T15   FAStT - A solutions approach
**   by Mark Brandau, Engenio Information Technologies, Inc.**

FAStT Storage Server solutions for backup and recovery significantly shrink backup windows, increase restore performance, improve backup and restore reliability and reduce storage administration costs. This session will cover how FAStT storage solutions solve your backup issues. This session will include Instant Backup and Rapid Recovery for Databases, as well as how to architect a Disk-to-Disk Backup and Restore environment. These solutions leverage the entire FAStT Storage Server family, specifically including FAStT Storage Manager Flashcopy functionality and the FAStT100.
