

Overview

A modern communication platform for remote locations

WWF - India needed a more effective internal communications platform to facilitate seamless collaboration from remote locations

A seamless, secure solution

To counter the problem, IBM implemented IBM Lotus Domino, IBM Lotus Notes and IBM Lotus Notes Traveler in compliance with internal governance and industry and governmental regulations.

Enhanced efficiency from remote locations

WWF - India gained faster and more effective internal communications, better response times and improved communication from remote locations.

Solutions Components

Software

- IBM® Lotus Domino® V8.5
 - IBM Lotus Notes® V8.5.1
 - IBM Lotus Notes Traveler V8.5
-

WWF - India

By implementing IBM Lotus software, WWF - India gained faster and more effective internal communications and response times, in addition to improved communication from remote locations.

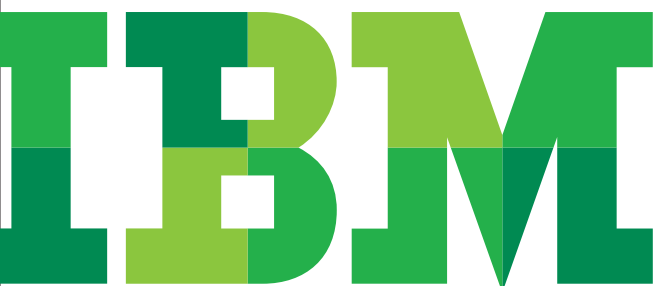

Founded in 1969, WWF - India is a large nature and wildlife conservation organization in Delhi and is part of the World Wide Fund for Nature (WWF). The WWF is present in more than 90 countries, with its international office located in Switzerland and two specialist offices in Brussels and Washington, D.C., that work on international economic issues and other activities.

The Challenge

WWF - India used fax machines, the telephone and hard-copy methods instead of electronic media to communicate. The organization needed to become more competent in communicating within its organization. Moving forward, WWF - India sought a new collaboration software.

The Solution

WWF - India implemented IBM® Lotus® software for its communication requirements. IBM Lotus Domino® V8.5 software provides the client with enterprise-grade email, collaboration capabilities and a custom application platform. IBM Lotus Notes® V8.5 software acts as an email archiving solution that helps WWF - India reduce operational costs while enforcing email record keeping policies in compliance with internal governance and industry and governmental regulations. Finally, WWF - India officials use IBM Lotus Notes Traveler V8.5 software to access email via mobile devices outside the main facility.

“IBM’s software platform has added a new dimension to our operations. Cracking the problem of communication from remote locations will be a big boost to our operations in India.”

*- Sudbir Joshi
Manager IT
