A Business Partner Solution for the Cross Industry Sector
Connects IBM Content Integrator Enterprise Edition to IBM DB2 ImagePlus for z/OS

SYSCOM, Inc.
SYSCOM Connector for IBM Content Integrator to IBM DB2 ImagePlus for z/OS

Technology Description

Organizations that use IBM DB2 ImagePlus for z/OS have long desired a tool that will allow federated access to their content client application. SYSCOM's IBM DB2 ImagePlus for z/OS Connector for IBM Content Integrator Enterprise Edition is now available. In one easy-to-use browser window, workers can access content from all repositories and leverage features such as federated search and document copy between repositories.

Features & Benefits

- Allows DB2 ImagePlus for z/OS to participate in a Content Integrator Federated search.
- Allows image retrieval from DB2 ImagePlus for z/OS by a web based client.
- DB2 ImagePlus for z/OS Folder Application Facility (FAF) and Object Distribution Manager (ODM) user exits are supported.
- Includes customizable web client components for building your own web client.
- Supports all types of images including Mixed Object:Document Content Architecture (MO:DCA).
- IBM coded data with overlay structures can also be supported with a proper viewer.
- Function calls to DB2 ImagePlus for z/OS can be customized by the user to perform many functions like move/copy, re-index, delete, doc routing in addition to the standard search and retrieve.

Value Proposition

The SYSCOM Connector allows web access to DB2 ImagePlus for z/OS managed images. Integration with IBM Content Integrator and WEB 1.0.3 is also supported. This connector integrates with IBM FileNet Content Federation Services and will enable DB2 ImagePlus for z/OS content via a standard web client.

IBM Segment
- Enterprise Content Management

Business Function
- Content Federation

Target Industry
- Cross Industry

IBM Software ValueNet

Do you have the need to find images in ImagePlus for z/OS, IBM FileNet P8, IBM FileNet Image Manager, IBM Content Manager and IBM Content Manager for iSeries at the same time? Use this connector along with the FileNet P8, FileNet Image Manager, IBM Content Manager and Content Manager for iSeries connectors, together with Content Integrator, and federate across all five.   Implementing Content Integrator with the right connectors will allow you to leave the original where it is and still find it.
