Information Management software

Information Management Software Services
IBM InfoSphere Information Server Install Package

Highlights

- Professional installation of Information Server by Information Management experts

- Develop System Administration skills through onsite mentoring and hands on activities

- Knowledge of InfoSphere standard practices transferred to your team

The InfoSphere Information Server Install Package consists of a fixed scoped project leveraging expert consultants, a repeatable proven processes and standard collateral to reduce costs and project risks and ensure seamless installation of the Information Server product suite. Avoid spending unnecessary time and money during software installation by leveraging the experts with the experience and knowledge you need. Information Management Software Services draws on years of deployment experience, proven methodologies, and standard practices to support a timely, reduced risk delivery of a successful product installation.

Installation Offering Scope

The Installation offering contains four components to ensure a successful installation:

Preparation Phase

- Before the consultant arrives on-site it is important that you ensure that all the prerequisites are in place. The expert consultant will be delivering an environment prerequisite checklist to support you with this preparation phase.

Information Server Product Installation

- Relying on the environment prerequisite checklist, our InfoSphere installation consultants will work with your team to install the InfoSphere software according to the installation plan developed during the preparation phase.

Post-Installation Configuration

- Once the actual product installation has been completed, our InfoSphere installation consultants will run a basic configuration to validate that the installation has been done properly.

System Administration Handoff

- Once the configuration of the environment is complete, InfoSphere installation consultants will provide knowledge transfer by demonstrating the system and informing your team on standard procedures for maintenance routines, back-up methodologies and problem reporting.

Deliverables

The following items will be delivered to you :

- An environment prerequisite checklist to make sure all prerequisites are met before the start of the engagement
- A system configuration document with specific configuration parameters of your environment
- An install checklist that designates the completion of this package.

Information Management Services

IBM offers a broad set of Services offerings designed to maximize your success with Information Management Software through standard practices developed across numerous successful deployments. Intended to establish a foundation of product knowledge and guidelines, these strategic workshops and offerings are customized to your existing environments, standards, and methodologies.

IBM aims to provide the most cost effective and expedient means of achieving project goals through the use of Information Management Software, repeatable processes, and consistent deliverables.
