

Les particularités de la gestion des exigences dans un environnement de systèmes de systèmes

Corinne Bacle corinne.bacle@fr.ibm.com

*Cette présentation mettra en évidence les spécificités du passage d'une stratégie orientée produit à une stratégie orientée solutions ainsi que les méthodes et outillages proposés par IBM Rational pour une définition efficace de systèmes de systèmes et de programmes :
IBM Rational Focal Point et IBM Rational System Architect*

Content

1. Introduction
2. Qu'est-ce qu'un systèmes de systèmes ?
3. Passage d'une stratégie orientée produit à une stratégie orientée solutions
4. Les méthodes : particularité de la gestion des exigences dans un contexte SOS
5. La solution Rational
6. Démonstration
7. Conclusion

4. Les méthodes : particularité de la gestion des exigences dans un contexte SOS
5. La solution Rational
6. Démonstration
7. Conclusion

Our world runs on complex systems of systems

Organizations developing smarter products aspire to be innovative

Product innovation enables companies to leapfrog their competition, grow demand, and increase value

INSTRUMENTED

They have the ability to measure, sense and see the exact condition of everything

INTERCONNECTED

They enable people, systems and other products to communicate and interact with each other in entirely new ways

INTELLIGENT

They can respond to changes quickly and accurately, and get better results by predicting and optimizing for future events

Hint. **think software**

Smart products transcend “one-size-fits-all” products enabling customers to get exactly what they want – tailored to their unique needs

