
RosettaNet Profile Service

Caution: This is an internal service that should not be used externally for steps in creating business processes because it is subject to change without notice, and its use may cause unpredictable results and loss of data. This section is intended for information purposes only.

The following table provides an overview of the RosettaNet Profile service:

System name	RNProfile
Graphical Process Modeler (GPM) categories	All Services, Internet B2B > RosettaNet
Description	<p>Loads the standard trading profile data as well as RosettaNet Profile data from the configured application contracts. The data is retrieved from the database and serialized as XML. The XML is returned and can be mapped into process data.</p> <p>The RosettaNet Message Sending service locates the business process definition name of the HTTP Async transport business process, based on the production trading profile.</p>
Business usage	Used by a RosettaNet PIP process to load the RosettaNet PIP contract profile information.
Usage example	Runs as part of a RosettaNet PIP business process.
Preconfigured?	Yes
Requires third party files?	No
Platform availability	All supported application platforms
Related services	No
Application requirements	No
Initiates business processes?	No
Invocation	Runs as part of a RosettaNet PIP business process.
Business process context considerations	No
Returned status values	<ul style="list-style-type: none"> ◆ Success – RosettaNet PIP contract lookup succeeded ◆ Error – RosettaNet PIP contract lookup failed, the contract could not be found
Restrictions	No
Testing considerations	Turn on the RosettaNet logger to see debug messages.
