

A Business Partner Solution for the Distribution Sector

Integrated Systems for Bus and School Transportation, Public or Private Entities

Norse Systems, Inc.

Bus Wizard—Integrated Transportation Software

Business Challenge

Management of public or private bus transportation operations.

- Increase efficiency
- Save fuel costs
- Improve productivity
- Better customer service

Solution Description

The Bus Wizard suite of software products provides a completely integrated management solution for public or private entities operating a fleet of buses. The CHARTER MANAGER2 application is a complete charter sales and operation system for coach charters or school bus field trips. CEMP1 is a powerful equipment maintenance application with integrated fuel control, inventory and purchasing systems. The Time and Pay Module integrates employee time cards and the dispatch system, as well as providing for complete management of regularly scheduled transport activities, such as home-to-school transportation; it includes sophisticated features for tracking driver qualifications and preventing payroll errors, as well as supporting school contract billing and contract costing. The applications integrate with complete financial applications from Norse Systems, Inc.

The system addresses the sales of charters or field trip scheduling, line run or transit operations, school bus transportation, management of driver pay, dispatching, and equipment maintenance. Administration of school transportation, including, planning and optimizing school bus routes with automated mapping, stop assignment and route driving instructions are also supported. The system provides a management system for school bus contractors, school districts, transit authorities, and private coach operators.

Value Proposition

The applications from Norse Systems, Inc. are licensed as a complete application set. Complete systems including hardware, software and system backup; administrative services are available for only \$65.00 per user per month. Economical perpetual licensing is also available. The application licensing includes a license for the complete, 4th generation, application-development environment Screen Driver, which is used to build and maintain the system as well as providing sophisticated user management and system security tools.

Company Description

Norse Systems, Inc. has been designing, building and providing integrated business solutions for the bus transportation and capital equipment industries for over 23 years. We take pride in making our clients more profitable, and in the superior functions and advanced technology of the applications we provide. We are proud to be partners with IBM.