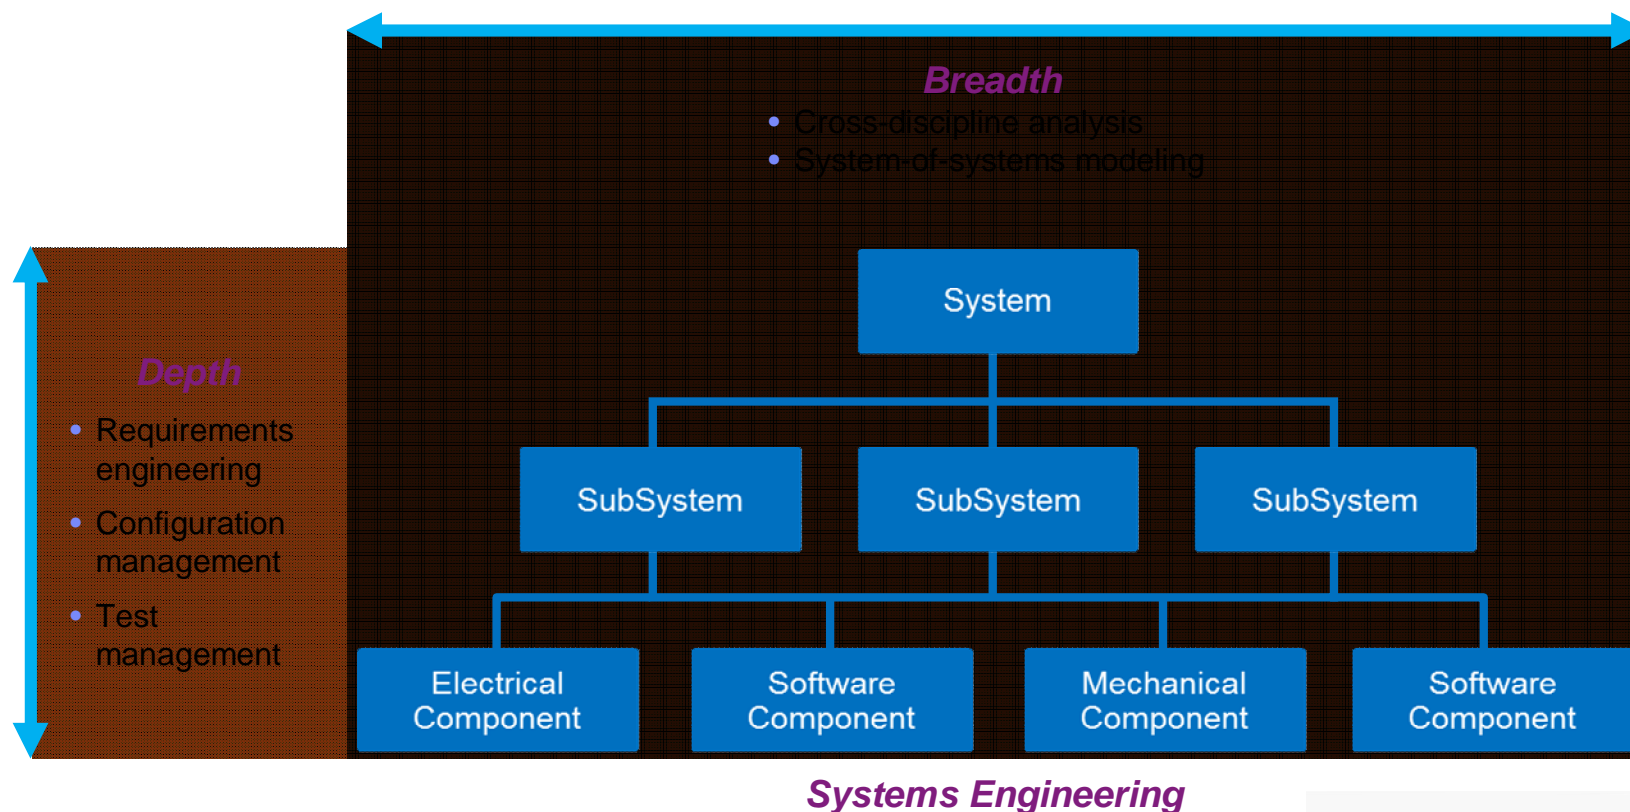

The breadth and depth of systems engineering

Breadth of systems engineering

- Systems engineering is a profession, a role, even a job title, for those who work exclusively at a system-of-systems level.

Depth of systems engineering

- Systems engineering also names a set of methods, skills and techniques that can be applied both at a system-of-systems level and within specific engineering disciplines.

Smarter products need a systems approach to product development

Make the change or get left behind

Traditional Product Development

Mechanical Engineering

Electrical Engineering

Software Engineering

Physical Design and BoM-centric Approach

- Used for product but not systems of systems design
- Siloed engineering disciplines
- Not ready for the software explosion

Systems Engineering Approach to Product Development

Systems Engineering

Integrated Electronic, Mechanical, and Software Engineering

- Optimized for product, system and systems of systems design
- Systems approach encourages engineering collaboration
- Excels in software design management

