IBM Cost Buster Solutions for Small Deals - Why?

- Clients are feeling pressure to do more with less and get more value from their IT investments.
- Nowhere in the marketplace is attractive financing as important as it is to small and mid- size businesses.
- A smarter funding strategy can help qualified clients meet budget and cash flow objectives in the 'new normal' state.
- For companies to succeed in the new economy they still need to invest to grow the business, stay competitive and innovative, keep up with the latest technologies and meet the evolving needs of employees, customers and partners.

- **Create your specific IBM Cost Buster Solution** by working with your IBM, Business Partner or IBM Global Financing Rep.

Worldwide availability; work with your local IBM Business Partner, Use end user calculators to 'price' for yourself.

IBM Cost Buster Solutions: Improved Efficiencies, Collaboration and Reduced Costs

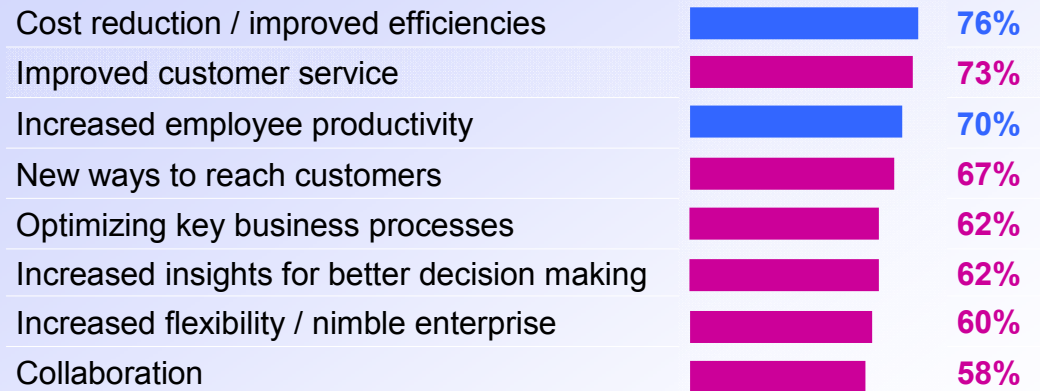

IBM Solutions address the most critical business priorities identified

2009 Top Business Issues

1. Cost reduction / improved efficiencies
2. Increased employee productivity
3. Improved customer services
4. New ways to reach customers
5. Increased insights for better decision making

Note: Question in 2009 asked differently than 2010 with percents based on a 5-point scale. Percents pulled directly from 2009 WW Comprehensive Report (and assuming they are Top 2 Box %'s)

2011 Most Critical Business Priorities

(Scale 0-10 top 8,9,10 combined) ■ Efficiency Focus ■ Innovation Focus

Source: IBM 2011 Worldwide study [Inside the Midmarket: A 2011 Perspective](#), January 2011

Customer Case Study: Grasshopper Group

IBM Business Partner: Ironside Group

"Cognos Express was a solution that fit our budget, even as a small company, and we were able to get it implemented in a much faster time than I would have ever expected."
 - Mike Morris, Vice President of Operations

<p>Overview</p>	<p>Grasshopper Group selects IBM Cognos Express for affordability and rapid ROI to help achieve their goal of servicing over one million entrepreneurs -- the solution to their information delivery woes, chiefly because they were "very confident that Cognos, as a leader in the industry, was going to be able to help solve [their] problems." Another contributing factor to Grasshopper Group's decision in going with Cognos Express was the involvement of the Ironside Group as a trusted advisor. The presence of a highly regarded IBM Business Partner with the depth of industry knowledge and technical expertise to the degree of Ironside Group's helped to establish a level of comfort with the solution, all but guaranteeing its success at Grasshopper Group.</p>
<p>Business need:</p>	<p><i>"One of our main business challenges prior to the implementation of Cognos Express was getting actionable data from our systems." says Mike Morris, VP of Operations at Grasshopper Group.</i></p>
<p>Solution:</p>	<p>IBM Cognos Express was an attractive solution because it could be rapidly deployed and its ease of development would facilitate a fast return on their investment. What was most surprising to Grasshopper Group was just how minimal of an investment that would be. By taking advantage of an attractive offer from IBM Global Financing, Grasshopper Group was able to even further reduce their upfront expenditure on IBM Cognos Express</p>
<p>Benefits:</p>	<p>To date, Grasshopper Group has transitioned all of their previously manual operational reporting to a fully automated process using scheduled reports that are emailed to ten users daily.</p>
<p>Case Study:</p>	<p>Grasshopper Group is a provider of a suite of tools designed to help empower entrepreneurs. They are currently a thirty-five person operation with over one hundred thousand customers and growing that number steadily every day. As Grasshopper Group continues to expand their product line and experience rapid growth, they have identified a critical need to attain better insight into their customer and product information in order to provide better targeted and more effective offerings that will ultimately improve their own customers' rate of success.</p>

