Connect:Direct Browser User Interface Version 1.4.02 Maintenance Updates

This document supplements Connect:Direct Browser User Interface version 1.4 documentation. It describes the issues resolved in the Connect:Direct Browser User Interface version 1.4 release.

Maintenance Updates in Version 1.4.00

The following table lists the issues resolved for Connect:Direct Browser User Interface version 1.4.00. Connect:Direct Browser User Interface version 1.4.00 contains all maintenance fixes that were applied to previous versions of Connect:Direct Browser User Interface.

SR Number	Explanation
1319742	The underscore character (_) is not allowed in Process names.

Maintenance Updates in Version 1.4.02

The following table lists the issues resolved for Connect:Direct Browser User Interface version 1.4.02.

SR Number	Explanation
1343786	The French translation has JavaScript errors.
1344396	The keycert password in the system property file is not correctly encrypted and decrypted.
1344602	Passwords are not visible using View Source in the Configuration/Security tab. The trace file does not show clear text passwords. The Web.xml file now restricts browsing to property and trace files.

SR Number	Explanation
1345138	Browser User Interface does not have the ability to define three user authority values for the Connect:Direct Windows Copy statement, including upload and download, inherit rights, and trustee assign, and a problem occurred when using double quotes with ACL updates.
1342288	When launching Connect:Direct Browser User Interface from Connect Control Center, the User ID and password are displayed in clear text.
1342899	Could not process a file name containing a space, when defined in the copy statement.