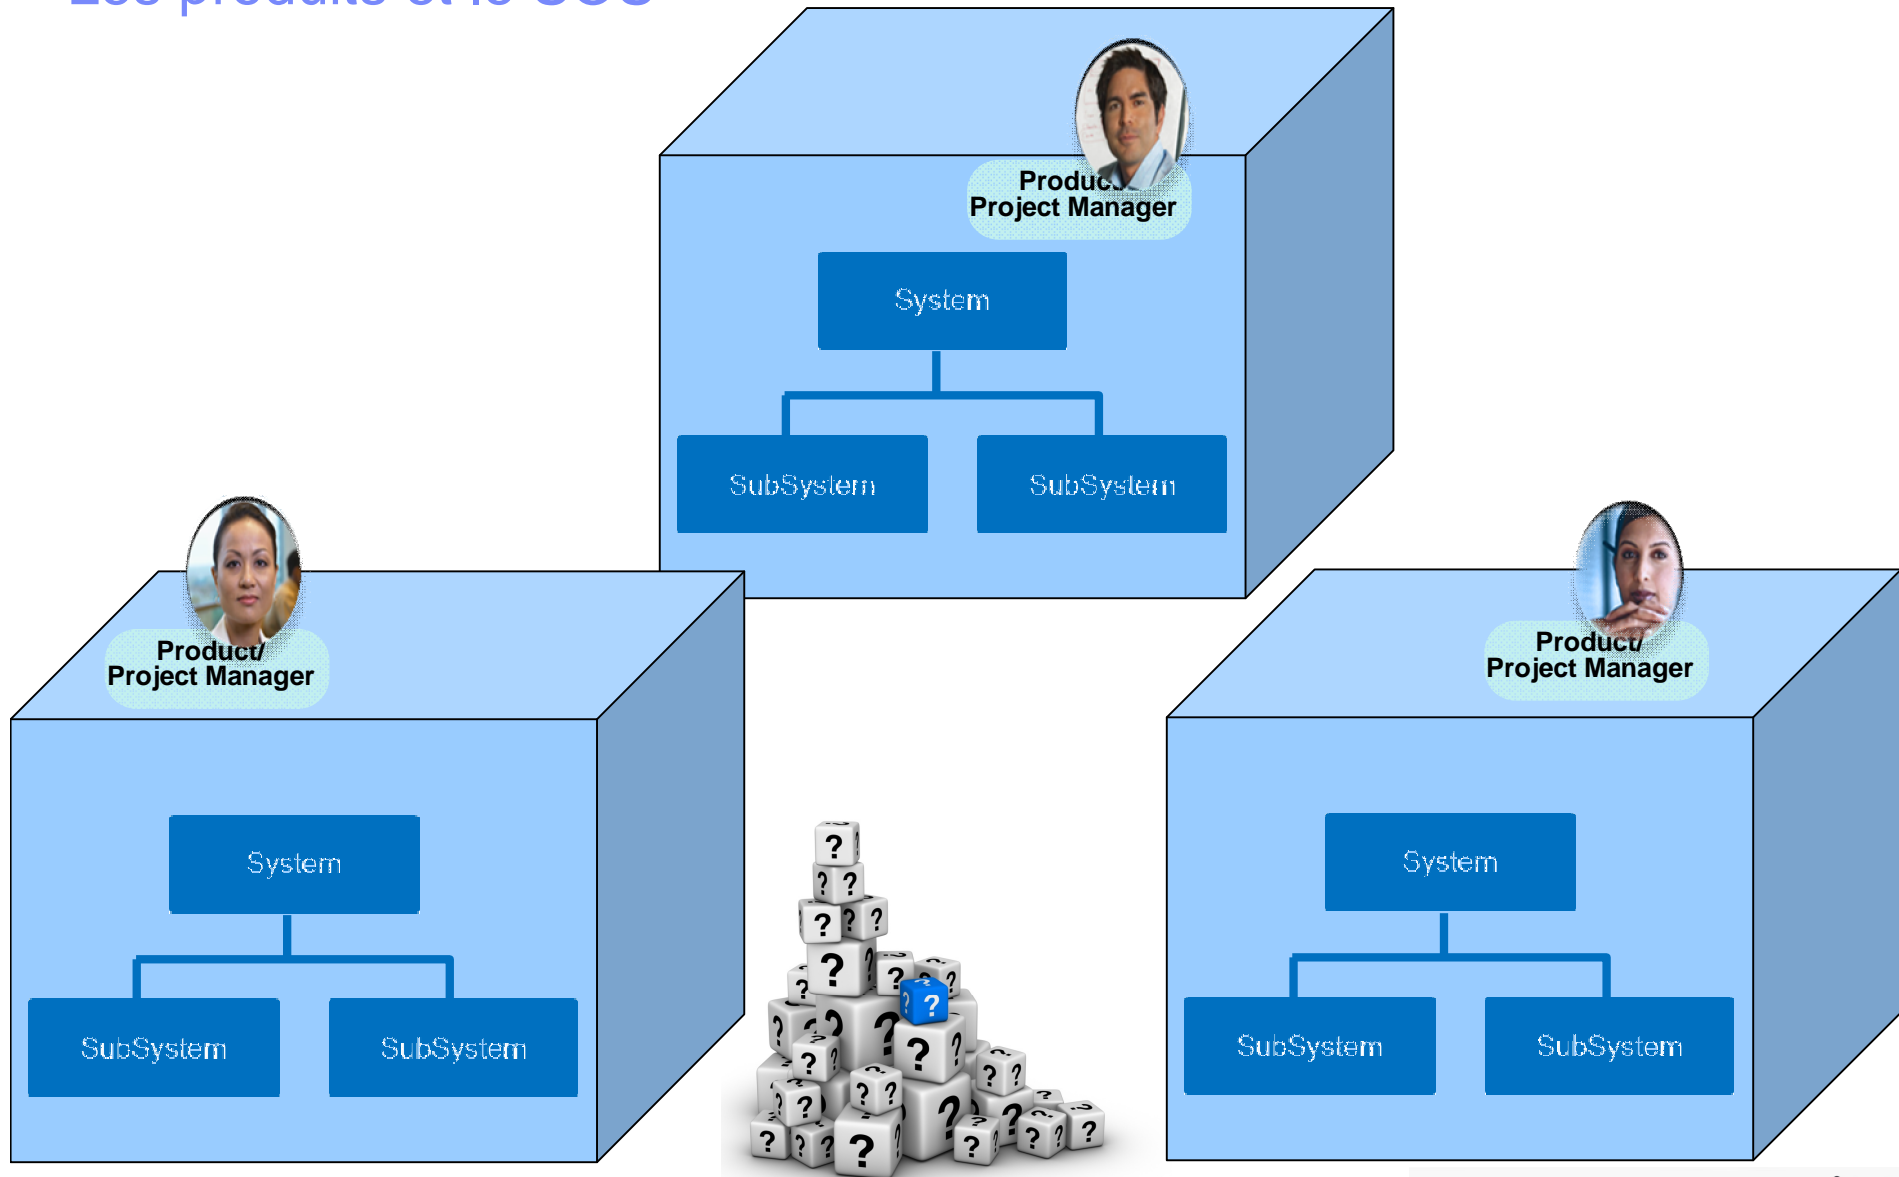

Content

1. Introduction
2. Qu'est-ce qu'un systèmes de systèmes ?
3. Passage d'une stratégie orientée produit à une stratégie orientée solutions
4. Les méthodes : particularité de la gestion des exigences dans un contexte SOS
5. La solution Rational
6. Démonstration
7. Conclusion

Les produits et le SOS

La solution

La solution peut être composée

- de produits techniques internes à l'entreprise
- de services associés
- de services rendus par d'autres produits, d'autres entreprises

Elle prend en compte des contraintes :

- techniques
- de planning
- financières
- humaines
- d'alignement avec la stratégie

Objectifs différents, parfois contraires

Collaboration

Between customers ...

...Product Mangers...

...the business...

and Test

...Engineering...

Is there an absence of a clear link between approved projects and the strategic plan?

Support for planning, prioritization and execution

Focal Point pour le Project and Product Portfolio Management

- Help Utilities to prioritize projects/architectures/capabilities based on gap analysis
- Capture what's important to stakeholders
- Show cost vs. benefit across different solutions
- Simulate roadmap
- Incorporate intangible variables into analysis
- Visualize and communicate status

The screenshot displays the Rational Focal Point interface, which is used for project and product portfolio management. The interface includes several key components:

