## 2. Lier à un contenu ECM

- Sélectionner “Créer – Lien” pour afficher le formulaire Lien
- Cliquer “Change” pour sélectionner le document cible
- Peut lier à tout contenu ECM ou Quickr dans un autre espace
- Commentaire: le contenu ECM ne nécessite pas d'être publié comme un flux ATOM

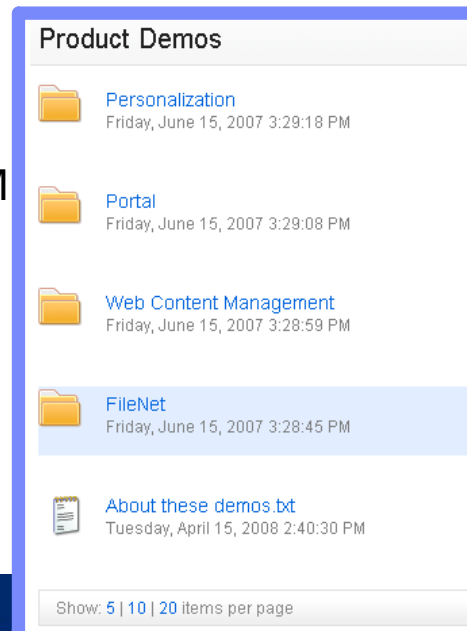

The screenshot displays the Lotus Quickr web interface. The main window is titled "Integration Place" and shows a form for "Create a new document link". The form includes fields for "Location" (set to "Integration Place"), "Target Document\*" (set to "No Document Selected"), and "Description". There are "Create" and "Cancel" buttons at the bottom of the form. A file selection dialog is open over the form, showing a tree view of documents. The selected document is "Gear Supply Co 12-06-AN.svx". The dialog also shows a server address "http://cayenne.raleigh.ibm.com:10040" and a "Go" button. The background of the interface includes navigation links like "Explore Home", "Tools Find People", and "Work Create a Place".

# 3. Afficher des dossiers ECM dans Lotus Quickr

  - Facture clients, bons de commandes ou des rapports de problèmes dans ECM, ex. afficher dans l'espace Quickr du client

  - Images VMWare de démos dans ECM, listé dans l'espace produit

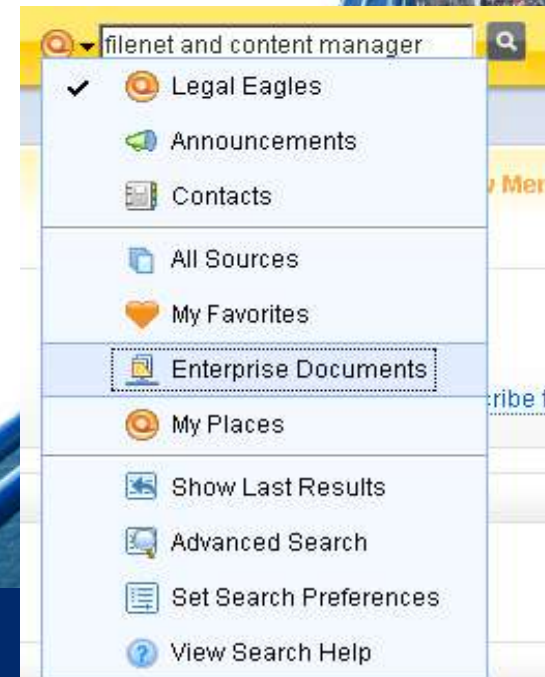

- Basé sur des flux ATOM
  - Utilisateur crée un lien par contenu ECM ou subscription à un flux ATOM ou dossier dans le système ECM
  - Créer avec le menu 'Créer' dans Quickr
  - Flux de dossiers via le nouveau serveur ATOM dans P8 et CM8

## 4. Recherche contenu ECM dans l'interface Quickr

- Possibilité de chercher du contenu ECM et Quickr en même temps
  - Recherche sécurisée - les utilisateurs voient seulement les résultats auxquels ils ont accès
- Quickr envoie les requêtes aux moteurs de recherche de P8 et CM8
  - Les résultats ECM affichent dans leur propre liste de résultats
  - ++ : réutiliser la puissance des moteurs de recherche ECM
    - Fournit un index de recherche qui peut évoluer en taille
    - Recherches full text couvrent tout le document (plus que 200 formats fichiers) et meta-données
  - -- : Limitation des moteurs de recherche ECM
    - Moteur de recherche CM8 n'a pas tri de pertinence, donne juste une liste
    - Dans la première version, pas de recherche paramétrable
- Limitations de l'intégration avec CM8
  - Quickr peut seulement chercher du contenu CM ajouté à CM via Quickr et pas avec l'accès web CM
