Enable Sterling B2B Integrator for Monitoring by Sterling Control Center	4		

IBM Sterling Control Center

Sterling Control Center is a system management solution for managing file transfer activity across multiple instances of IBM® Sterling Connect:Direct®, IBM Sterling Connect:Enterprise®, and/or IBM Sterling B2B Integrator.

Sterling Control Center can monitor several servers running different products and platforms. You can also monitor Sterling B2B Integrator using Sterling Control Center.

Sterling Control Center provides centralized monitoring, management for improved quality of service, and better compliance with service level agreements (SLAs).

Sterling Control Center provides enterprise-wide monitoring and management of IBM solutions, including:

- Monitoring of data transfer activities, adapter status, and perimeter server status
- Environment information such as operating system, database type, JDK, and license information
- Alert and event notification, including business process or file transfer failure
- Centralized auditing and reporting
- Centralized administration and configuration
- Monitoring quality of service using service level criteria (SLC)
- License management

The benefits of using Sterling Control Center include:

- Lower operating costs by preventing downstream process interruptions and SLA penalties
- Detection of minor processing exceptions to prevent business problems
- Improved service levels and business relationships by ensuring critical processing windows are met
- Elevation of alerts to ESM tools such as Tivoli, HP OpenView, and BMC Patrol
- Optimized processing across the network
- Reports generated from consolidated log data

Sterling Control Center Components

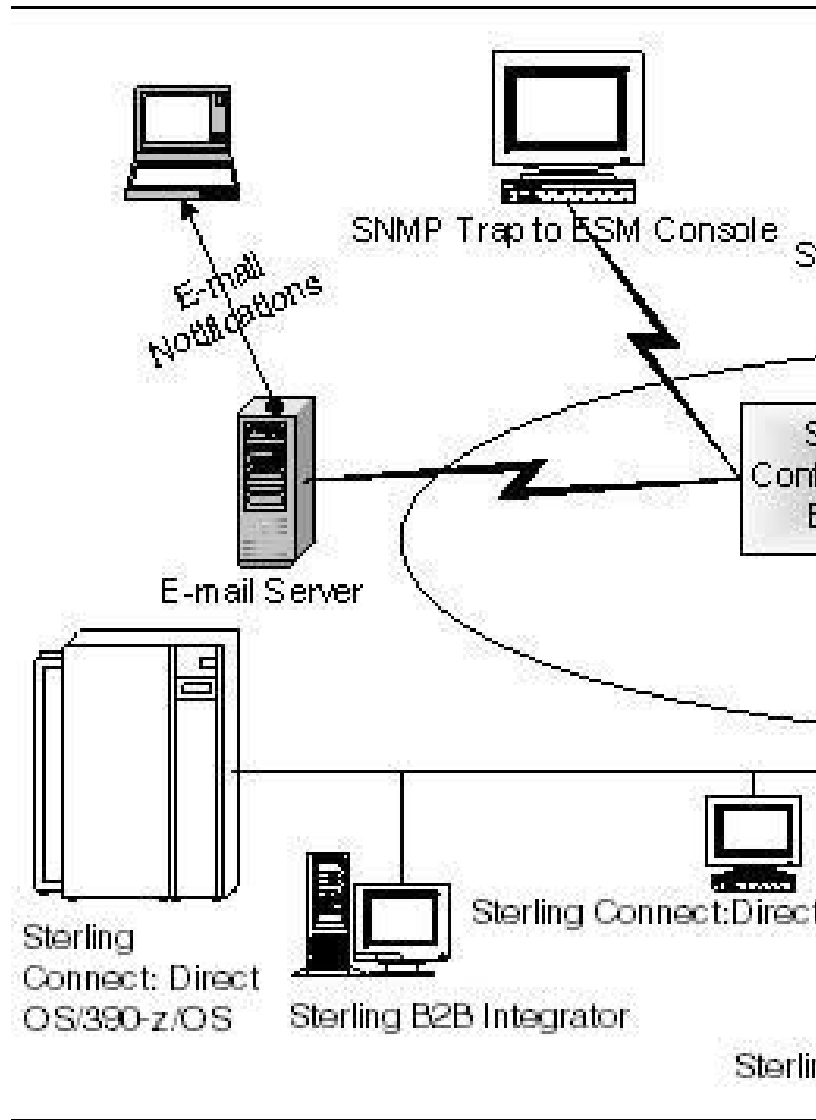

Sterling Control Center is a Java-based application that consists of three components:

- An engine that is installed on a network computer. This engine includes the modules that create and define rules, actions, SLCs, and Sterling Control Center configuration information.
- A relational database that stores statistics information from managed Sterling Connect:Enterprise, Sterling Connect:Direct, and Sterling B2B Integrator servers. This information is used by Sterling Control Center for server monitoring. Sterling Control Center supports MySQL, IBM DB2®, Oracle®, and Microsoft SQL Server™ databases.