- Navigation and Settings:** Top menu bar with 'Workspaces | Home | Preferences | Federica Coppola | Help | Log Out'. A breadcrumb trail shows 'Architecture of systems and requirement management'.
- Welcome to Focal Point:** A central message area with an image of energy-efficient buildings and text: 'Whether for new buildings or site remodels, our energy efficiency solutions can significantly improve your long term profitability by reducing costs and energy usage and helping you be greener. Learn more'.
- Action List for solutions:** A table listing solutions with columns for Title, Does Not Fulfill, Responsibility, and Seriousness.

Title	Does Not Fulfill	Responsibility	Seriousness
Q 024:New solution to prepare the demo	<input checked="" type="checkbox"/>	Federica Coppola	II
Q 014:Lighting control with no contact (H1N1)	<input checked="" type="checkbox"/>	Federica Coppola	II
- Solution portfolio:** A table listing solutions with columns for Title, Set of, and Address.

Title	Set of	Address
015:Lighting control system for Asia-Pacific	C-Bus Clipsal	006:Data centre 007:Buildings 008:Hospital
- Progress Release 1.0:** A table showing the status and quantity of releases.

Status	Quantity	Share
New	0	0,0%
Accepted	0	0,0%
Planned	0	0,0%
Started	3	60,0%
Completed	2	40,0%
Tested	0	0,0%
Clarify	0	0,0%
Duplicate	0	0,0%
Rejected	0	0,0%
Haltd	0	0,0%
Delete	0	0,0%
Sum:	5	
- Progress Release 1.1:** A table showing the status and quantity of releases.