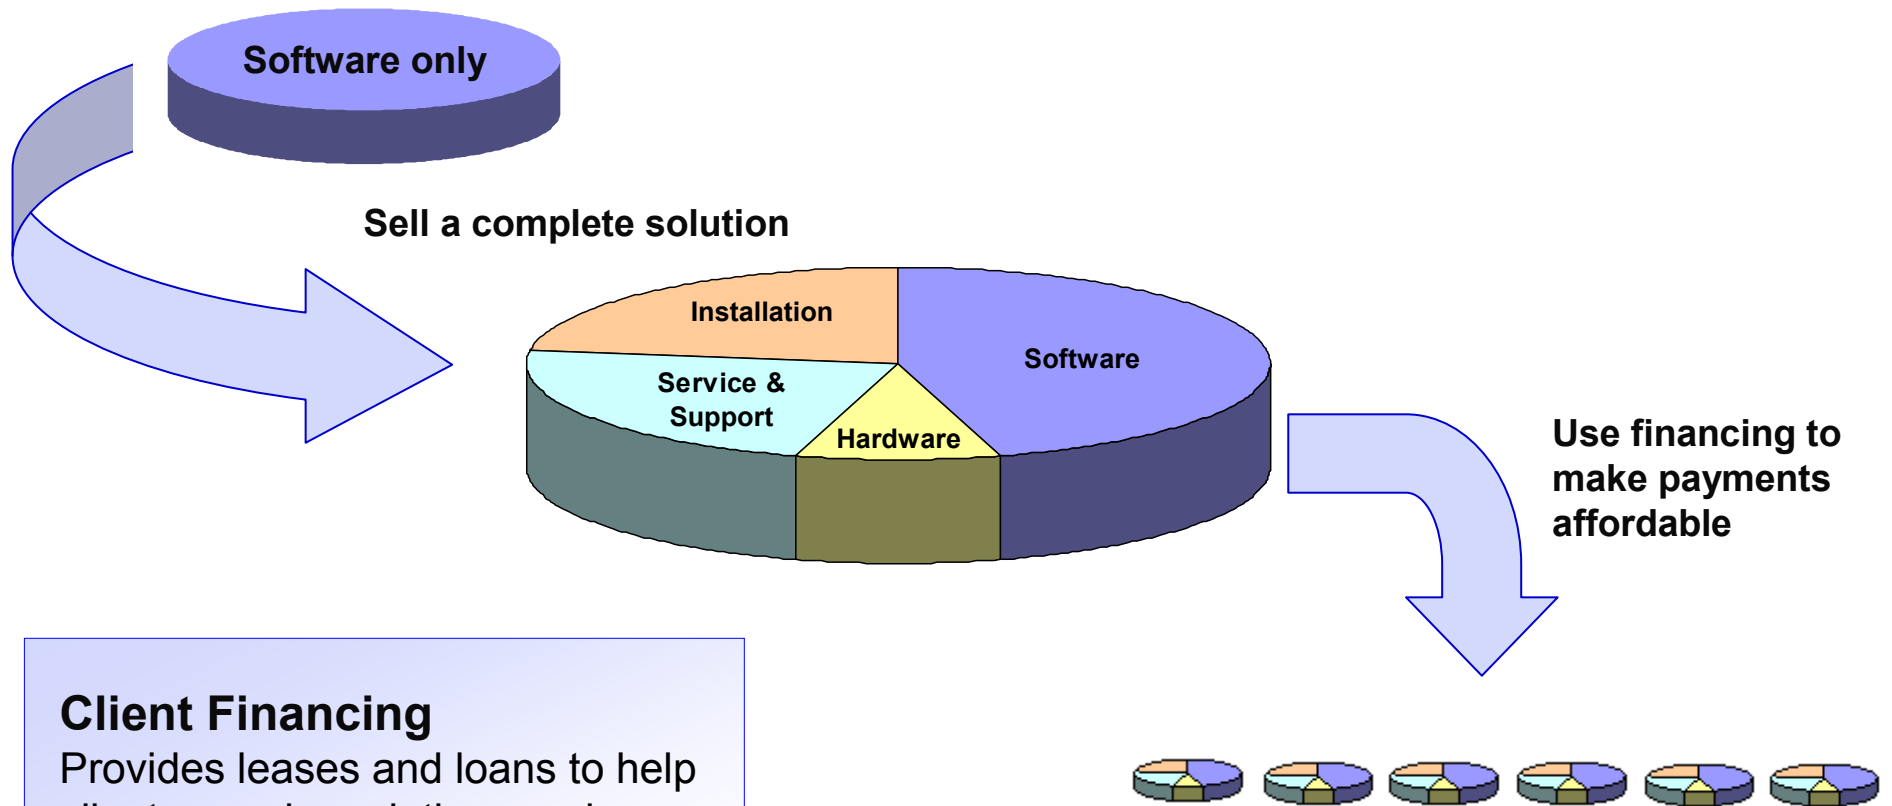

"As we were looking for solutions, we were also looking at different potential partners to help us with implementation, and Ironside Group's expertise in the area really just made [IBM Cognos Express] a no-brainer for us" says Morris.

#1 Commerce

Industry Solutions

IBM Sterling B2B Integration Cost Buster Solution

Automation of the complete “buy-sell-ship-pay” process with trading partners

As part of the IBM® Sterling Business Integration Suite, **IBM® Sterling B2B Integration** automates business processes shared with trading partners. The goal is automation of the complete “buy-sell-ship-pay” process that involves a range of documents and business processes, which include not just the buyer or seller of the goods/services, but also banks and third party logistics companies. The solution automates these processes and provides visibility into data and processes shared with external entities.

IBM® Sterling Gentran® is one of the industry’s most widely used and trusted EDI and data translation solutions, proving itself daily in millions of business transactions. Translation would be relatively simple if there was only one standard and you had only one partner; however, things are much more complex. There are many EDI standards and you have multiple trading partners—meaning you must have the ability to communicate in the appropriate standard for each partner. Sterling Gentran product solutions can help you manage your B2B community.

<p>What makes this offering unique?</p>	<p>Integrate with 100% of your business partners</p> <ul style="list-style-type: none"> • Extend business processes to 100% of your business community • Improve business agility, operational efficiency, and business performance • Add secure and flexible community integration and business process automation to your business processes • Gain visibility into actionable information across your IT and business processes • Deploy solutions on premise, as-a-Service, or as a hybrid combination of both
<p>Quick Facts:</p>	<ul style="list-style-type: none"> • Sterling B2B Integration solutions are available in a variety of deployment and operational models to meet business needs, and can be delivered on premise or as-a-Service. • IBM Sterling Gentran is one of the Sterling B2B Integration solutions delivered on premise.

#2 Commerce

Industry Solutions

IBM Sterling Managed File Transfer Cost Buster Solution

Secure data movement to gain control of critical business data

IBM® Sterling Managed File Transfer is the market-leading solution for secure data movement that enables enterprises to gain control and oversight of the massive movement of critical corporate data to facilitate data growth, reduce security risk, and improve IT and business efficiency..

What makes this offering unique?

