Using ISO4217 Alphabetic Currency Code	-BYR 1 234 567,89

- бел.руб 1 234 567,89
-BYR 1 234 567,89

Positive Sign (if any)	none
Negative Sign	hyphen
Decimal Separator	comma
Digits After Decimal	2
Thousands' Separator	space
Grouping	3
Leading Zeros	Yes
Field Length (if any)	-
Padding Character	-

Other Relevant Information:

бел.руб shouldn't be considered a proper currency sign. It's just an abbreviation from белорусских рублей or беларускіх рубліў. Our real practice is the following. Just numbers are usually specified on the price tags. The full currency name should be specified in official agreements and important payment bills. If there is no special reference to USD, "у.е." or "усл.ед." it means that the sum is specified in Belarusian roubles. Both "у.е." and "усл.ед." means *conventional units*. This is a half-hidden reference to USD (the sum may be presented in Belarusian roubles according to the current USD/BYB ratio).
