

WebSphere® software

## IBM QuickStart for WebSphere Service Registry and Repository

### Highlights

- **Engage the experts - team with IBM's skilled WebSphere lab services consultants to help you realize the full potential of a service-oriented architecture (SOA) in your organization**
- **Let IBM show you how WebSphere Service Registry and Repository uses a life cycle approach to integrate people, processes, governance, information and assets**
- **Achieve more business value from your SOA by enabling better management and governance of your services**

### Business Challenge

You know you can maximize the business value of your SOA with WebSphere® Service Registry and Repository, but you face challenges ahead.

- You want to effectively map IT services to your business design, supporting service lifecycle management and governance, giving you better control of your SOA environment.
- You need to identify common services to avoid duplication and foster reuse.
- You need functions and flexibility to institute standards and best practices as you deploy a SOA.

### Services Solution

Our consultants help you quickly get your WebSphere Service Registry and Repository project on the right track. Backed by years of proven software deployment experience, IBM® Software Services for WebSphere is a team of highly skilled consultants with broad architectural knowledge, deep technical skills and best practices expertise. We provide worldwide support for WebSphere products to make it easy for clients and business partners to design, build, test and deploy solutions, helping you to become an On-Demand Business.

Our expert consultants help you translate service integration and governance requirements into working WebSphere Service Registry and Repository solutions. We offer hands-on experience developing and deploying service integration and management processes, and provide a tailored roadmap to help you develop a solid SOA foundation.

## Typical Activities

### *Getting Started Workshop*

As part of the workshop, consultants will introduce WebSphere Registry and Repository, explain the features and functionality and highlight key integration points. Consultants will also:

- Provide mentoring and assistance with the installation and configuration of WebSphere Service Registry and Repository.
- Work with you to establish a governance process for service definitions and descriptions within the registry, incorporating SOA governance best practices.
- Provide an outline of best practices for using the WebSphere Registry and Repository in a SOA lifecycle.
- Explore how WebSphere Service Registry and Repository should be integrated with your existing SOA environment.

## Deliverables

In addition to valuable knowledge transfer and discussions, this offering will provide an optional written report provided by the consultant describing the findings of the workshop with specific recommendations.

This QuickStart will also deliver:

- An installation of WebSphere Service Registry and Repository in a sandbox environment.
- An integration of WebSphere Integration Developer with the newly installed WebSphere Service Registry.

## Duration

The duration of this QuickStart service is estimated at two weeks (80 hours) and requires one IBM consultant.
