# IBM QuickStart for WebSphere Business Compass

*Transforming your business strategy into business processes for smarter decisions and actions*

---

## Highlights

---

- ***Empower your team on key mapping and modeling skills***
- ***Improve business processes through tighter collaboration between your business and technical teams***
- ***IBM Software Services for WebSphere has the depth and breadth of knowledge and experience with WebSphere software to enable your business to be agile and high performing in a constantly changing environment***

## Your Business Challenge

You know that your business can benefit from implementing a Business Process Management (BPM) project using WebSphere® Business Compass and WebSphere Business Modeler, but you face challenges ahead. Our experts will help you to

- Assist your business team in creating strategy, capability and process maps from a Web browser
- Contribute to distilling your strategic intent into current and future capabilities
- Capture business intent to transform, automate and measure business processes
- Provide quick value and identification of prioritized business needs that let you focus on ROI with your BPM projects

- Provide a collaboration environment for business strategy and improvement using WebSphere Business Process Management software and tooling

## Services Solution

Our experts help you quickly get your BPM project on the right track by using tools targeted directly at helping business experts. IBM has long been an important provider of services and technology needed to deliver BPM capabilities. IBM Software Services for WebSphere is a team of highly skilled consultants with BPM knowledge and deep technical skills. We utilize our proven BPM methodology framework to guide execution across all phases of your BPM lifecycle. We provide worldwide support for WebSphere products to make it easy for clients and partners to design, build, test and deploy solutions.

WebSphere Business Compass is a key entry point for business experts considering process improvement. Our expert consultants help you establish competency in BPM and business process mapping, modeling and methods. We offer hands-on experience with mapping and modeling business processes with WebSphere Business Compass and WebSphere Business Modeler. And we provide a tailored roadmap for moving forward with WebSphere Business Compass and WebSphere Business Modeler.

## Typical Activities

The QuickStart engagement includes a hands-on, interactive session with an IBM Software Services for WebSphere expert, but the specific activities may vary by customer. A consultant will work with you to

- Understand a BPM lifecycle by phase
- Develop basic mapping skills using WebSphere Business Compass and employ modeling skills and methods to ensure proper usage
- Translate business strategy and capabilities from the maps generated by WebSphere Business Compass into processes that would be used as the basis for further refinement with WebSphere Business Modeler
- Import the output of a process map created in WebSphere Business Compass into WebSphere Business Modeler for further refinement and addition of further attributes appropriate for the model
- Build upon the process map to introduce how to refine and create a valid business process model that

could be validated and analyzed by using static and dynamic analysis capabilities in WebSphere Business Modeler

## Deliverables

The following items will be delivered to you as a result of this engagement:

- Lectures and interactive working sessions with your business team about how to create strategy, capability and process maps
- Strategy, capability and process maps for one or two of your business processes
- A business process model generated from one of the process maps in WebSphere Business Modeler
- A business process modeling assessment and recommendation on steps to complete, validate and analyze the process model for future modeling phases as determined by the business team
