## Ankush
Big Data Cross Platform Cluster Management

IMPETUS

## Manage multiple vendor clusters from a single interface

- Provision big data clusters and ecosystems rapidly

- Support Oracle NoSQL Database, Hadoop, Apache, and Cloudera

- Support Flexible MapReduce clusters

- Centrally manage both local and cloud-based clusters

- Manage down to node level resources

- Monitor all clusters through a single tablet-friendly dashboard

Impetus is a Software Solutions and Services Company with deep technical maturity that brings you thought leadership, proactive innovation, and a track record of success.

Simplify

- Reduce cluster setup time by up to 80%

- Reconfigure and upgrade cluster ecosystems

- Resolve issues with detailed data visualizations, analytics reports, and event logs

- Support ecosystem certification
