

IBM Informix SE

SE is a zero-maintenance “load and go” SQL-based DBMS for small business applications. Valued by the VAR community for its ease-of-use and silent install, SE is embedded in thousands of partner applications throughout the world. IBM intends to continue to enhance, sell and support this product for customers and business partners. The upcoming release of SE will include support for files larger than 2GB and will be available on Unix, Linux and Windows. Version 7.26 of SE will be released in early 2002 and will be available on Unix, Linux and Windows.

Notice:

This document expresses IBM's current intentions and plans, which are subject to change. This document is not intended to and does not create a binding obligation of IBM to provide maintenance, support, enhancements or upgrades for any product. Maintenance, support, enhancements or upgrades for IBM Informix products will be provided in accordance with and subject to the terms of specific written agreements.
