, which you can personalize and customize, ensures quick access to key enterprise applications and e-mail, calendar and directories. Familiar views and reply options let you work efficiently while on the go. A feature designed for the mobile user to view full or brief memos makes it more convenient and easier to view only the data that's needed.

Mobile Notes and Domino Everyplace Enterprise.

Domino Everyplace Enterprise server lets organizations provide both wireless and wired synchronization solutions to mobile workers quickly and easily by leveraging the collaboration power of Domino. The Domino Everyplace Enterprise offering includes the Mobile Notes client software. The Mobile Notes client can be installed on handheld computing devices and can deliver Lotus Notes application functionality to a variety of popular handheld devices. Easy to set up, deploy and administer, Domino Everyplace Enterprise is a powerful solution for the mobile workforce.

Mobile Notes provides access to your e-mail, calendar, directories and Domino-based applications from your favorite devices such as PDAs and WAP phones.

Domino Everyplace Enterprise has three major components: synchronization services for Domino, an application development tool and the Mobile Notes client. The synchronization services — based on industry standards such as XML and SyncML — enable mobile workers to work off-line and synchronize applications and data between Domino servers and PDAs, regardless of the type of connectivity. The application development tool lets you easily and securely create custom mobile applications that connect to your Domino enterprise data from mobile and wireless devices, including those on the PalmOS, Pocket PC and EPOC platforms. This development tool builds a mobile application framework to rapidly extend Domino-based business applications or create new applications for PDAs using Lotus' flagship development environment, Domino Designer.

How to Get Started.

The Lotus Wireless Solutions Portfolio, available from Lotus Professional Services (LPS) worldwide, includes a wide range of offerings that make it easy to start implementing your Domino Everyplace business strategy and infrastructure. These modular-based offerings range from Strategy and Awareness seminars that help you understand the technology and define your wireless business strategy, to Pilot programs with everything you need to get a wireless pilot up and running quickly, to full-scale mobile application development and deployment.

For More Information.
