Abstract:

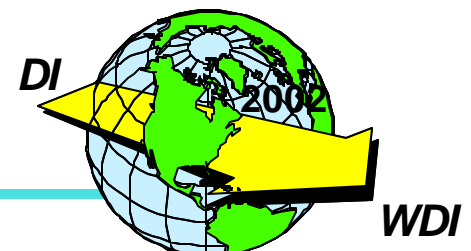

- ★ "DataInterchange is "Coming of Age" here in IBM Software Group. This session will provide a quick look at the technical trends and directions for the DataInterchange product, and its position within the IBM software portfolio.."

Roadmap

★ Release Highlights

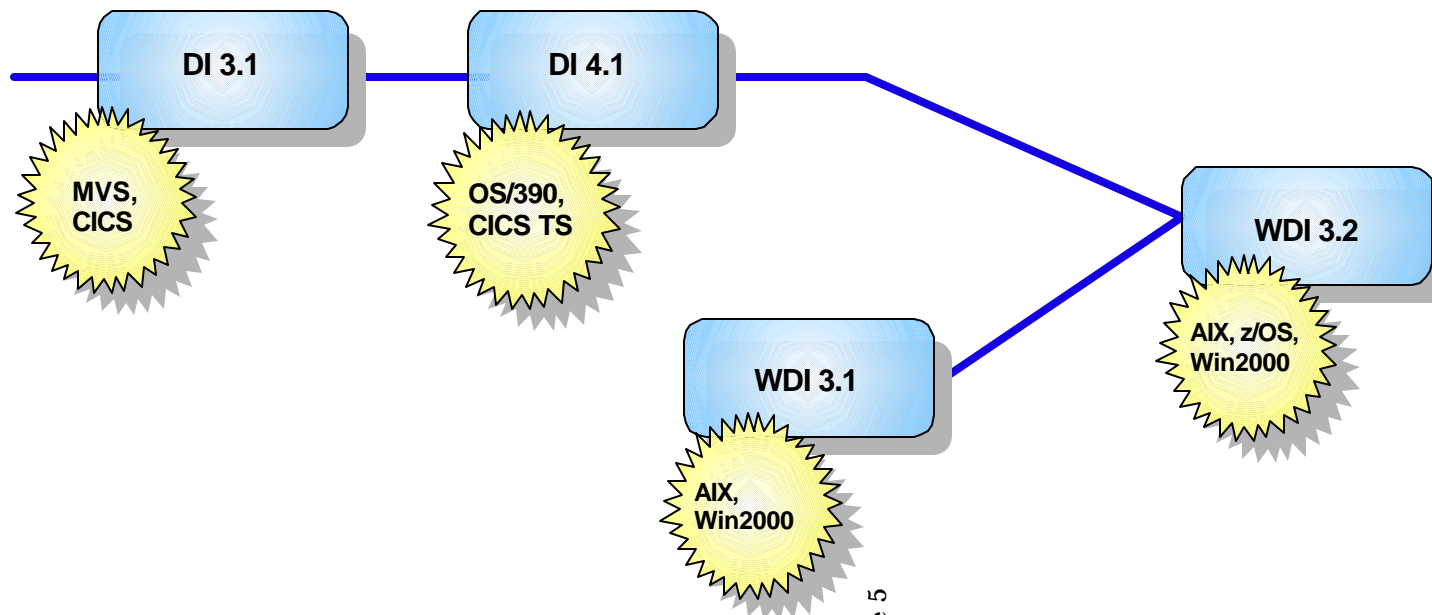

- ✎ WebSphere Data Interchange
- ✎ Migration to WDI 3.2
- ✎ Any-to-Any Mapping

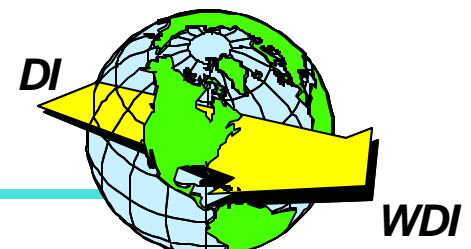

WebSphere Data (space) Interchange

★ WebSphere...

- It has been a busy year 2002
 - ✍ Moved the Development Lab for DI from IGS to Software Group
 - ✍ Announced first WebSphere branded DI product - April
 - Created the AIX and Win2000 versions of DI 3.1 - released as WDI 3.1
 - ✍ Announced second WebSphere branded DI product - October
 - Converged the product family under the WebSphere Brand
 - WDI 3.2 released on all platforms supported by DI 4.1 and WDI 3.1
 - ▶ AIX, Win2000, z/OS

Page 5

Migration

★ Existing DI product portfolio

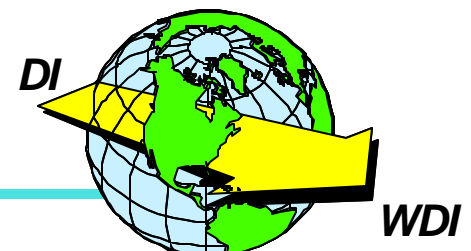

- DI 1.5 and DI 2.1
 - ✦ WfS in Jan 2001
- DI 3.1
- DI 4.1

★ Existing WDI Portfolio

- WDI 3.1 (AIX, WIN2000)
- WDI 3.2 (AIX, WIN2000, z/OS)

★ Migrate to WDI 3.2

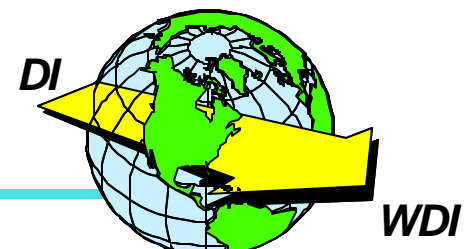

- Any-to-Any Translator
- Multi-Platform
- Single Client Development environment

Any-to-Any Translation

★ Any-2-Any

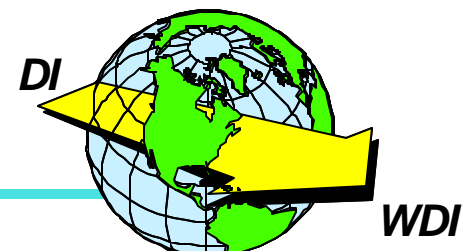

- Allows for translation of XML-to-XML, XML-to-EDI, EDI-to-EDI, XML-to-CSV, etc. (i.e. any combination of the data types XML, EDI, ADF and CSV)
- Enhanced Client interface to provide any-to-any graphical mapping with native support for storing, displaying and mapping DTD's

SWG: IBM Software Group

★ Other WebSphere related products

- WMQ
 - ✎ WebSphere MQ
 - providing an open, scalable, industrial-strength messaging backbone.
- WBC:BI
 - ✎ WebSphere Business Connection: Business Integration
 - Business-to-business (B2B) process integration and data sharing among trading partners of all types and sizes
- WMQI
 - ✎ WebSphere MQ Integrator Broker
 - Transforms, augments and applies rules to message-based data, and routes and distributes it between high performance systems
