Dassault Systèmes
ENOVIA

IBM

Solution Description

The ENOVIA solution enables companies to bring together people, processes, content and systems to achieve a compelling competitive advantage. The solution unifies and stream-lines product development processes across the product lifecycle. This in turn helps companies easily and cost-effectively work on projects within and outside of their enterprises.

Features & Benefits

The adaptable and scalable technology accommodates the ever-changing marketplace at the lowest total cost of ownership. ENOVIA incorporates the proven best practices of some of the world's most innovative companies. Deployments can range from small development teams to extended enterprises with thousands of users, including suppliers and partners.

ENOVIA V6 enables PLM 2.0, the online collaborative environment that involves creators, collaborators and consumers in the product lifecycle. Delivering benefits today that prepare customers for tomorrow, ENOVIA V6 provides global collaborative innovation, online creation and collaboration, a single PLM platform for IP management, a life-like experience, ready-to-use PLM business processes, and lower total cost of ownership (TCO).

The products are organized into four business process-based domains in order to best target specific areas to address — Governance, Global Sourcing, IP Lifecycle Management, and Unified Live Collaboration.

Value Proposition

The ENOVIA solution suite allows people to concurrently work together in real time via a simple Web connection. The 3D interface and user experience make it easy for anybody to participate in the product lifecycle - designers, supply chain, or end customers- thus improv-ing a company's ability to more rapidly innovate on product design and delivery. The ENO-VIA solution addresses customers' requirements across the full spectrum of product and business processes, from small scale teams to extended enterprises with many thousands of users. The solution offers a new level of collaboration, from the most simple to highly engineered complex products, and is poised to address a broad range of industry needs.

Dassault Systèmes is one of the only PLM providers that delivers a production proven SOA architecture for driving collaborative innovation. The solutions link enterprise and multi-dis-cipline engineering users, enabling everyone to work within a single version of the truth. The ENOVIA portfolio offers industry solutions for the enterprise and small to mid-market.

Company Description

As a world leader in 3D and Product Lifecycle Management (PLM) solutions, Dassault Systèmes brings value to more than 100,000 customers in 80 countries. A pioneer in the 3D software market since 1981, Dassault Systèmes develops and markets PLM application software and services that support industrial processes and provide a 3D vision of the entire lifecycle of products from conception to maintenance to recycling.
