

B2B Standards and Sterling Integrator

Preloads and Manual Addition

Sterling Integrator supports a wide range of B2B standards. Many are preloaded with the Map Editor, and an even larger number of standards can be imported or manually added. The following table explains the differences between these approaches.

	Usage	Updates	Support
Preloaded standards	Available for use “out of the box,” allowing customers to quickly create maps.	Provided by Sterling Commerce. Target for EDI and financial standards: 3 months before "go live" or version deprecation date.	Standard customer support is available.
Imported or manually added	Customers can import other XML schema or manually create maps based on published specifications.	The customer is responsible for monitoring and implementing changes.	Available for the functions used to import the schema or create the map.

Information on Preloaded Standards – 3Q2010 (Standards Library v.6.2)

Values in the *Product* column indicate the following:

- Supply Chain – default standards available with the Sterling Integrator product.
- FinSrv – financial standards available with Multi-Enterprise Financial Gateway and Sterling Total Payments
- HIPAA – Level 1-6 compliance, provided through the Sterling Integrator HIPAA Adapter
- RosettaNet – standards available with the RosettaNet adapter

Values in the *SCM* column indicate standards that are supported by Sterling Community Manager, available with Sterling Integrator version 5.0 and following.

Sterling Integrator Preloaded Standard	Product	SCM	Format	Supported Versions
ACH CCD	FinSrv		EDI	2007 – 2009 (no changes in 2010)
ACH CCD+	FinSrv		EDI	2007 – 2009 (no changes in 2010)
ACH CTX	FinSrv		EDI	2007 – 2009 (no changes in 2010)
ASC X12	Supply Chain	✓	EDI	2001 - 6010
