FlexLearning: An interactive Web-based learning environment

Highlights

- **Extends technical knowledge and skill sets without leaving the office**

- **Learn anytime, anywhere online and at your own pace**

- **Learn by doing—solving real-world business problems**

- **Enables students to test drive software for optimal learning through a guided-tour simulation**

- **Saves time, reduces cost and increases productivity**

- **Requires only a Web browser and a passion for learning**

FlexLearning provides interactive learning environment

FlexLearning from IBM Information Integration Solutions is an interactive Web-based learning environment where students learn by doing—using a rich system of guided, hands-on exercises and self-assessment questions.

FlexLearning helps companies save time and expense when training staff members. Its vivid, interactive multimedia offers a unique, flexible learning experience. By using FlexLearning, technical staff members can broaden the skills needed for increased success at their jobs with only a minimum amount of time through use of efficient and effective self-paced learning methods.

FlexLearning is an extension, not a replacement, of the traditional classroom environment. It provides information that is typically not explored in detail in the classroom.

Each three-hour FlexLearning course lets you control and configure a specific software product in a guided-tour simulation—all online. You simply need access to the Internet.

FlexLearning is affordable

The FlexLearning Site License enables all of your staff—not just one student—to access a course. Truly a flexible educational offering, FlexLearning courses can be used as review exercises when problem-solving situations arise in the workplace, for new staff member training or to augment the skills of existing staff members. The FlexLearning Site License grants access to all available FlexLearning courses for an entire year. Some benefits of FlexLearning include:

- *Greater scheduling flexibility*
- *Revisiting the course as a reference to solve troubleshooting problems*
- *Supplement to traditional instructor-led training*
- *Varied course levels that provide content suitable for all skill sets and training stages*

IBM

Unlock the value of enterprise data

Organizations face an information challenge. Where is it? How do I get it when I need it and in the form I need it? What does it mean? What insight can I gain from it? The list goes on and the challenges grow unceasingly if organizations cannot ensure they have access to dependable, consistent, timely and complete information.

IBM Information Integration Solutions

To help you achieve success in meeting your business objectives through enterprise information integration solutions and to accelerate your solution design and implementation, IBM Information Integration Solutions offers a broad range of planning, education, design engineering, implementation and support services. Whatever industry your company serves, our consultants can help you implement the right IBM Information Integration Solution.

- *Reference for co-workers to a product simulation (all FlexLearning courses have one) to communicate about IBM® WebSphere® DataStage® (formerly WebSphere DataStage Enterprise Edition) or IBM WebSphere QualityStage™ project collaboration*

The FlexLearning Library includes the following types of courses:

- *WebSphere DataStage Overview*
- *Installing WebSphere DataStage on UNIX®*
- *Installing WebSphere QualityStage on UNIX*
- *Configuring open database connectivity (ODBC) for WebSphere DataStage*
