# IBM LotusLive™

Working together just got easier

Online collaboration solutions for the business world

LotusLive is the destination for world-class online collaboration services. Discover, connect and interact with your customers, partners and colleagues.

LotusLive offers a variety of online solutions for your business ranging from e-mail and Web conferencing, to an integrated suite of collaboration solutions all in a security-rich environment. Share documents, meet online with potential customers without the hassle of firewalls, and build your network by connecting with companies relevant to your business.

Companies of all sizes, from start-ups to large enterprises, are increasingly relying on collaboration tools for making quick, critical decisions and influencing sales around the globe. LotusLive provides the essential business services you need in an easy-to-use environment, designed with your security in mind.

LotusLive delivers these services through online model, thus reducing cost and startup time and eliminating complicated installations and the need for onsite IT support. This convenient and cost-effective delivery model, combined with simplified collaboration outside the company firewall—makes it easier for you to do business with virtually anyone, anywhere, any time.

• Time-tested and proven Lotus Notes e-mail hosted for you by IBM. This service is a simple way to provide industry-leading online email solutions for your business.

Which service is best for me?

Small Businesses

Your business faces the same collaboration challenges as larger companies, but chances are you have fewer resources.

- Get the essential, integrated business services you need in an easy-to-use environment. Imagine having access to the newest, emerging business technologies from IBM, without the cost of an IT department or support team.

- LotusLive delivers the services you need through an online service model, significantly reducing cost and startup time—with no capital expense.

- Whether you need a suite of collaboration tools, Web conferencing or e-mail, LotusLive has options for small businesses.

Enterprise Businesses

Work with people inside and outside your organization with equal ease in a security-rich environment.

Complement your current on-premise solutions with online solutions to deliver maximum value.

- LotusLive has designed a series of services with your needs in mind. Whether you are looking to extend your Lotus Notes e-mail, organize Web conferences or expand your network into new global markets.

- LotusLive enables enterprise customers to drive innovation and increase employee productivity while managing costs and freeing up precious IT resources to focus on core business needs.

- LotusLive streamlines your online collaboration tools giving you the advantage of integrated services from online store and share, to chat and Web conferencing – all without corporate boundaries.