The Sterling Managed File Transfer solution is delivered through multiple products that can work standalone, or even better when together. One of these products is: IBM® Sterling Connect:Direct®. Sterling Managed File Transfer solutions are available as licensed on premise software.

Quick Facts:

IBM® Sterling Connect:Direct® -- Point-to-point file transfer software optimized for high-volume, assured data delivery of files within and between enterprises.

In this new era of rigorous security and shorter processing windows, Sterling Connect:Direct is the point-to-point file transfer software optimized for high-volume, secure, assured delivery of files within and among enterprises. Sterling Connect:Direct can deliver your files with:

Predictability—Assures delivery via automated scheduling, checkpoint restart, and automatic recovery/retry

Security—Ensures that your customer information stays private, and that your file transfers are auditable for regulatory compliance via a proprietary protocol, authorization, and encryption (FIPS 140-2, and Common Criteria certified)

Performance—Handles your most demanding loads, from high volumes of small files to multi-gigabyte files

Act Now! Payments as low as \$459 per month or \$38 per user per month, for 36 months subject to IBM Global Financing approval. Based on 15 users. Includes software, subscription & support. Configuration subject to change.

#2 Application Lifecycle

IBM Dynamic Software Analysis Cost Buster Solution

Analysis to write faster more reliable code; identify memory bugs and bottlenecks

IBM Rational PurifyPlus™

PurifyPlus is an award-winning dynamic software analysis solution designed to help developers write faster, more reliable code by automatically identifying memory bugs, performance bottlenecks, and untested code. Available from our local IBM Services IBM Services Business Partners.

What makes this offering unique?	<ul style="list-style-type: none"> • Employs a patented Object Code Insertion (OCI) technique for instrumenting applications, eliminating the need to recompile from source. Monitors all components of an application, including third-party libraries for which source code is not available. • Scales effectively for large applications. Pinpoint control over inserted code allows for optimization of run-time code paths. • Performance profiling River-of-Time call graph makes identifying bottlenecks simple and has the added benefit of showing how functions interact. This can greatly improve program understanding for developers new to a project.
----------------------------------	--

Quick Facts: Saves developers 2.6 weeks/year tracking bugs and 1.96 weeks/year tracking performance problems¹
¹ For details, read the whitepaper, [How can IBM Rational PurifyPlus software improve your bottom line?](#)

#1 Security

Rational

IBM Web Application Security / OnDemand Cost Buster Solution

Provides visibility to application vulnerabilities that could be exploited by hackers

IBM Rational AppScan Express and AppScan OnDemand helps ensure the security and compliance of web applications throughout the software development lifecycle by providing visibility to vulnerabilities that could be exploited by hackers. Available from our local IBM Services IBM Services Business Partners.

What makes this offering unique?

- Enables comprehensive and automated testing of Web applications for vulnerabilities
- Fully integrated malware scanning: scans Web sites for both embedded malware and links to malicious or undesirable sites
- Dramatically reduces the need for manual testing, which can produce significant cost savings
- Automatically scans complex Web applications using Web 2.0 technologies (Adobe Flash, JavaScript, AJAX)
- Assists in meeting key compliance standards: Payment Card Industry Data Security Standard (PCI DSS)
- Hosted and run by a highly experienced team of security and compliance product experts who maximize product capabilities on your behalf (OnDemand)
- Low startup costs and reduced ongoing total cost of ownership with a subscription service that requires no training or in-house security expertise, infrastructure, set-up, or software maintenance expense (OnDemand)
- Unmatched time-to-value – enables immediate identification of online risk, provides instant access to industry best practices, and security and compliance (OnDemand)

Quick Facts:

- Web applications represent the greatest security risk that organizations face. (Approx. half of all Cyber vulnerabilities are web application vulnerabilities. X-Force 2010 Report)
- Breach Costs continue to rise – up to \$204 per compromised record; >\$6.6M average cost per breach
- Compliance continues to a big driver – PCI, breach disclosure (SB1386), privacy (GLBA)

#2 Application Lifecycle Management

Rational

IBM Website Privacy and Accessibility Cost Buster Solution

Scan websites for compliance issues & risks around end-user accessibility & privacy

IBM Rational Policy Tester and Policy Tester OnDemand help ensure that Websites are accessible to end-users with disabilities, maintain ADA Section 508 compliance, and comply with privacy regulations and internal quality and brand standards. Available from our local IBM Services IBM Services Business Partners.

