Bidetime LTD
Healthcare Performance Pack

IBM

Solution Description

Every healthcare organization must prioritize service delivery to their patients while, at the same time, optimize resources and meet regulatory targets. Bidetime Healthcare Performance Pack allows healthcare organizations to plan, analyze and report to stakeholders and management on all key aspects of their service delivery. This includes waiting lists, long stays, bed blocking, revenues, and predicted surplus/deficit.

Features & Benefits

* Finance and management can avoid end-of-year deficits by iteratively planning demand, forecasting revenue and calculating surplus/deficit throughout the year

* Clinicians and management can better manage scarce resources through daily monitoring and analysis of bed states, theatres, radiology, etc.

* Information services and management can automate the production of standard regulatory and management reports, allowing more time for analyzing results and planning appropriate action

* The solution features monitoring, analysis, and reporting capabilities on any aspect of the healthcare organization including workforce, pharmacology, radiology, A&E, and financials

Value Proposition

The Bidetime Healthcare Performance Management framework layer extracts and transforms data from common patient administration systems, electronic patient record systems and clinical systems supplied by companies (e.g., iSoft, Cerner, and McKesson). The solution monitors analyzes and reports on any aspect of the healthcare.

Company Description

Bidetime specializes in the development and delivery of Information Systems for the Healthcare sector. Our aim is to help our clients manage, analyze and deploy information as efficiently and painlessly as possible. Our solutions give you control over the delivery of your information by using market-leading software and industry-standard techniques.