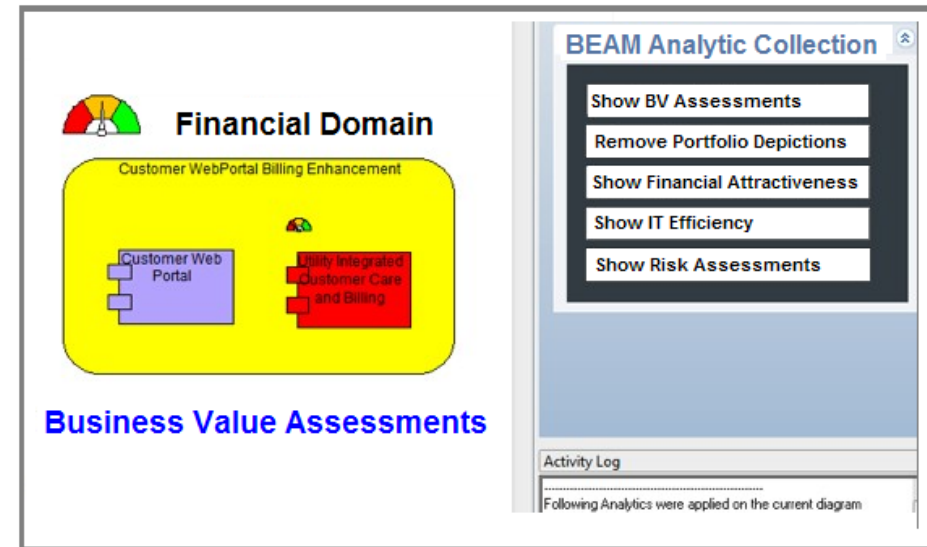

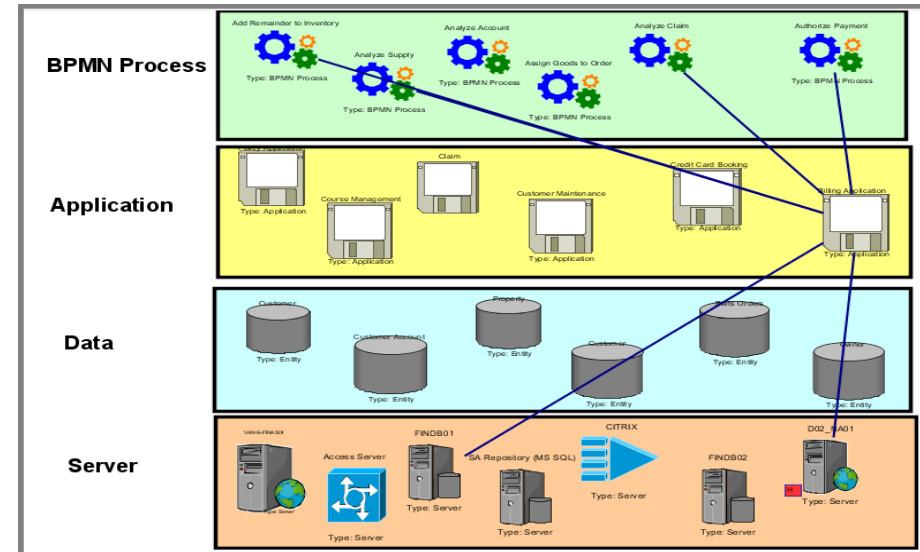

Status	Quantity	Share
New	0	0,0%
Accepted	0	0,0%
Planned	5	100,0%
Started	0	0,0%
Completed	0	0,0%
Tested	0	0,0%
Clarify	0	0,0%
Duplicate	0	0,0%
Rejected	0	0,0%
Haltd	0	0,0%
Delete	0	0,0%
Sum:	5	
- SREQs per Stakeholder:** A table showing the quantity and share of SREQs for different stakeholders.

Stakeholders	Quantity	Share
-	21	56,8%
ADJO - Adventure Journeys	6	16,2%
Atlantic Tours	3	8,1%
Cruze Lines Inc.	5	13,5%
- IT Efficiency vs. Business Value:** A chart showing the relationship between IT efficiency and business value for various systems.

