Wipro Technologies

Wipro, one of the largest product engineering and support service providers worldwide provides comprehensive research and development services, IT solutions and services, including systems integration, Information Systems outsourcing, package implementation, customized software application development and maintenance services to corporations globally. Wipro's Automotive Practice works towards bringing superior IT & BPO solutions globally. It's range of offerings extends from Engineering Design & PLM services, Embedded Electronics as well as Enterprise solutions.

Solution/Product

WiQTr - Enterprise Quality Improvement

Solution overview

WiQTr (pronounced Victor) is a proactive business solution in the Enterprise Quality Improvement space.

With this solution, you get to utilize the insights embedded in various information sources be it the field service teams or the call centre teams and reduce the time gap between detection of failures/problems to its correction. This helps in creating a single comprehensive enterprise solution platform to analyze past failures, predict future failures and also take corrective actions, while building a knowledge management platform that helps improve service quality.

Logica Private Limited & Logica Plc

Logica is a leading IT and business services company, employing 40,000 people. It provides business consulting, systems integration, and IT and business process outsourcing services. Logica works closely with its customers to release their potential - enabling change that increases their efficiency, accelerates growth and manages risk. It applies its deep industry knowledge, technical excellence and global delivery expertise to help its customers build leadership positions in their markets.

Logica Private Limited in India draws upon a long history of serving clients of the Logica Group, tracing its roots back to the acquisition of a financial products company in the country - Synectics.

In India today, Logica has the capability to manage design, development, and implementation of software solutions and products for clientele across the globe across Europe, APAC, US and Australia.

Logica in India is a high-performance, full service offshore development centre with centres of excellence for SAP, product engineering, R&D and financial services BPO. We focus on Infrastructure Management (IM), bespoke development/SI projects, Applications Management (AM) services and Business Process Outsourcing (BPO).

We deliver service through provision of staff resources both offshore in India and where appropriate locally on-site. We excel at helping our clients through the complex transformation projects that not only deliver real ROI, but true competitive advantage.

Logica India is also home to a strategic business development unit, supporting Logica's "win business" strategy worldwide.

Committed to quality, Logica in India adds value to client businesses through well-established and structured methodologies, tools and techniques. The centre is ISO 9001:2000 certified and is also assessed as SEI-CMMI Level 5, ISO 27001:2005, TickIT accredited global delivery arm of Logica plc, and is the primary offshore development facility for the group.

Solution/Product

Quaestor Payments Hub and Quaestor Liquidity Manager - Corporate Banking

Solution overview

The QPH (Quaestor Payments Hub) and QLM (Quaestor Liquidity Manager) solution from Logica provide a comprehensive end-to-end solution to meet the banks requirements around RTGS and NEFT payment systems.

The software has two components - a payments hub that automates the process of receiving and routing relevant payment messages from the bank's systems to RTGS & NEFT Payment Gateway and vice versa.

The liquidity manager module allows banks to addresses the management of intra-day liquidity of the RTGS settlement account with features like Reserve Funds, Predictions, Priority Scheduling, Ad-Hoc Blocking and take appropriate measures to effectively use funds in the RTGS.

C1 India is a premier ISV partner of IBM, and together they provide comprehensive solutions that drives transparency, delivers large cost reduction and process efficiency throughout the sourcing and procurement process of government organizations.

Solution/Product

e-Rfx with Forward Auction & Backward Auction - Auction Managmeent

Solution overview

Rfx allows buyers to post requests for quotation (RFQ) to an open or closed group of suppliers. It allows suppliers to respond dynamically in a reverse auction-bidding event. It thus helps with supplier selection, bid management and realizing the true market price for goods and services. Forward Auction helps suppliers auction excess inventory and dead assets whereas Backward Auction helps buyers post RFQ for goods and services. With this service, companies can enhance participation in the bid process due to the ready availability of qualified trading partners, shorten negotiating cycles and lower transaction costs.
