# IBM Navigator on Cloud

Getting started

Connect to your directory service and get users on board immediately.

Content management

Users can collaborate around content on the cloud through teamspaces as well as integrated review and approval processes.
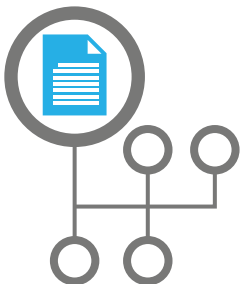

Compliance

SoftLayer is a trusted platform for content that enables access to information with strict data compliance rules.

Mobility

Desktop and mobile interfaces are consistent and automatically synchronize content.

Interoperability & interfaces ⊕

CMIS allows users to create new applications as well as extend investments through integration with existing systems.
