

Cobrasonic Software, Inc.

DB Sonar

Solution Description

DBSonar continuously monitors database systems for potential problems and vulnerabilities. It provides alerts so that problems are solved before they impact end-users. The solution presents analysis and suggestions with real-time and historical resource consumption data, allowing informed decisions to be made regarding exceptions or planning resources. DBSonar's SQL convergence and drill-down techniques with cross-linked association of data help debug performance issues with ease.

Features & Benefits

- Automated event notifications: DBSonar monitors database systems for abnormal conditions and issues alerts whenever potential problems are found.
- Real-time performance monitoring utilizes dashboards, providing real-time views of system performance metrics. Immediate detection of bottlenecks and signs of performance deviations are quickly determined.
- DBSonar's drill-down analysis technique enables discovery of the root cause of a problem. Deviations are easily detailed with a simple right-click.
- Performance analysis reports provide health check reports which summarize database efficiency.
- DBSonar's SQL Convergence technology enables extraction of SQL skeleton from millions of highly similar SQL statements, and isolation of problematic SQL.

Value Proposition

DBSonar is designed to keep the production environment and data secure, while providing 24x7 monitoring services. It effectively manages risk by employing SQL convergence and cross-linked associations along with the utilization of user friendly dashboards and drill down views. The solution delivers precise real-time alerts on unusual activity, database changes and attacks. DBSonar's program design minimizes network bandwidth impact, allowing the target system to operate at peak performance.

Company Description

Based in Taipei, Taiwan, CobraSonic Software is a leading provider of enterprise database management solutions for Informix. The company provides innovative products that help customers achieve higher performance, productivity, reliability, and availability from applications, databases and infrastructure. CobraSonic provides customers and their partners with true value that is unique, widely recognized, and measurable. As resellers and consultants for Informix, we are also a long-term IBM Business Partner in the Greater China Region.

IBM Segment

- Data Management
- Informix

Business Function

- Database Monitoring

Target Industry

- Cross Industry