<p>What makes this offering unique?</p>	<ul style="list-style-type: none"> • Enables comprehensive and automated testing of Websites for accessibility and privacy compliance issues and risks, as well as internal quality and brand standards • Dramatically reduces the need for manual testing, which can produce significant cost savings • Automatically scans complex Web applications using Web 2.0 technologies (Adobe Flash, JavaScript, AJAX) • Assists in meeting key compliance standards such as ADA Section 508 and WCAG guidelines, and Section 207 and 208 privacy standards • Helps avoid negative press, tarnished corporate image, and often out-of-court settlements for Web compliance issues (Target \$6M 2008 settlement) • Hosted and run by a highly experienced team of security and compliance product experts who maximize product capabilities on your behalf (OnDemand) • Low startup costs and reduced ongoing total cost of ownership with a subscription service that requires no training or in-house compliance expertise, infrastructure, set-up, or software maintenance expense (OnDemand) • Unmatched time-to-value – enables immediate identification of online risk, provides instant access to industry best practices, and compliance standards (OnDemand)
<p>Quick Facts:</p>	<ul style="list-style-type: none"> • Helps reduce the risk of fines, penalties and lawsuits due to Web accessibility and privacy compliance • Helps increase online revenues – increases the number of customers, the number who complete transactions, and the number who move to the Web from more expensive channels • Helps reduce support calls – daily customer service support calls reduced by an estimated 10% at over \$14/call • Compliance continues to a big driver – Section 508, WCAG, Section 207, 208, GLBA Privacy, etc.

Act Now! Payments as low as \$1,102 per month for 36 months, subject to IBM Global Financing approval, based on 100 users. Includes software, subscription & support. Configuration subject to change.

#3 Network, Server and Endpoint

Tivoli

IBM Endpoint Security Cost Buster Solution

Continuous patch compliance visibility & enforcement, all in a pre-configured solution

IBM Tivoli Endpoint Manager for Patch Management software provides continuous compliance with unified, real-time visibility and enforcement to deploy and manage patches to all endpoints regardless of location, connection type or status, from a single management console. Continuous patch compliance visibility and enforcement.

An IBM System x® server offers new levels of performance and flexibility to help you respond quickly to changing business demands. Cost effective and compact, it is well-suited for small to mid-sized businesses.

Available from our local IBM Services IBM Services Business Partners.

What makes this offering unique?

- Everything needed in one preconfigured solution
- Easy-to-use and deploy in a matter of days, providing a rapid ROI
- Automatically manage patches for multiple operating systems and applications
- Reduce security and compliance risk by slashing remediation cycles from weeks to days or hours
- Gain greater visibility into patch compliance with flexible, real-time monitoring and reporting
- IBM System x provides maximum performance with the latest Intel technology in a robust, flexible platform, achieving energy savings with built-in power management tools, and minimizing risks with trouble-free serviceability and maintenance

Quick Facts:

- Based on customer case study references: provided 50 percent reduction in labor costs; decreased patch cycle times from 2 - 3 weeks to 2 - 3 days; increased first pass patch success rate from 50 to 99 percent
- Extend your investment to include other components of the Tivoli Endpoint Manager family with a simple license key change. Use the same console, management server and endpoint agent to provide comprehensive security and compliance, power, and lifecycle management capabilities

Act Now! Payments as low as \$188 per month for 36 months, subject to IBM Global Financing approval, based on 100 users. Includes software, subscription & support. Configuration subject to change.

#4 Network, Server and Endpoint

IBM Network Security Cost Buster Solution

Continuous patch compliance visibility & enforcement, all in a pre-configured solution

IBM Security Network Intrusion Prevention System (IPS) appliances stop Internet threats before they impact our client's business. They provide comprehensive protection to all sizes of organizations, while reducing the cost and complexity associated with deploying and managing point solutions.

