

zSeries Application Development Web – Teleconference Education

Are you looking for a way to get the latest technical information for IBM z/OS® application development software and tool updates?

IBM is offering four free tele-web events during the month of April covering the following hot topics:

- *CICS® Version Migration Considerations & Tools*
- *Fault Analysis for WAS zSeries applications*
- *COBOL modernization*
- *Enhance On-Line CICS Monitoring with Historical Reports*

These special education sessions are targeted for application developers and managers looking for an advanced technical level of information. Below is the detailed description of each teleconference and the date it will be available.

CICS Version Migration Considerations & Tools

April 6 2005, 1:00PM Eastern Daylight Time

CICS and Hursely Lab experts will present an update on the new CICS V3.1 benefits, discuss reasons to migrate and introduce tools that will assist in migration efforts and in modernizing legacy applications. Learn how you can start taking advantage of the latest CICS enhancements.

Fault Analysis for WAS zSeries Applications

April 7 2005, 1:00PM Eastern Daylight Time

Simplify problem determination for WAS zSeries applications. Learn how to quickly determine the

reasons for WAS zSeries application abends using dump analysis information.

COBOL Modernization

April 13 2005, 1:00PM Eastern Daylight Time

As customers upgrade and migrate to the latest releases of DB2®, IMS™ and CICS they are required to have their COBOL applications conform with LE COBOL. Join this teleconference and learn how to do this without the labored time it takes to rewrite code by using Debug Tools Utilities Advanced Functions V5 (DTUAF V5).

Enhance On-Line CICS Monitoring with Historical Reports

April 14 2005, 1:00PM Eastern Daylight Time

Learn how to improve your transaction response times and CICS system resource usage and enable capacity planning for high availability. Join us for an in depth technical product overview of CICS Performance Analyzer by Chris Baker, Senior Software Engineer, CICS/390 Development group, IBM Hursely Laboratory.

Register online right now

We hope you can join us for these valuable teleconferences. To register, please log on to ibm.com/software/zseries/telecon/adseries

For questions regarding these events please contact Pamela Baron at 732-926-2072 or pbaron@us.ibm.com.