- A graphical user interface (GUI) that can be installed on the same computer where the engine is installed, or on a remote computer. The GUI visually shows processing activity and enables you to perform Sterling Control Center administration activities.

The engine and GUI can be installed on computers with different operating systems. See *Sterling Control Center Release Notes* for system requirements.

The following figure illustrates a Sterling Control Center environment:

Enable Sterling B2B Integrator for Monitoring by Sterling Control Center

About this task

An instance of the Sterling Control Center service is enabled by default when you install Sterling B2B Integrator. You must configure Web services to use this service.

Note: If you are running Sterling B2B Integrator in a vertical cluster environment, you can configure only one Web service. However, if you are running Sterling B2B Integrator in a horizontal cluster environment, you can configure one Web service for each available IP address.

Note: If you are using a cluster, a new SOA HTTP server adapter is required for each node beyond node 1. Copy the SOA HTTP server adapter assigned to node 1 and update the perimeter server name to match the node number.

To enable monitoring of Sterling B2B Integrator by Sterling Control Center:

Procedure

1. From the **Administration** menu, select **Deployment > Web Services > Manager**.
2. In the Web Services Management page, under **Create**, next to **Create a Web Service Configuration**, click **Go!**
3. In the Web Service: Name page that is displayed, enter **SCCInteropService** as the name and enter a description that will help you identify the version of the Web service.
4. Click **Next**.
5. In the SOAP Transport Binding Settings page that is displayed, click **Next**.
6. In the Request Security Settings page that is displayed, click **Next**.
7. In the Response Security Settings page that is displayed, click **Next**.
8. In the Assign any Business Processes page that is displayed, click **Next**.
9. In the Assign Service Instances page that is displayed, select **Sterling Control Center Service**. Move the service instance to the **Selected** tab by clicking on the right arrow button that is displayed.
10. Click **Next**.
11. In the Assign Consumers page that is displayed, select the users to monitor Sterling B2B Integrator from Sterling Control Center. Move the selected users to the Selected tab by clicking on the right arrow button that is displayed.
12. Click **Next**.
13. In the Reliability Settings page that is displayed, select the required checkbox. (optional)
14. Click **Next**.
15. In the WS-I Basic profile 1.1 Conformance Settings page that is displayed, select the required checkbox. (optional)
16. Click **Next**.
17. In the Attachment Settings that is displayed, select the checkbox next to **Output Attachment**.
18. Click **Next**.
19. In the Confirm page that is displayed, review the settings, and click **Finish**.

20. Remember your Web service base URL, Sterling B2B Integrator user ID, and password. These must be entered into Sterling Control Center during configuration. Additionally, remember the Sterling B2B Integrator port number. You will need to specify it in Sterling Control Center.

Results

Sterling B2B Integrator is now ready for monitoring by Sterling Control Center.

Notices

This information was developed for products and services offered in the U.S.A.

IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not grant you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing

Such information may be available, subject to appropriate terms and conditions, including in some cases, payment of a fee.

The licensed program described in this document and all licensed material available for it are provided by IBM under terms of the IBM Customer Agreement, IBM International Program License Agreement or any equivalent agreement between us.

Any performance data contained herein was determined in a controlled environment. Therefore, the results obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

Information concerning non-IBM products was obtained from the suppliers of those products, their published announcements or other publicly available sources. IBM has not tested those products and cannot confirm the accuracy of performance, compatibility or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

All statements regarding IBM's future direction or intent are subject to change or withdrawal without notice, and represent goals and objectives only.

All IBM prices shown are IBM's suggested retail prices, are current and are subject to change without notice. Dealer prices may vary.

This information is for planning purposes only. The information herein is subject to change before the products described become available.

This information contains examples of data and reports used in daily business operations. To illustrate them as completely as possible, the examples include the names of individuals, companies, brands, and products. All of these names are fictitious and any similarity to the names and addresses used by an actual business enterprise is entirely coincidental.