System ID	System Name	IT Efficiency	Business Value
225	Central Internet Database	High	High
226	Central Monitoring System	High	High
374	Inventory Management	Medium	High
381	Telephony	Medium	High
001	Planning System	Medium	High
378	Project Costing	Medium	High
005	Modelling and Simulation	Medium	High
007	Change Configuration Management	Medium	High
004	Website System	Medium	High
215	AIM	Medium	High
008	Dynamic Report System	Medium	High
- Other Visualizations:** A bubble chart showing 'Total Business Value' vs. 'Total IT Efficiency' for various solutions. A Gantt chart at the bottom shows project timelines from 2008 to 2013.

System Architect pour l'Architecture d'entreprise et de systèmes de systèmes

- Helps government agencies and energy firms plan their transformation and mitigate risks, achieving maximum ROI
- Understand the current state of business, strategy and IT blueprint
- Collaborate with stakeholders on goals and resources
- Analyze and plan with impact analytics
- Road map energy transformation
- Identify gaps and candidates for change
- Create and analyze: Trade-off studies through “what-if” scenarios

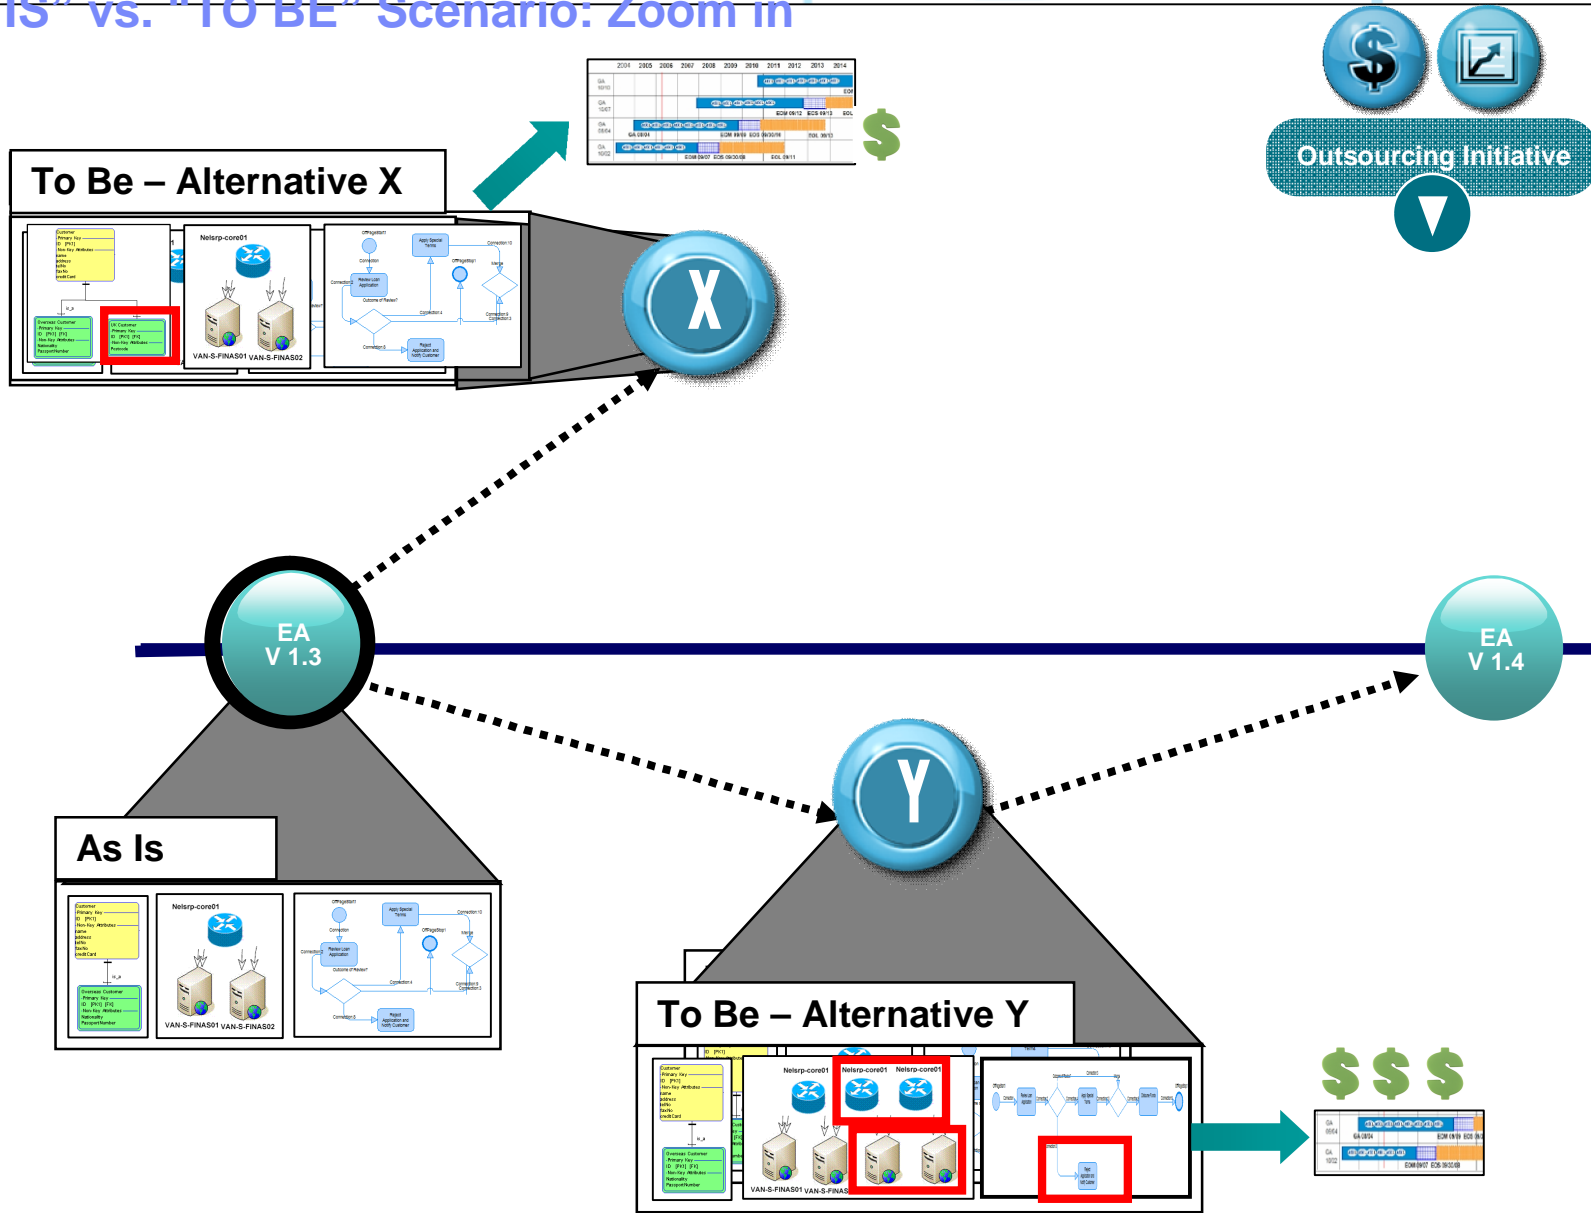

Supp SoS modelling with NAF

“the **structure** of **components**, their **relationships**, and the **principles** and **guidelines** governing their **design** and **evolution over time**”

