Teleconference – July 13, 14 and 15, 2010

IBM IMS 11 – Technical Education on Enhancements and Migration Planning

Most businesses have invested countless years building IMS™ applications, using IMS data and developing IMS skills. But the increasing size of data repositories and applications, as well as the demands placed upon them by business requirements, are creating more complex environments that need to be more easily managed with autonomic enhancements. Continuous, high-performance operations for applications and data is a key driver behind the innovations in IMS 11.

This complimentary teleconference, presented for 4.5 hours per day for three days, is an in-depth exploration of major enhancements in IMS 11 and how to take advantage of them. These enhancements are described, their value is shown and their implementation is explained. You'll learn how to more easily manage your IMS system even with a shortage of skilled database administrators and system programmers. In short, you will learn to take full advantage of all the enhancements in IMS 11.

Seminar topics include:
• Describe the new features and functions delivered in IMS 11.
• Identify functions that are applicable to their unique environment
• Plan for the installation and implementation of IMS 11 and its new functionality

Speakers: Rich Lewis, IMS Advanced Technical Skills, Americas

Suzie Wendler, IMS Advanced Technical Skills, Americas

Developed for: IMS database administrators and system programmers
Technical level: Intermediate

Broadcast date: July 13, 14 and 15, 2010

Schedule:
Start 10:30 a.m. EDT, each morning

Break 12:30 p.m. - 1:30 p.m. EDT, each day for lunch

Resume 1:30 p.m. - 4:00 p.m. EDT, each afternoon

Day 1 topics include: System enhancements- Security- Database- Transaction Manager

Day 2 topics include: Connectivity- Integration

Day 3 topics include: Integration (cont.)- DBRC Enhancements- Installation and migration
