

IDS 11 Quick Start Service

IBM Software Services

Highlights

- ***Leverage the industry's premier database experts to seamlessly upgrade with minimal downtime***
- ***Take advantage of the power of IDS 11 and optimize your database for future growth***
- ***Gain IDS 11 skills quickly and efficiently with expert advice and knowledge transfer directly from our consultants***

Today's leading organizations require more from their database environments to accommodate their growing infrastructures and capitalize on new market opportunities. Getting up and running quickly with new technology is essential to business success. Thousands of customers leverage IBM Software Services to take their business to the next level and ensure their database environment is installed and running with minimal downtime.

What is a Quick Start Service?

A Quick Start Service from IBM Information Management Software Services is designed to get your new database environment up and running quickly. Additionally, we provide assistance with installation and configuration processes and help you exploit the newest functionality in

IBM Informix Dynamic Server® (IDS) 11 including:

- replication
- encryption
- isolation options
- triggers
- task scheduling
- Label-Based Access Control (LBAC)
- XML
- DataBlades

Upgrade to take advantage of the power of IDS 11 and optimize your database to better handle future growth. IDS provides the ultimate in performance, scalability, continuous availability, compatibility, ease of installation and administration, and security — all in a cost-effective platform that is open and flexible and supports key industry standards. Additionally, new and enhanced client drivers, new functions to ease migration, and new, bundled extended functionality (DataBlades) makes your DBA staff even more productive.

What's Involved

When you engage IBM Software Services, you can be confident you are working with the industry's leading experts. Our Data Server consultants assist you with the installation and configuration of IDS products. Gain IDS 11 skills quickly and efficiently with expert advice and knowledge transfer directly from our consultants.

Working jointly with your staff, our consultants provide technical assistance and insight to support IDS in your unique environment.

Data Server consultants can:

- *Prepare a customized roadmap to move you beyond basic implementation tasks to optimal database functionality*
- *Mentor your team with hands-on training and knowledge transfer to implement changes and get your new configurations up and running*

Our consulting team will deliver a custom report detailing the installation process for your specific environment, configuration modifications made to the default database settings, and specific operational information required to administer your unique database system.

The primary activities in this services offering:

- *Installation and configuration of IDS II*
- *Creation of initial database*
- *Analysis of new IDS II functionality that pertains to your environment*
- *How to implement IDS MACH II (Multinode Active Cluster for High Availability) to maximize availability*
- *Mentoring, hands-on training and knowledge transfer*

Supported Products

Informix Dynamic Server 11
Informix Connect 3
Informix Client-SDK 3