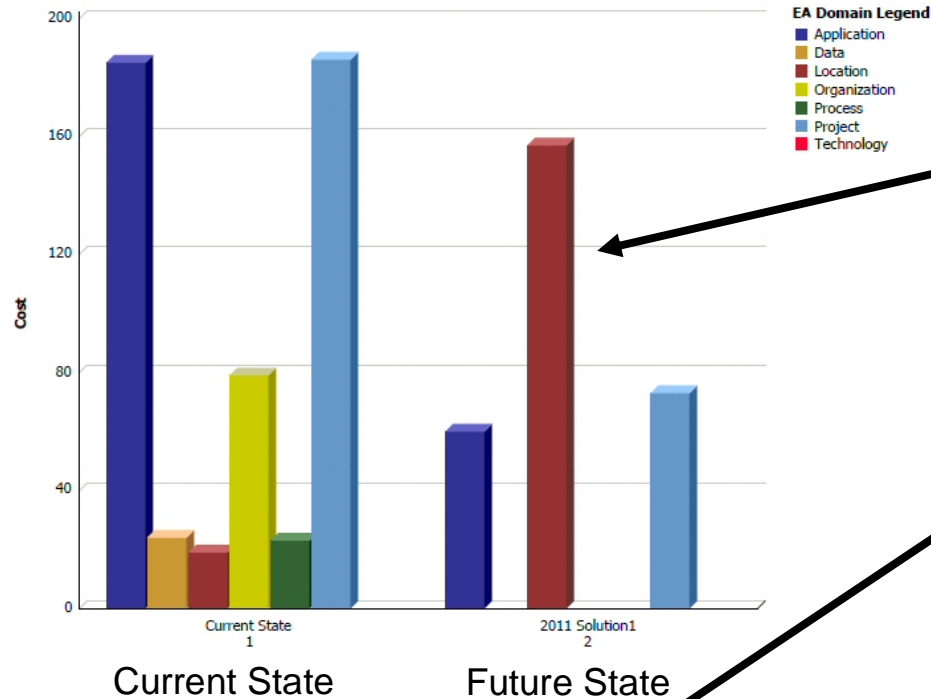

*Applied to the Enterprise
across:*

“AS IS” vs. “TO BE” Scenario: Zoom in

Plan and Execute Transformation: *Reporting better visualizes the risk and impact of change*

Select chart type
 Select Workspace

Compare current and future state architectures (across workspaces)

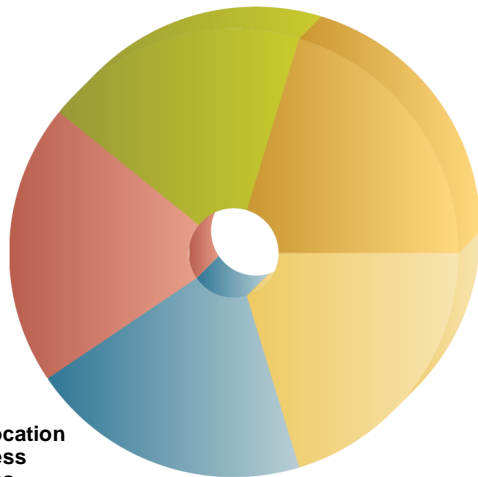

Identify impact of proposed changes

Avoid risk of transformation

Impact Analysis Details				Related Issues				
WorkspaceId	Name	Identity	Description	WorkspaceId	Identity	Name	Issue Type	Priority
1	Impact1	1		1	1	Issue1		High
	Impact2	2		2	3	Issue3		High
2	Impact3	3		1	2	Issue2		Medium

Issues are highlighted in color based on severity

Plan Future Direction and Identify Innovation Needs: *Enhanced reporting of business dependencies and direction*

Total Allocation of Business Resources

EA Domain Legend

- Business Unit 1
- Business Unit 2
- Business Unit 3
- Business Unit 4
- Business Unit 5

Report on business status, and build a change plan

Drill down into specific details in the business architecture

Map business functions to supporting roles, locations & technologies

Business Service Name	Description	Stereotype	Is Owned by Organization Unit	Is Governed by Organization Unit	Consumed by Actor
Account Administration		Business Service Depiction	Accounts		Customer Services Representative
Archive Account		Business Service Depiction	Accounts		
Assess Risk		Business Service Depiction	Finance		Sales Manager, Customer Services Representative
Campaign launch control		Business Service Depiction	Marketing		Marketing Manager
Campaign Management		Business Service Depiction	Marketing		Marketing Manager

Business service dependency on Technology Components

Name	Identity	WorkspaceId	Description	Name	Identity	WorkspaceId	Description	Hosted at Location

7. Conclusion

Rational Focal Point value

- Capture Ideas and proposals
- Manage the details of architectures, capabilities, projects and portfolios
- Prioritize and compare based on qualitative and quantitative data
- Make sensible decisions on where to invest based on facts
- Plan future projects to avoid resource bottlenecks
- Gain visibility of on-going projects to easily identify problems before they occur
