

IBM QuickStart for WebSphere eXtreme Scale

Rapidly and flexibly support your most demanding applications

Highlights:

- Engage the experts—team with IBM Software Services for WebSphere! Our skilled consultants will propel your WebSphere eXtreme Scale project into full swing.
 - Realize value from your recent investment in WebSphere eXtreme Scale.
 - IBM Software Services for WebSphere has the depth and breadth of knowledge and experience with WebSphere software to enable your business to be agile and high performing in a constantly changing environment.
-

Your Business Challenge

You know that your business can benefit from implementing WebSphere eXtreme Scale, but you face challenges ahead. Our experts will help you to

- Realize distributed caching capabilities that enable scaling applications
- Scale to high-volume transactions
- Minimize the risks involved in implementing new technology
- Quickly and efficiently adopt new technology
- Speed time to value and boost project return on investment

Services Solution

IBM Software Services for WebSphere will accelerate your WebSphere eXtreme Scale software project by performing an initial requirements and planning workshop, building a plan based on your architecture, and assisting with the installation and configuration. Mentoring will also be provided to ensure your staff has the skills to successfully deploy your critical solution.

During this effort, our experts will help you ensure best practices and architectural elements are in place and that the applications under consideration can benefit from appropriate eXtreme Scale features.

Typical Activities

The following activities are provided as part of this QuickStart service:

Assessment Review Workshop

Lab consultants will review your architecture with regard to use of WebSphere eXtreme Scale and create an Assessment Summary Report to reflect the proposed environment for your solution.

Consultants will lead architectural assessment workshops involving

- Analyzing and defining the requirements of the caching hardware/software topology in terms of function, reliability, security and performance
- Documenting the architecture and the patterns to use eXtreme Scale
- Working with your team to understand the architecture and its implications for system development

Installation and Configuration Workshop

The objective of the Installation and Configuration Workshop is to install, configure and verify WebSphere eXtreme Scale in the development environment. The workshop will include

- Installation and configuration of required WebSphere eXtreme Scale components
- Assistance with installation verification testing
- Discussion focused on installation and configuration best practices

Main Deliverables

- Installation and configuration of WebSphere eXtreme Scale components
- Assessment Summary Report
- Valuable knowledge transfer

For More Information

To discuss your specific needs or to find out more about the value that IBM Software Services for WebSphere can offer, please contact your local IBM Software Services Sales Specialist at:

ibm.com/developerworks/websphere/services/contacts.html.

Duration

The duration of this QuickStart service is estimated at eighty (80) hours, requiring one to two IBM consultants.

Education

IBM has several education options available to complement your QuickStart service, enabling you to get the most out of your WebSphere software investment. For more information, please visit:
