Monitor Resource Change Events

Application enables you to monitor changes to many of the Application resources. Events are generated each time a resource is modified and the events are stored in the ADMIN_AUDIT table. If you need to find out who modified a resource, or what time the resources was modified, you can check generate an Admin Audit Report (refer to Admin Audit Report).

The following Application resources events are currently being monitored:

- ◆ Business Process
- ◆ Envelope
- ◆ Contract
- ◆ Group
- ◆ Map
- ◆ Map Extended rule object
- ◆ Mailbox
- ◆ Mailbox routing rule
- ◆ Permission
- ◆ Schedule
- ◆ Service/adaptor
- ◆ User account

Events are captured every time a resource is:

- ◆ Created
- ◆ Updated
- ◆ Deleted

Admin Audit Report Example

The following is an example of an Admin Audit report:

Admin-Audit Report					
Created On:	10/02/2006 11:06:33 AM				
Created By:	admin				
Report By:	Resource Type				
Report Config:	BP				
Filters:	Time From:	09/29/2006 10:53:15 PM			
	Time To:	10/02/2006 10:53:15 AM			
Resource Type	Time	Principal	Action Type	Action Value	Resource Name
Business Process					
	10/02/2006 10:45:21 AM	admin	Create Version	1:See audit	TestBP
	10/02/2006 10:47:37 AM	admin	Create Version	1:Report Schedule BP	AdminAuditByObjectType_ScheduleBP
Schedule					
	10/02/2006 10:47:42 AM		Create Name	AdminAuditByObjectType_ScheduleBP	AdminAuditByObjectType_ScheduleBP
Summary					
Grand Total Count: 3
