Document Access Systems (DAS)
DASMigrate

IBM

Solution Description

DASMigrate provides a comprehensive toolset that streamlines and enhances the migration of images from FileNet Panagon Image Services and Content Services to IBM FileNet P8. All content metadata, including annotations, is exported then ingested into IBM FileNet P8. DASMigrate enables the remapping of document indexes to document properties, merging and splitting of document classes and resetting security. Further, IBM FileNet P8 foldering can be implemented based on document property values to facilitate browsing in IBM FileNet P8 Workplace and WorkPlaceXT. IBM FileNet eProcess Services work items and related work items (recreating queues, rules and maps) are also migrated to the new target IBM FileNet P8 system.

Features & Benefits

- Provides a comprehensive toolset that streamlines and enhances the migration of images from FileNet Panagon Image Services and Content Services to IBM FileNet P8.

- Enables remapping of document indexes to document properties, merging and splitting of document classes, resetting security and implementation of IBM FileNet P8 foldering based on document property values.

- Can be executed by trained customer staff on the customer's site.

Value Proposition

IBM FileNet P8 foldering can be implemented based on document property values to facilitate browsing in IBM FileNet P8 Workplace and WorkPlaceXT. DASMigrate also provides a complete audit trail of images and metadata from source to target system(s) to help ensure accuracy and compliance. Bundled with support from DAS IBM FileNet Certified technicians, DASMigrate helps ensure rapid, productive and effective image migration.

Company Description

Document Access Systems, an IBM Software ValueNet Business Partner, provides services to customers ranging from solution assessment, discovery and design through installation, custom development, implementation and system support. We extend further services to our clients that include system evolution planning, migrations and upgrades from the FileNet Panagon software suite to the IBM FileNet P8 suite of products.

IBM Segment
- Enterprise Content Management

Business Function
- Import/Export
- Migration

Target Industry
- Cross Industry
