Connect:Enterprise UNIX Version 2.3.00 Maintenance Updates

The *Connect:Enterprise UNIX Version 2.3.00 Maintenance Updates* document supplements Connect:Enterprise version 2.3 documentation. This document describes the issues resolved in the Connect:Enterprise version 2.3 release.

Maintenance Updates in Version 2.3.00

The following table lists the issues resolved for Connect:Enterprise UNIX version 2.3.00. Connect:Enterprise UNIX version 2.3.00 contains all maintenance fixes that were applied to previous versions of Connect:Enterprise UNIX.

SR Number	Description
1171488	Reverse lookup failure during an FTP session causes Connect:Enterprise to delay.
1208625	The parser for the RSD files was not checking for overflow on the data structure used to hold the async script.
1221597	AS2 batches not sent if the HTTP daemon runs on a non-synchronized server.
1236194	When using the BCHSEP=OPT4 option, duplicate autoconnects extract the same batch, even if the batch number is specified.
1238460	Zmodem transfers tagged incomplete after last block of data is acknowledged.
1241034	Autoconnect sessions remain in pending status.
1243646	Using a default of "none" for mbxacl.conf does not prevent an FTP listing.
1244835	Misleading error message in the auth.log file for login failure.
1245697	The cmureport -srcd reports end time/date of 12/31/1969.
1256456	File Agent core dump occurs when a file with special characters is added to staging directory.
1259598	Cannot delete an AS2 contract that contains spaces in the name.

SR Number	Description
1261406	The autoconnect control channel times out at end of an incoming batch transmission and leaves the batch incomplete.
1263948	No descriptions in documentation for different AS2 files.
1264336	An AS2 configuration saved by the Site Administration user interface may cause the EDIINT daemon to fail.
1269694	The cmureport -v command does not filter on selected remote connections.
1270105	The FTP daemon core dumps if no user and password is entered by the remote user.
1271920	SSH clients allowed to move up a directory and place files in a new mailbox.
1272070	Slow performance when uploading or downloading multiple files in one session.
1272317	Batch Receive Informer is not able to sort batches based on *.test. It can only sort by test.*
1274157	Error message signaling a host key change was unclear.
1274175	Handshake fails between the SSH Client and Connect:Enterprise.
1275184	POSTSEND command fails when sending to Microsoft IIS.
1277053	An autoconnect receives a 500 response on transmission, but still marks the batch as transmitted.
1279978	Upgrade fails from nonsecure Connect:Enterprise version 1.3.02 to nonsecure Connect:Enterprise version 2.2.00.
1282247	Unable to use the backslash or single quote in the ACD and RSD REMOTEFILENAME and POSTSEND parameters.
1286312	SSH FTP autoconnect cannot overwrite target read-only file, but flags the batch as transmitted.
1289849	Autoconnect does not retry when an FTP Error 1800 is received.
1294021	The cmuadd utility returns code 0 when the user is not permitted to add a batch.
1294032	Connect:Enterprise utilities return code 10 when product is shut down.
1294793	The T flag is not set when SFTP (SSH) extracts a batch using the Cuteftp software.
1295007	The cmuadd utility returns code 0 when the user has exceeded maxbatchno parameter.
1297639	The -t and -T parameters do not work in the startup script with cmusshftpd.
1298570	Core dump occurs when running ssh-rand-helper -d.
1301286	Cannot upgrade Connect:Enterprise running on Sun Solaris, HP-UX, or AIX to Linux.
1309332	Security exit receives wrong protocol value when a user logs in using SSH.
1315021	The cmureport detail report is filtered, but lists all accounts.
1315077	Site Administration user interface does not allow a "NULL" value for DATAFORMAT.
1315342	After navigating through FTP proxies, the user login is sent with the FTP server port.

SR Number	Description
1315395	Remote information log records do not contain the protocol field.
1316302	Autoconnect daemon initialization times out while registering the async daemon.
1316505	Redirecting stderr to /dev/null on cmuextract fails in version 2.2.00.
1317589	The ceupassencrypt command changes PASSWORDAUTH=YES/NO parameter in the SSH FTP RSD file.
1321307	File Agent fails during an API add of large files.
1326224	AS2 autoconnects hang when remote site does not respond.
1332446	Failures sending data to the MQ interface are not reported.
1332994	The SSH daemon core dumps.
1338898	Good MDNs are rejected.
1338956	Connect:Enterprise does not accept transfers from the ssh.com sftp2 client.
1338974	The cmuauthd core dumps when the remote ID is longer than 64 characters.
1339338	The cmureport utility does not find autoconnects with names larger than 8 characters.
1339496	AS2 transmissions fail during the weekend.
1339640	Site Administration user interface can only display 25,000 accounts.
1339702	Incomplete batches not reported back to Connect Control Center.
1340328	Third-party network monitors flag Connect:Enterprise SSH.
1340413	AS2 MDNs are not re-sent when duplicate payload is received.
1340622	Certificate validation fails on a bad common name.
1342578	System hangs when using the Log exit.
1342940	AS2 autoconnect and MDN are not retried when a failure (500 error) occurs.
1344055	Mailbox child processes cannot add more than 1000 files in one session.
1344107	Login problem occurs when running SSH is running as root on AIX.
1344714	Connect:Enterprise logs failure and requeues an asynchronous MDN if 204 (Positive) response is received from the trading partner.