• Available from our local IBM Services IBM Services Business Partners.

<p>What makes this offering unique?</p>	<ul style="list-style-type: none"> • Goes above and beyond the features and protections of traditional network intrusion prevention solutions • Protects systems before they are patched for security flaws by utilizing IBM Virtual Patch® technology • Integrated protection for Web applications eliminates the need for a stand-alone Web application firewall • Integrated Data Loss Prevention (DLP) Light monitors data security risks throughout your network • Integrate with other security solutions such as IBM Rational AppScan in order to leverage AppScan's intelligence to show what needs to be protected • Provide Ahead of the Threat® protection backed by world renowned IBM X-Force Research
<p>Quick Facts:</p>	<ul style="list-style-type: none"> • At \$7.2 million*, the average cost of a security breach is enough to put many mid-sized organizations out of business • Network Intrusion Prevention Systems are one of the most important tools for preventing a security breach • Web application vulnerabilities now account for close to 50% of all security flaws** <p>*Source: Ponemon Institute **Source: IBM X-Force Research</p>

Act Now! Payments as low as \$541 per month for 36 months, subject to IBM Global Financing approval, based on 100 users. Includes software, subscription & support. Configuration subject to change.

#5 People & Identity

IBM Single-Sign-On Protection Cost Buster Solution

Build strong password controls + comply with industry regulations for access management

IBM Single Sign On Protection Cost Buster Solution helps organizations improve users' password behavior while implementing strong access controls to applications. The software allows users to log in once (authenticate), then automatically access all the applications they are entitled to. The solution consists of the following components:

- **IBM Tivoli® Assess Manager for Enterprise Single Sign-On (TAM ESSO)** software which allows users to log in once (authenticate), then automatically access all the applications they are entitled to.
- **IBM Business Partner Services** to implement the solution for 100 users is estimated at 5 days at \$1,150. USD per day.

What makes the offering unique?	<ul style="list-style-type: none"> ▪ A pre-configured security solution that can be deployed and provide measurable ROI quickly. ▪ Includes the hardware and software needed to implement single sign on capabilities for 100 users. ▪ Includes 5 days of services at daily rate of \$1,150. USD per day.
Quick Facts:	<ul style="list-style-type: none"> ▪ Complete end-point coverage allows users to sign on to the network from anywhere with one password and get single sign-on access to all applications. Strengthens security with strong authentication and centralized audit tracking. ▪ Reduces costs by cutting help desk calls for password resets. ▪ Add new levels of security to shared workstations and kiosks. ▪ Supports strong authentication devices such as badges, smart cards, even fingerprint biometrics. ▪ Recognized by analysts as industry-leading single sign-on solution. ▪ IBM X-Architecture makes data centers more reliable and secure.

#1 Storage Management

Tivoli

IBM Data Protection Cost Buster Solution

Recovery management, data reduction, best-in-class performance and reliability

"Better backup + faster restore = a better night's sleep". IBM Smarter Backup Solution provides customers with unified recovery management, data reduction, simplified administration, and is best-in-class for scalability, performance, and reliability.

- **IBM Tivoli® Storage Manager** software family of products provides Data Reduction, Unified Recovery Management, and Smarter Backup for Virtual Servers, and provides a smarter approach to protecting an increasingly distributed and complex data storage environment.
- **IBM System Storage™ DS3500** with SAS disk, which offers excellent data storage value
- **An IBM System x3550 M3 Enhanced server** to host the TSM application. IBM Implementation Services* for disk systems (available from IBM or one of our local IBM Services IBM Services Business Partners)

What makes this offering unique?	<ul style="list-style-type: none"> • A complete Smarter Backup Solution that offers a holistic approach to data reduction and data lifecycle management, unified recovery management, and advanced data protection and recovery for VMware. Many customers are looking to make a switch in vendors because their current solutions are not keeping up with storage management demands.
Quick Facts:	<ul style="list-style-type: none"> • Provides scalability to handle data growth, today and well into the future. • Has broad functionality, support for most HW platforms, operating systems, application, data types, locations. • Offers simplified, unified recovery management – all from a single user interface, complete with built-in reporting and monitoring. • Provides data reduction and data de-duplication. • Is best-in-class for reliability – improves availability and reduces downtime. • Features advanced recovery capabilities for near-instant restore of Windows & Linux disk volumes.

