

ODBC Drivers - Workstation

Overview These instructions explain how to install the optional ODBC database drivers for GENTRAN:Server Workstation. They are a supplement to the *GENTRAN:Server Workstation Installation Instructions*, and the *GENTRAN:Server for UNIX ODBC Drivers Setup Guide*. Please refer to those guides for system requirements and all other installation information for GENTRAN:Server Workstation 6.0.

Installing the ODBC Drivers on the Workstation

Introduction To install the optional ODBC database drivers, you run the Windows program *setup.exe* from the Workstation ODBC Drivers installation CD.

Before you begin You must first install the core GENTRAN:Server Workstation software before you can install the optional ODBC database drivers. See "How to Install the GENTRAN:Server Workstation" in the *GENTRAN:Server Workstation Installation Instructions*.

What you need You need the following to install the ODBC database drivers on the Workstation:

- ▶ Workstation ODBC Drivers installation CD
- ▶ Workstation ODBC Drivers serial number

Procedure Use this procedure to install the optional ODBC database drivers on the Workstation.

Step	Action
1	Close all programs running on your computer.
2	Insert the Workstation ODBC Drivers installation CD into the CD-ROM drive of the Windows computer. (Continued on next page)

9999-600-INST03-0000

(Contd) Step	Action
3	<p>Did the installation program start automatically and display the Welcome dialog box?</p> <ul style="list-style-type: none"> ▶ If YES, GO TO Step 5. ▶ If NO, continue to next step.
4	<p>Select Run from the Start menu. In the Run dialog box, enter the following command where <drive> represents the letter assigned to the CD-ROM drive, then click OK.</p> <p>Example <drive>:\setup</p> <p>System Response Setup displays the Welcome dialog box.</p>
5	<p>Click Next to continue.</p> <p>System Response Setup displays the GENTRAN:Server 6.0 License agreement dialog box.</p>
6	<p>Click Yes to accept the license agreement and continue installation of the ODBC database drivers.</p> <p>System Response Setup displays the Registration dialog box.</p>
7	<p>Enter your name, company, and the Workstation ODBC Drivers serial number. Click Next.</p> <p>Note You must complete all three fields to continue with the installation of the ODBC database drivers.</p> <p>System Response Setup displays the Choose Destination Location dialog box.</p>
8	<p>Is the directory displayed in Destination Folder the directory in which GENTRAN:Server Workstation was installed?</p> <ul style="list-style-type: none"> ▶ If YES, GO TO Step 10. ▶ If NO, continue with the next step. <p style="text-align: right;">(Continued on next page)</p>

(Contd) Step	Action
9	<p>Click Browse and select the directory in which GENTRAN:Server Workstation was installed, and click OK.</p> <p>Note You <i>must</i> specify the same Destination Folder for the ODBC Drivers as the one in which GENTRAN:Server Workstation was installed.</p>
10	<p>Click Next.</p> <p>System Response Setup displays the Check Setup Information dialog.</p>
11	<p>Are the displayed current settings correct?</p> <ul style="list-style-type: none"> ▶ If YES, click Next to continue. ▶ If NO, click Back until you find the dialog you must change. Make your changes, then click Next until you return to the Check Setup Information dialog box. Click Next to continue. <p>System Response Setup displays progress information as it installs the software. When finished, it displays the Setup Complete dialog.</p>
12	<p>Do you want to let Setup restart the computer now?</p> <ul style="list-style-type: none"> ▶ If YES, click Yes and remove any disks from the disk drive. ▶ If NO, click No.
13	<p>Click Finish to complete setup.</p>