Act Now! Payments as low as \$787 per month for 36 month subject to IBM Global Financing approval, & dependent on # & size of servers in current environment.

#2 Storage Management

Tivoli

IBM FastBack Data Protection Cost Buster Solution

Recovery management, data reduction, best-in-class performance and reliability

"Better backup + faster restore = a better night's sleep". IBM FastBack Data Protection Solution includes:

- **IBM Tivoli® Storage Manager FastBack** software which provides comprehensive, cost effective data protection
- **IBM System Storage™ DS3500** with 8 TB SAS disk, which offers excellent data storage value
- **An IBM System x3550 M3 Enhanced server** to host the TSM FastBack application. Manages growth and risks to help improve business availability using IBM XArchitecture® technology.
- **Optional:** IBM Implementation Services* for disk systems (available from IBM or one of our local IBM Services IBM Services Business Partners)

What makes this offering unique?

- Solution can be deployed and maintained with less IT skills. Includes the hardware and software needed to deploy and get running fast. Many customers are looking to make a switch in vendors because their current solutions are not keeping up with storage management demands.

Quick Facts:

- Solution can be deployed and maintained with less IT skills. Includes the hardware and software needed to deploy and get running fast. Many customers are looking to make a switch in vendors because their current solutions are not keeping up with storage management demands.
- Enables customers to recover quickly from any type of data loss incident; in minutes instead of hours or days following data loss. Setup time measured in hours, not days or weeks! .
- Provides fast, frequent & non-disruptive block-level backup for Windows 7 and Linux servers
- Perfect for remote offices and critical servers. Tightly integrated with TSM for unified recovery management
- ROI less than 1 year in many cases. Provides data reduction and data de-duplication.
- Improves availability and reduces downtime.

#3 Storage Management

Tivoli

IBM Storwize Protector Cost Buster Solution

Enterprise-class recovery capabilities for IBM midrange storage

IBM FastBack for Storwize V7000 is a smarter data protection and near-instant recovery software solution for business critical Windows and Linux servers connected to Storwize V7000 Platform.

IBM Storwize V7000 offers new levels of performance and flexibility to help you respond quickly to changing business demands. Cost effective and compact, it is well-suited for small to midsize businesses.

Available from our local IBM Services IBM Services Business Partners.

<p>What makes this offering unique?</p>	<p>FastBack for Storwize V7000 includes non-disruptive block-level local backup and near instant recovery plus data de-duplication and highly efficient IP-based replication for off-site disaster recovery and business resilience. It also includes granular recovery for Microsoft Exchange email objects, including messages, attachments, contacts, calendar entries, notes, tasks and journals.</p>	
<p>Quick Facts:</p>	<ul style="list-style-type: none"> • Block-Level Incremental capture with integrated de-duplication • Restore any type of data, anywhere • Mission-critical Application protection and recovery • IP based selective replication 	<ul style="list-style-type: none"> • Simple Manageability with Centralized control and Reporting • Minimized data foot print • Remote office backup consolidation • Bandwidth-friendly protection

More information on the solution is available [here](#)

Act Now! Payments as low as \$2,547 per month for 36 months, subject to IBM Global Financing approval, based on 100 users. Includes software, 1st year support and hardware. Configuration subject to change.

#4 Business Service Management

Optimize Impact of Business Infrastructure & Services

IBM Endpoint Management Cost Buster Solution

Tivoli

Continuous patch compliance visibility & enforcement, all in a pre-configured solution

Address management challenges with real-time visibility and advanced functionality

- **IBM Tivoli Endpoint Manager for Lifecycle Management** software provides an accurate and comprehensive “single source of truth” for endpoint visibility as it reduces complexity and cost, increases speed and accuracy, and boosts productivity for help desks and users through enhanced endpoint management
- **IBM System x server** offers new levels of performance and flexibility to help you respond quickly to changing business demands. Cost effective and compact, it is well-suited for small to midsize businesses
- Available from our local IBM Services IBM Services Business Partners.

What makes this offering unique?	<ul style="list-style-type: none"> • Everything needed in a preconfigured solution, easy-to-use and deploy in a matter of days. providing a rapid ROI • A single solution that comprehensively addresses endpoint management challenges, including asset discovery, hardware and software inventory, patch management, software distribution, OS deployment and migration, remote desktop control, and software use analysis • IBM System x provides maximum performance with the latest Intel technology in a robust, flexible platform, achieving energy savings with built-in power management tools, and minimizing risks with trouble-free serviceability and maintenance
----------------------------------	---

Quick Facts:	<ul style="list-style-type: none"> • Based on customer case study references: provided 50% labor cost reduction; accelerated system maintenance from weeks to hours; 25% savings in software licensing costs; reduced time to install and validate a patch from one week to one hour • Extend your investment to include other components of the Tivoli Endpoint Manager family with a simple license key change. Use the same console, management server and endpoint agent to provide comprehensive security and compliance, and power management capabilities

#5 Business Service Management

Tivoli

IBM Application Manager Cost Buster Solution

Quickly and comprehensively monitor, alert & report on performance & availability of IT

IBM Application Manager for Smart Business provides the capabilities to quickly & comprehensively monitor, alert & report on performance & availability of IT resources

- **IBM Application Manager software**, which visualizes service performance and health across network devices, servers, middleware and application components and improve service delivery quality.
- **An IBM System x® server** which manages growth and risks to help improve business availability using IBM XArchitecture® technology, coupled with cost-effective IBM System Storage
- Available from our local IBM Services IBM Services Business Partners.

What makes this offering unique?

• Application Manager for Smart Business is a turn-key solution for application infrastructure monitoring, easy to use and with quick-start features to deliver rapid time to value. It has broader operating systems and application coverage than similarly-sized solutions.

Quick Facts:

- Many midsize organizations have no centralized visibility of IT environment
- Monitoring systems and servers is usually done by checking machine by machine which is time consuming and costly, leading to both under- and over-utilization
- IBM Application Manager provides:
 - comprehensive monitoring and reporting of IT infrastructure performance, including network, servers, and databases
 - IT with the tools needed to quickly and comprehensively monitor, alert and report on performance and availability
 - Help for IT managers to identify troublesome trends before they lead to service outages

More on Application Manager for Smart Business visit url [here](#) and [IBM System 4252-C2X](#)

Act Now! Payments as low as \$589 per month for 36 months, subject to IBM Global Financing approval, based on 100 users. Configuration subject to change.

#6 Business Service Management

Tivoli

IBM Service Manager Cost Buster Solution

Resolve IT-related problems fast and keep customers satisfied

IBM Service Manager for Smart Business improves your operational efficiency and the delivery of services by enabling a single point of contact for all your service desk needs

- **IBM Service Manager for Smart Business** software, which helps customers streamline service support operations through ITIL V3.0 aligned focused service desk capabilities
- An IBM System x® server which manages growth and risks to help improve business availability using IBM XArchitecture® technology, coupled with cost-effective IBM System Storage
- Available from our local IBM Services IBM Services Business Partners

What makes this offering unique?

• “Service Desk” that is operational in hours, providing a single Interface to support service request, problem, and incident management. Links changes in assets to incidents; “Self Service” knowledge base available for optimized problem resolutions.

Quick Facts:

- Many midsize businesses have only a hotline for a service desk, backed up by a spreadsheet to allocate and record incident numbers
- IBM Service Manager automate service request incidents and helps to resolve server, application and network problems
- IBM Service Manager provides:
 - a single point of contact to automate incident and problem management
 - dashboards showing real-time performance views
 - remote diagnostics capability
 - survey management capability
